Measuring And Apportioning Rents From Hydroelectric:

Measuring and Apportioning Rents from Hydroelectric Power Developments Mitchell P. Rothman, 2000-01-01
Hydro resources are provided by nature The exploitation of such resources can generate significant economic rent to the owners In the past governments have usually claimed ownership of hydroelectric resources and passed on the rents to their state owned utilities which have used them to expand their systems or provide lower tariffs to their consumers With the restructuring of the electric power sector in many countries a more explicit consideration of hydroelectric rents is required Moreover hydropower resources are often owned by more than one party or at least require cooperation between parties to develop them In this context the measurement and apportionment of hydropower rents between cooperating parties becomes important This paper addresses some of the issues involved in cooperative development of water resources especially for hydroelectric generation It promotes a better understanding of the sources of the benefits and attempts to derive an analytical basis for discussions between cooperating parties This volume will be of interest to hydropower resource earning countries hydropower developers and Bank staff

The Changing Wealth of Nations 2021 World Bank, 2022-01-26 It is now clear that a narrow focus on the growth of gross domestic product GDP is insufficient to achieve humanity s aspirations for sustainable prosperity Well functioning ecosystems and educated populations are requisites for sustainable well being These and other too often neglected ingredients of national wealth must be addressed if the development path is to be sustainable The Changing Wealth of Nations 2021 Managing Assets for the Future provides the most comprehensive accounting of the wealth of nations an in depth analysis of the evolution of wealth and pathways to build wealth for the future This report and the accompanying global database firmly establishes comprehensive wealth as a measure of sustainability and a key component of country analytics It expands the coverage of wealth accounts and improves our understanding of the quality of all assets notably natural capital Wealth the stock of produced natural and human capital is measured as the sum of assets that yield a stream of benefits over time Changes in the wealth of nations matter because they reflect the change in countries assets that underpin future income Countries regularly track GDP as an indicator of their economic progress but not wealth and national wealth has a more direct and long term impact on people s lives This report provides a new set of tools and analysis to help policy makers navigate risks and to guide collective action Wealth accounts can be applied in macroeconomic analysis to areas of major policy concern such as climate change and natural resource management This report can be used to look beyond GDP to gauge nations economic well being and to promote sustainable prosperity

Integrated Reporting Samuel O. Idowu, Mara Del Baldo, 2019-01-04 This book critically examines the implementation and adoption of integrated reporting IR in organizations and corporations A relatively new area of policy and practice IR has rapidly gained considerable prominence since the formation of the International Integrated Reporting Committee in 2010 The book analyzes the outcomes and benefits as well as the shortfalls of integrated reporting It offers an introduction to the

foundations of IR and a comprehensive overview of its use through a number of detailed case studies. Lastly, it discusses the outlook for further developments in sustainability accounting and reporting.

Needs and Barriers of Prosumerism in the Energy Transition Era Lucia Ruggeri, 2021-03-05

The effective enforcement of energy transition is one of the keys to the successful fight to climate change. The interplay between the sustainable UN Agenda 2030 goals is a new interesting ground for the development of intersectorial and multidisciplinary studies. Thanks to University of Camerino which is focused on the contamination between different scientific areas and really engaged in strengthening international research, a group composed by more than forty researchers of ten different nationalities is studying the energy policies and the new phenomenon of energy prosumerism. This book is the first direct result of the research activities granted by University of Camerino under the Programme FAR 2019 in the ECPE Project Enabling Consumer to become Prosumer in the Energy transition era. More details about the project ECPE are available at <https://ecpe.unicam.it>. The object of this book is to collect and analyze the main barriers to self consumption and prosumerism. Difficult as it is to discuss all obstacles in a single volume, the book focuses on selected barriers which impede the development of new types of fossil free energy production and consumption. The energy communities could play a central role in the implementation of the energy transition strategies, but legal, social, economic, political, and cultural barriers can hinder their spread. To analyze the barriers and to find how to eliminate the obstacles to energy transition policies is pivotal to enhance research activities focused on the new EU Regulatory framework. Most in general, it is crucial a multidisciplinary approach focused on the fight to climate change and the implementation of sustainable development. In this book, several articles which offer a different perspective on the energy transition barriers from different points of view and under different methodologies are collected. The book is composed of four parts. The first one is dedicated to the analysis of the methodology and the results offered by questionnaires supplied online in two languages: Italian and English. The survey is the basis of the Working Paper which is the deliverable of the ECPE Work Programme n. 2 and which constitutes the ground for a discussion into the research group. The second part of the volume collects the contributions focused on the social and economic barriers to prosumerism, while the third one is dedicated to a description of failure cases of self consumption. Lesson learned by failure experiences in the world could favour a good implementation of the new EU Directive Renewable Energy Directive 2018/2001 RED II and Directive on common rules for the internal market for electricity 2019/944 IEM in Italy, an European Country which is strategic in the Energy policy of the Mediterranean area. The last part of the book is composed of the visions and perspectives offered by Italian testimonials engaged as actors in the new energy market with different roles. I am grateful for the generous support given by the editorial staff composed by Gopi Battinemi, Roberto Garetto, Federico Pascucci, Giovanni Russo, and Karina Zabrodina, precious collaborators and valid researchers. Thanks also to the Scientific Committee which honoured our work: Marine Cornelis, Francisco Lled Yag e, and Luis E. Quintero. As editor, I am sure you will appreciate the volume which

would like to offer an insight on new issues and challenges offered by the energy transition era Principles of Solar Gas Turbines for Generating Electricity Amos Madhlopa, Richard Nkhoma, 2025-07-19 This book now in its second expanded and updated edition is dedicated to solar gas turbines providing fundamental knowledge and state of the art developments in the field A gas turbine is a heat engine in which a mixture of fuel and air is burned in a chamber that is an integral part of the flow circuit of the working fluid The burnt gas mixture expands and turns the turbine which can be connected to a generator for electricity production Solar gas turbines offer an important alternative to conventional gas turbines driven by non renewable polluting fossil fuels such as diesel or natural gas The book provides a comprehensive overview of the topic as well as numerous illustrations The second edition provides step by step linchpins from fundamentals to advanced concepts of solar gas turbines The book features methods of designing and testing of this green technology It includes economic and environmental considerations of solar gas turbines that are crucial for sustainable energy production In addition worldwide case studies on the development of solar gas turbines are presented in this book and each chapter contains worked examples

Principles of Solar Gas Turbines for Electricity Generation Amos Madhlopa, 2018-05-11 This is the first book dedicated to solar gas turbines providing fundamental knowledge and state of the art developments in the field A gas turbine is a heat engine in which a mixture of fuel and air is burned in a chamber that is an integral part of the flow circuit of the working fluid The burnt gas mixture expands and turns the turbine which can be connected to a generator for electricity production Solar gas turbines offer an important alternative to conventional gas turbines driven by non renewable polluting fossil fuels such as diesel or natural gas The book provides a comprehensive overview of the topic as well as numerous illustrations **The Petroleum and Poverty Paradox** ,2008 **Historical Dictionary of the World Bank** Sarah

Tenney, Anne C. Salda, 2013-10-30 When it was founded back in 1944 no one could possibly have foreseen how the World Bank known more formally as the International Bank for Reconstruction and Development IBRD would flourish Today with 188 members it is by far the largest lender for projects in agriculture health infrastructure and many other fields in developing countries around the world with a budget of billions of dollars and a staff of more than 9 000 and its advice is usually heeded by both the developing countries which borrow from it and the advanced ones which contribute This second edition of the Historical Dictionary of the World Bank shows the substantial progress the Bank has made this mainly through the dictionary section with concise entries on its component institutions related organizations its achievements in various fields some of the major projects and member countries and its various presidents The introduction explains how the Bank works while the chronology traces the major events over nearly 70 years Meanwhile the list of acronyms reminds us just who the main players are And the bibliography directs readers to useful internal documentation and outside studies

Cross-border Water Trade: Legal and Interdisciplinary Perspectives Piotr Szewdo, 2018-11-12 Cross border Water Trade Legal and Interdisciplinary Perspectives is a critical assessment of one of the growing problems faced by the

international community the global water deficit Cross border water trade is a solution that generates ethical and economic but also legal challenges Economic humanitarian and environmental approaches each highlight different and sometimes conflicting aspects of the international commercialization of water Finding an equilibrium for all the dimensions required an interdisciplinary path incorporating certain perspectives of natural law The significance of such theoretical underpinnings is not merely academic but also quite practical with concrete consequences for the legal status of water and its fitness for international trade

Mountains: Sources of Water, Sources of Knowledge Ellen Wiegandt,2007-12-20 This book addresses the major challenges in assuring globally sustainable water use It examines critical contemporary and global issues through the lens of global change processes and with a focus on mountain regions In doing so it aims to bring state of the art science from numerous disciplines to bear on important environmental and policy questions related to water resources The volume will be a boon to a range of readers from environmental scientists to hydrologists

India - Social Development Report 2008 Hari Mohan Mathur,2008 There are groups who oppose development projects that displace people from their lands and livelihoods and demand that such projects should not be undertaken While this demand is unrealistic the concern to save people is legitimate The real issue then is to undertake development in a way that ensures minimum disruption and helps those relocated to share its benefits This report thus shows the way forward and emphasizes the need to adopt credible policies that minimize displacement properly compensate those relocated to make development possible and give them a permanent stake in project benefits Besides these it takes stock of issues like poverty unemployment health local government and decentralization child labour and how women fare across social indices

Complete with a social development index which ranks Indian states this report will be a useful primary source and research tool

Can Compensation Prevent Impoverishment? Michael M. Cernea,Hari Mohan Mathur,2008 Can Compensation Prevent Impoverishment contributes significantly to the international public debate on development caused displacement and resettlement The book rejects the long held thesis that compensation is in itself enough to restore and improve the livelihoods disrupted by displacement Instead the authors of this volume a group of the world's best known resettlement scholars sociologists anthropologists economists ecologists and legal experts recommend changing displacement policies

laws and practices by adding investment financing and ex post benefit sharing to full compensation Can Compensation Prevent Impoverishment comes at a time when those displaced are increasingly opposing impoverishment by forced displacement Their voices argue the authors speak of basic needs and human rights and must be heard **Electronic Finance** Stijn Claessens,Thomas C. Glaessner,Daniela Klingebiel,2002-01-01 Technological developments in electronic finance have changed the nature and delivery of financial services in recent years especially through the use of online banking online trading and brokerage services This report reviews the developments in e finance and analyses the implications for consumers financial service providers and governments Issues discussed include the impact on competition within the financial services industry how financial sector policies in emerging markets are affected public policy and regulatory requirements **Fostering Competition in China's Power Markets** Noureddine Berrah,Ranjit Lamech,Jianping Zhao,2001-01-01 This book compares the recent evolution of the structure of inputs and expenditure in Armenia s general education with international norms and practice In the context of the government s sectoral reform strategy it also outlines various proposals for restructuring the system The purpose of this study is to clarify what the inefficiencies might mean for future costs and performance of the system highlight the trade offs involved and identify measures needed to overcome constraints to rationalization Environmental Health James A. Listorti,Fadi M. Doumani,2001-01-01 Environmental health remains at the periphery of sustainable development because it is inadequately defined and institutionally fragmented This publication aims to provide ways of addressing this multisectoral problem It is in three parts The first looks at harmonising sectoral priorities and shows that environmental health can target at least as much disease as the health sector The second part provides environmental health assessment guidelines The third part looks at the results of a pilot project to put theory into practice in Ghana Managing the Real and Fiscal Effects of Banking Crises Daniela Klingebiel,Luc Laeven,2002 This volume provides two recent analyses of government responses to financial crises they have been developed in the light of the recent East Asian crisis but also draw on experiences from other regions Issues discussed relate to the tradeoffs involved in public policies for systemic financial and corporate sector restructuring and the use of cross country evidence to determine whether specific crisis containment and resolution policies effect the fiscal costs of resolving a crisis The book also presents information on 113 systemic banking crises that have occurred in 93 countries since the 1970s as well as 50 borderline or non systemic banking crises in 44 countries during the same period **Facets of Globalization** Shahid Yusuf,Simon J. Evenett,Weiping Wu,2001-01-01 Since 1985 national economies have become increasingly integrated into a global network At the same time both population and production in developing countries are becoming concentrated in urban regions This in turn has generated demands for more local autonomy shifting more decision making to sub national levels Globalization is expected to continue leading to greater openness and international mobility of capital and people There are few reasons to believe that these trends will abate if anything they are likely to intensify the

focus on cities and sharpen competition among these for international and local resources This volume underscores the transformative role of globalization and urbanization and shows the interplay between the two forces

Financing of Private Hydropower Projects Chris R. Head, 2000-01-01 Concerns about global warming and the availability of clean renewable sources of energy are increasing However as private companies take over state power utilities the demand for profit has stifled those concerns Currently the private sector is building over 40 megawatts of fossil fuel thermal plants for each new megawatt of hydropower This report examines the reasons for building fewer hydropower plants and looks at ways to eliminate some of the drawbacks It studies ten privately financed hydro schemes which represent all but the smaller projects likely to be considered for private financing in the future The projects are located in five countries where the power sector is at different stages of maturity and deregulation They include multi and single purpose projects intended for both domestic supply and export
