Measurement and Meaning Ferenc Csátri, 2019-11-20

Measurement and Meaning takes stock of the most important projects in the conceptual grounding of measurement from early representational theories through the axiomatic approach to operationalism Ferenc Csátri thoroughly analyzes the relevant philosophical issues and identifies the controversial points in these accounts Meanwhile he pays special attention to the peculiarities of measurement in the social sciences As long as measurement is conceived as an assignment of numerical structures to represent properties as traditionally done one might feel obliged to account for continuum errors and truth Csátri puts these key concepts under scrutiny and arrives at a non trivial constructive interpretation for each On these new conceptual grounds the active quest for congruence in phenomena will be the key to establishing meaningful measurement procedures

Unsettled Technology Domains in Industrial Metrology Jody E. Muelaner,2019-09-27 Within manufacturing measurements are used to make decisions related to product verification and process control The selection of production machines and instruments involves a trade off to achieve the required accuracy while minimizing cost Similarly deciding on the level of confidence at which products are rejected is a trade off between the cost of rejecting acceptable parts and the cost of passing substandard products to the customer These trade offs can only be optimized if the uncertainties are fully understood Currently multiple methodologies are used to understand uncertainties and variation within manufacturing such as measurement systems analysis MSA statistical process control SPC and uncertainty evaluation The industry lacks a unified approach that provides a complete understanding of uncertainty This means that optimal decisions cannot be made to maximize the profitability of production systems NOTE SAE EDGE Research Reports are intended to identify and illuminate key issues in emerging but still unsettled technologies of interest to the mobility industry The goal of SAE EDGE Research Reports is to stimulate discussion and work in the hope of promoting and speeding resolution of identified issues SAE EDGE Research Reports are not intended to resolve the issues they identify or close any topic to further scrutiny Click here to access the full SAE EDGETM Research Report portfolio <https://doi.org/10.4271/EPR2019003>
