International Handbook of Personal Construct Psychology Fay Fransella, 2003-09-12 Personal Construct Psychology PCP was devised by George Kelly in 1955 as a new method in psychotherapy Since then his techniques have been applied widely throughout psychology and beyond to include areas as diverse as nursing conflict resolution sociology and literary criticism This handbook brings together for the first time a wide range of theories research and practice that have grown out of Kelly's original concept It provides a reference on what has been done and insights into how further applications can be made within psychology and psychotherapy and also informs non

psychologists and those unfamiliar with Kelly's techniques of its usefulness and applicability in other disciplines. This is the only comprehensive reference on PCP available. Kelly's work is seminal and widely known. Emphasises practical application to a wide range of disciplines.

Destructive Entrepreneurship in Emerging Markets Amir Emami, Esin Yoruk, Andrew Johnston, Andrea Caputo, Paul Jones, 2025-03-30. The book investigates the intricate world of entrepreneurship, examining its dual nature as a force for constructive societal change as well as a potential source of destructive consequences. To examine these two facets in detail, the book scrutinizes the interplay between individual actions and institutional frameworks, showing how entrepreneurship can drive economic and social progress or hinder it through rent-seeking behaviors and exploitation of institutional gaps. By analyzing various settings from capitalist to state-controlled economies, the book highlights the role of the rules of the game in determining whether entrepreneurial activities contribute positively to society or perpetuate inequality and inefficiency. As such, in the context of emerging markets, this book addresses the question of when are entrepreneurial activities constructive and when are they destructive. Through a nuanced examination of diverse economic settings and institutional environments, the book illuminates how entrepreneurship can foster innovation and social value while also perpetuating corruption and inefficiency. By integrating theoretical frameworks with empirical evidence, it provides a comprehensive analysis of the factors influencing both productive and destructive entrepreneurial behaviors. The aim is to deepen readers' understanding of how entrepreneurship interacts with various contexts and to advocate for ethical and socially responsible practices, ultimately inviting contemplation on the challenges and opportunities that arise in the evolving landscape of entrepreneurship. As such, this book is a valuable resource for scholars studying these phenomena but also practitioners and policymakers alike.

Research Methods in Education Louis Cohen, Lawrence Manion, Keith Morrison, 2017-10-12. This thoroughly updated and extended eighth edition of the long-running bestseller *Research Methods in Education* covers the whole range of methods employed by educational research at all stages. The Physical Environment and Behavior Joachim F. Wohlwill, Gerald D. Weisman, 2012-12-06 The field of Environment and Behavior This bibliography is aimed at the researcher and advanced student working in the field of environmental psychology as it has come to be designated over the past decade A more appropriate term might be environment behavior studies to suggest the important characteristic of this field as one that transcends the province of the psychologist and brings together workers as well as problems methods and concepts from a great diversity of disciplines and professional fields Among these we may include geography and sociology architecture landscape architecture and planning forestry natural resource management and leisure and recreation research to name only the most important of the diverse fields from which material for this bibliography has been drawn This is in fact one of the primary reasons for our belief in the value of such a volume The literature in the environment behavior field is scattered through the most diverse sources including not only the major periodical and monographic literature in each of the above mentioned disciplines and professions and others as well but also a variety of more specialized publications of varying degrees of accessibility Thus it seemed to us helpful to the researcher teacher and student in this area to bring this far flung literature together in a single volume that might be used as a guide to the field We aimed at a comprehensive treatment including both basic and applied aspects and relations of behavior both to the man made or artificial and to the natural environment

People and Environment D.J. Walmsley, G.J. Lewis, 2014-09-19 First published in 1994 This book comprises a second edition of Human Geography behavioural approaches first published in 1984 The first edition attempted to synthesize the massive volume of geographical literature to have appeared mainly since 1960 concerned with both how people come to know the environment in which they live and with the way in which such knowledge influences subsequent spatial behaviour As with the first edition the rationale for advantages of and shortcomings with behavioural approaches are explored at length in both substantive chapters and in a number of detailed examinations of particular aspects of life in advanced Western society

The Roots of Metaphor Norman Kreitman, 2019-05-23 First published in 1999 this study begins with a review of basic biological functions stressing the importance to the organism of various kinds of information The biology of information must consider how the brain reacts to new as contrasted with expected inputs these differences are discussed chiefly in relation to language In language processing predictability is of prime importance but to clarify what this entails it is necessary to consider just how our concepts are organized Personal construct theory throws considerable light on this question but is less informative about fantasy which requires separate exploration The main chapter focuses on the origins and interpretation of metaphor in which quite disparate concepts are united but which we understand nevertheless Existing theories of metaphor are unsatisfactory but personal construct theory again helps resolve the psychological linguistic issues

Finally the question is raised as to why a good metaphor produces a response which is recognizably aesthetic in character and its implications for our aesthetic responses to other art forms are explored

Observation Oriented Modeling James W. Grice, 2011-05-17 This book introduces a new data analysis technique that addresses long standing criticisms of the current standard statistics Observation Oriented Modelling presents the mathematics and techniques underlying the new method discussing causality modelling and logical hypothesis testing Examples of how to approach and interpret data using OOM are presented throughout the book including analysis of several classic studies in psychology These analyses are conducted using comprehensive software for the Windows operating system Describes the problems that statistics are meant to answer why popularly used statistics often fail to fully answer the question and how OOM overcomes these obstacles Chapters include examples of statistical analysis using OOM

Trauma, Survival and Resilience in War Zones David Winter, Rachel Brown, Stephanie Goins, Clare Mason, 2015-10-16 This book based upon a series of psychological research studies examines Sierra Leone as a case study of a constructivist and narrative perspective on psychological responses to warfare telling the stories of a range of survivors of the civil war The authors explore previous research on psychological responses to warfare while providing background information on the Sierra Leone civil war and its context Chapters consider particular groups of survivors including former child soldiers as well as amputee footballers mental health service users and providers and refugees Implications of the themes emerging from this research are considered with respect to how new understandings can inform current models of trauma and work with its survivors Amongst the issues concerned will be post traumatic stress and post traumatic growth resilience mental health service provision perpetration of atrocities and forgiveness The book also provides a critical consideration of the appropriateness of the use of Western concepts and methods in an African context Drawing upon psychological theory and rich narrative research *Trauma Survival and Resilience in War Zones* will appeal to researchers and academics in the field of clinical psychology as well as those studying post war conflict zones
