

A detailed medieval manuscript illustration depicting a large, dense crowd of people. The figures are shown in profile or three-quarter view, looking upwards and to the right. They are wearing various types of hats and robes, suggesting a diverse social hierarchy. The style is characteristic of late medieval manuscript illumination, with fine lines and a rich color palette. The crowd is packed closely together, filling the entire frame.

THE MEASURE OF MULTITUDE

Population in Medieval Thought

Peter Biller

Measure Of Multitude

Frank Gifford Vial

Measure Of Multitude:

The Measure of Multitude Peter Biller, 2000 This innovative study challenges the view that medieval thought was fundamentally abstract He describes what medieval people thought about population studying the texts which contained their thought and examining the medieval realities which shaped it such as birth birth control sex ratio marriage ages length of life and the population of the Holy Land *The Court of Reason* Beatrix Himmelmann, Camilla Serck-Hanssen, 2021-11-08 The Proceedings present the contributions to the 13th International Kant Congress which was held at the University of Oslo August 6 9 2019 The congress which hosted speakers from more than thirty countries and five continents was dedicated to the topic of the court of reason The idea that reason stands before itself as a tribunal characterizes the whole of Kant's critical project Without such a court reason falls into conflict with itself With such a court in place however it may succeed in establishing the possibility and limits of metaphysics ethics aesthetics law and science The idea of reason being its own judge is not only pivotal to a proper understanding of Kant's philosophy but can also shed light on the burgeoning fields of meta philosophy and philosophical methodology The 2019 Kant Congress put special emphasis on Kant's methodology his account of conceptual critique and the relevance of his ideas to current issues in especially political philosophy and the philosophy of law Additional sections discussed a wide range of topics in Kant's philosophy The Proceedings will provide anyone who is interested in exploring the variety of present day work on Kant and Kantian themes with a wealth of fruitful inspiration

C. 500-900 Zubin Mistry,2015 First full length study of attitudes to abortion in the early medieval west When a Spanish
 monk struggled to find the right words to convey his unjust expulsion from a monastery in a desperate petition to a sixth
 century king he likened himself to an aborted fetus Centuries later a ninth century queen found herself accused of abortion in
 an altogether more fleshly sense Abortion haunts the written record across the early middle ages Yet the centuries after the
 fall of Rome remain very much the dark ages in the broader history of abortion This book the first to treat the subject in this
 period tells the story of how individuals and communities ecclesiastical and secular authorities construed abortion as a social
 and moral problem across a number of post Roman societies including Visigothic Spain Merovingian Gaul early Ireland Anglo
 Saxon England and the Carolingian empire It argues early medieval authors and readers actively deliberated on abortion and
 a cluster of related questions and that church tradition on abortion was an evolving practice It sheds light on the neglected
 variety of responses to abortion generated by different social and intellectual practices including church discipline dispute
 settlement and strategies of political legitimation and brings the history of abortion into conversation with key questions
 about gender sexuality Christianization penance and law Ranging across abortion miracles in hagiography polemical letters
 in which churchmen likened rivals to fetuses flung from the womb of the church and uncomfortable imaginings of
 resurrected fetuses in theological speculation this volume also illuminates the complex cultural significance of abortion in
 early medieval societies Zubin Mistry is Lecturer in Early Medieval European History University of Edinburgh The
Life-Cycle in Western Europe, C.1300-1500 Deborah Youngs,2006-08-08 This is the first study to examine the entire life cycle
 in the Middle Ages Drawing on a wide range of secondary and primary material the book explores the timing and experiences
 of infancy childhood adolescence and youth adulthood old age and finally death It discusses attitudes towards aging rites of

history synthesizes a vast amount of scholarship to take the long view Spanning from antiquity to the present day the book focuses on the Mediterranean western Europe North America and their empires It combines history of science technology and medicine with social cultural and demographic accounts Ranging from the most intimate experiences to planetary policy it tells new stories and revises received ideas An international team of scholars asks how modern reproduction an abstract process of perpetuating living organisms replaced the old generation the active making of humans and beasts plants and even minerals Striking illustrations invite readers to explore artefacts from an ancient Egyptian fertility figurine to the announcement of the first test tube baby Authoritative and accessible Reproduction offers students and non specialists an essential starting point and sets fresh agendas for research

Empire Michael Hardt, Antonio Negri, 2001-09-15 Imperialism as we knew it may be no more but Empire is alive and well It is as Michael Hardt and Antonio Negri demonstrate in this bold work the new political order of globalization Their book shows how this emerging Empire is fundamentally different from the imperialism of European dominance and capitalist expansion in previous eras Rather today's Empire draws on elements of U S constitutionalism with its tradition of hybrid identities and expanding frontiers More than analysis Empire is also an unabashedly utopian work of political philosophy

Plato's forms, mathematics and astronomy Theokritos Kouremenos, 2018-05-22 Plato's view that mathematics paves the way for his philosophy of forms is well known This book attempts to flesh out the relationship between mathematics and philosophy as Plato conceived them by proposing that in his view although it is philosophy that came up with the concept of beings which he calls forms and highlighted their importance first to natural philosophy and then to ethics the things that do qualify as beings are inchoately revealed by mathematics as the raw materials that must be further processed by philosophy mathematicians to use Plato's simile in the Euthedemus do not invent the theorems they prove but discover beings and like hunters who must hand over what they catch to chefs if it is going to turn into something useful they must hand over their discoveries to philosophers Even those forms that do not bear names of mathematical objects such as the famous forms of beauty and goodness are in fact forms of mathematical objects The first chapter is an attempt to defend this thesis The second argues that for Plato philosophy's crucial task of investigating the exfoliation of the forms into the sensible world including the sphere of human private and public life is already foreshadowed in one of its branches astronomy

into English in its entirety William Marshner's translation is consistent with fidelity to the technical force of the original The translator's footnotes acknowledge what empirical science has made obsolete in the work of St Thomas and also make clear how much today's science would have saved Thomas useless labor This volume will for the first time make Cajetan's help available to the modern reader
