**Predictive Sentencing** Jan W de Keijser, Julian V Roberts, Jesper Ryberg, 2019-05-16 Predictive Sentencing addresses the role of risk assessment in contemporary sentencing practices Predictive sentencing has become so deeply ingrained in Western criminal justice decision making that despite early ethical discussions about selective incapacitation it currently attracts little critique Nor has it been subjected to a thorough normative and empirical scrutiny This is problematic since much current policy and practice concerning risk predictions is inconsistent with mainstream theories of punishment Moreover predictive sentencing exacerbates discrimination and disparity in sentencing Although structured risk assessments may have replaced gut feelings and have now been systematically implemented in Western justice systems the fundamental issues and questions that surround the use of risk assessment instruments at sentencing remain unresolved This volume critically evaluates these issues and will be of great interest to scholars of criminal justice and criminology

*Assessing the Youthful Offender* Robert D. Hoge, D.A. Andrews, 2013-06-29 Our society's preoccupation with crime and fear of crime appears to have shifted its focus to the juvenile offender Both electronic and print media continuously warn us that juvenile offenders are increasingly younger and more virulent The demographics of our population suggest that there will only be more juvenile offenders to fear in the near future All of these concerns arise in a social climate that is characterized by an ever increasing demand for stronger retributive measures against the offender The belief that only harsh justice will protect us from the ravages of juveniles has become dominant Increasingly perceptions and politics rather than scientific data dominate policy making with regard to youthful offenders In *Assessing the Youthful Offender* Issues and Techniques Robert D Hoge and D A Andrews make a restrained rational and ultimately persuasive argument for the use of standardized psychological assessments in the effective management of youth within juvenile justice systems They clarify how what we already know about the cause and management of youthful criminal activity can be incorporated into standardized testing and that the information obtained from testing can improve the administration of criminal justice Moreover this information is useful whatever the theoretical biases of those who administer the justice system The efficiency of policies of either retribution deterrence or rehabilitation is only enhanced by reliance on data

Offender Rehabilitation in Practice Gary A. Bernfeld, David P. Farrington, Alan W. Leschied, 2003-01-10 Documented evidence suggests that

community safety is best achieved through policies promoting human services rather than relying totally on prisons and that promoting intervention in an individual's own environment known as ecological integrity is closely associated with effective intervention. Dangerous Offenders Mark Brown, John Pratt, 2002-01-04. This highly controversial new book considers how the dangerous offender has become such a figure of collective anxiety for the citizens of rationalised Western societies. The authors consider ideas of danger and social threat in historical perspective, legal responses to violent criminals, attempts to predict dangerous behaviour, why particular groups such as women remain at risk from violent crime. This inspired collection invites us to rethink the received wisdom on dangerous offenders and will be of interest to students and scholars in the fields of criminology and the sociology of Risk.

Physical Abusers and Sexual Offenders Scott Allen Johnson, 2006-07-13. Until recently professionals in both investigation and treatment have considered the fields of sexual violence and domestic abuse as separate and distinct. Numerous studies have shown however that these fields may not be so neatly pigeonholed as once believed. Statistics indicate that there is an overlap in both the level and type of violence experienced.

Criminal Recidivism Georgia Zara, David Farrington, 2015-07-24. Criminal Recidivism intends to fill a gap in the criminological psychology literature by examining the processes underlying persistent criminal careers. This book aims to investigate criminal recidivism and why, how and for how long an individual continues to commit crimes whilst also reviewing knowledge about risk assessment and the role of psychopathy including neurocriminological factors in encouraging recidivism. It also focuses on the recidivism of sex offenders and on what works in reducing reoffending. At an empirical level this book attempts to explain criminal persistence and recidivism using longitudinal data from the Cambridge Study in Delinquent Development (CSDD). At a psycho criminological level it joins together quantitative and qualitative analyses making its content a practical guide to explain, predict and intervene to reduce the risk of criminal recidivism. The authors present quantitative analyses of criminal careers as well as qualitative life histories of chronic offenders in order to bring home the reality and consequences of a life of crime.
