Colour Measurement in Industry Symposium on Colour Measurement in Industry. 1967, London, 1968 Color Measurement, 1996 Color Measurement D.L. MacAdam, 2013-11-11 Color is attractive and interesting to everyone Consequently control of color is important to all producers buyers sellers and users of colored materials In various ways color is an indication of freshness quality or other desirable or undesirable characteristics of goods To assure acceptability saleability and favorable price especially in contracts and monitoring of conformance to specifications numerical expression of color is greatly superior to verbal descriptions Disagreements concerning words or visual comparisons with samples are all too likely and frequent Such disagreements underlie much unpleasantness and loss in commerce in consumer goods Such loss of money and good will must amount to billions of dollars per year world wide Persistent efforts to substitute measurements of color for visual judgment have marked the twentieth century Because visual perception of small color differences is so acute the requirements for accuracy and world wide reproducibility of color measurements have been severe Only during the last half century have practical spectrophotometers with adequate accuracy been available

Quality Attributes and their Measurement in Meat, Poultry and Fish Products A. M. Pearson, 2013-11-09 The theme for this volume was chosen because no previous book has discussed the quality attributes of meat poultry and fish and the methods that can be utilized for their measurement The topics are not only timely but of great importance Chapter 1 provides an introduction to the topic and presents a brief overview of the subject to be discussed The next two chapters review information on the importance of color and some color problems in muscle foods and explains the basis of color vision and perception of color before describing the methods that may be used for its measurement The following chapter discusses water binding and juiciness and their importance while Chapter 5 provides the first intensive modern review on measurement of juiciness that has been published to the knowledge of the author and editors Chapter 6 reviews the physiology and psychology of flavor and aroma which serves as a background for further discussion on the flavor and aroma of foods The next chapter discusses the chemistry of flavor and aroma in muscle foods while measurement of flavor and aroma are covered in Chapter 8 Chapter 9 reviews the species specific meat flavors and aromas Chapter 10 reviews some flavor and aroma problems in muscle foods and their measurement
