Measuring Global Values The Ranking Of 162 Countries:

Measuring Global Values Michael J. Sullivan, 1991-07-18 Measuring Global Values is a major book that represents an enormous research effort. The book enables careful and systematic comparisons over time and across space as to whether a society is improving or losing ground. It provides world order scholars with a fully elaborated framework for future research. Sullivan's book is certain to be the foundational work for future developments relating to normative assessment. Richard Falk, Princeton University. This volume profiles 162 countries using as a basis for comparison more than a hundred indicators measuring how each country reflects 5 global values: peace, economic well-being, ecological balance, social justice, and political participation. The use of data-based management software systems for the collection of information results in a broad-based analysis which yields thoroughly documented conclusions and affirms the five values as appropriate evaluative tools. Introductory material outlines the methods used in the study, defines the measurement criteria, and identifies the study's objectives. Each of the five subject areas is then addressed separately, its findings supported by numerous tables and excerpts, and its data supplemented by a bibliography at the end of each chapter. Students of political science as well as global policy scholars will consider this unique application of current technology to the examination of global values a significant contribution to literature on the subject.

In addition, this edition is the first to feature substantial coverage of electronic resources, both databases and Internet sites. An Introduction to the Causes of War Greg Cashman,Leonard C. Robinson,2007-03-01 This pioneering book explains the causes of war through a sustained combination of theoretical insights and detailed case studies Using the major theories of international conflict as a guide to examine contemporary examples of the outbreak of war Cashman and Robinson find that while all wars have multiple causes these factors typically combine in identifiable dangerous patterns In assessing and comparing these patterns this is the only undergraduate text to systematically join detailed case studies to the theories and empirical research carried out by political scientists on the causes of war Through the examples of World War I World War II in the Pacific the Six Day War the Indo Pakistani War of 1971 the Iran Iraq War and the Iraq War of 2003 the authors uncover the complex multilevel processes by which disputes between countries evolve into bloody conflicts They emphasize the importance of escalation through conflict spirals between rival countries They also point out the links between war and territorial disputes the underappreciated role of the domestic political environment especially internal political instability and the importance of crucial misperceptions by national leaders The authors identify specific patterns in which disputes escalate the classic rivalry spiral the domestic instability spiral and complex spirals They also find that wars between states of unequal power follow a starkly different pattern than wars between relative equals Ideal for a range of courses in international relations this focused text clearly explains theory and applies it to concrete examples in a way that allows students to fully understand the origins of war Added Case Study Ethiopian Eritrean War

The Peace Continuum Christian Davenport,Erik Melander,Patrick M. Regan,2018-06-12 The idea of studying peace has gained considerable traction in the past few years after languishing in the shadows of conflict for decades but how should it be studied The Peace Continuum offers a parallax view of how we think about peace and the complexities that surround the concept i e the book explores the topic from different positions at the same time Toward this end we review existing literature and provide insights into how peace should be conceptualized particularly as something more interesting than the absence of conflict We provide an approach that can help scholars overcome what we see as the initial shock that comes with unpacking the zero in the war peace model of conflict studies Additionally we provide a framework for understanding how peace and conflict have have not been related to one another in the literature To reveal how the Peace Continuum could be applied we put forward three alternative ways that peace could be studied With this approach the book is less trying to control the emerging peace research agenda than it is trying to assist in encourage thinking about the topic that we all have some opinion on but that has yet to be measured and analyzed in a way comparable to political conflict and violence Indeed we attempt to help facilitate a veritable explosion of approaches and efforts to study peace

Globally Speaking Judith Rosenhouse,Rotem Kowner,2008-05-22 This volume accounts for the motives for contemporary lexical borrowing from English using a comparative approach and a broad cross cultural perspective It investigates the processes involved in the penetration of English vocabulary into new environments and the extent of their integration into twelve languages representing several language families including Icelandic Dutch French Russian Hungarian Hebrew Arabic Amharic Persian Japanese Taiwan Chinese and several languages spoken in southern India Some of these languages are studied here in the context of borrowing for the first time ever All in all this volume suggests that the English lexical invasion as it is often referred to is a natural and inevitable process It is driven by psycholinguistic

sociolinguistic and socio historical factors of which the primary determinants of variability are associated with ethnic and linguistic diversity *Political Institutions and Public Policy* B. Steunenberg, F. van Vught, 2012-12-06 The discipline of public administration and public policy is experiencing a renaissance of research in which explicit attention is paid to political institutions This renewed interest in institutions is not simply an extension of the classical paradigm in the study of public administration which peaked in the 1920s and 1930s but offers a new orientation on political institutions While classical institutionalism is known for its focus on the formal structures of the executive branch of government the new institutionalism concentrates on the interaction between political institutions and the behavior of policy makers This interaction which until recently was largely neglected in public administration and public policy forms the basic theme of this volume To advance the study of political institutions two rather basic problems need to be addressed What are institutions and what are adequate ways to analyze them We briefly discuss both questions which determine the structure of this book

Ersson, 2002-01-01

Globalization is a common theme in the discourse of post industrial society yet it is a process that is ill understood Is it basically a technological phenomenon or does its immense impulse derive from economic factors Should it be regulated by government and at what level Questions such as these are debated continuously in the mass media yet there are no simple answers available as globalization is not only an amorphous but also a contested phenomenon **Government and the Economy** is a completely reworked edition of Jan Erik Lane and Svante Ersson s popular text **Comparative Political Economy** which the authors have updated for the twenty first century They present a profound analysis of how globalization changes the boundaries between state and market public and private and government and society When the state retreats and markets expand what are the major outcomes And what is driving this process of redefining the roles of government and the tasks of society The book offers a penetrating survey of the differences between the countries of the world in terms of their economy and polity and a forceful critique of the prevailing models in political economy Lane and Ersson look closely at Public Choice theories which emphasize the role of markets in accomplishing efficient solutions to human interaction while modeling governments as enhancing state failure They argue that such accounts are misguided The need for government in the global market economy is as strong as it is in relation to the domestic economy They go on to suggest that the most efficient and equitable means of strengthening government in the global market place without creating one world government is the reform and empowerment of IGOs **Women in the Middle East and North Africa** E.

Haghighat-Sordellini, 2010-08-18 This book explores the complexity of women s social status in the Middle East and North African region and fills a gap in the existing literature by providing an up to date and comprehensive portrait of women s status from a theoretical and socio demographic perspective **Waiting for the Millennium** J. Majumdar, 2000 **Environmental Rights** Steve Vanderheiden, 2017-07-05 The essays selected for this volume present

critical viewpoints from the debate about the need to establish rights on behalf of greater environmental protection Three main areas for developing environmental rights are surveyed including extensionist theories that link existing rights for example to subsistence or territory to threats of harm from exacerbated resource scarcity pollution or rapid environmental change proposals for rights to specified environmental goods or services such as rights to a safe environment and the capacity to assimilate greenhouse gas emissions and rights that protect the interests of parties not currently recognized as having rights including nonhuman subjects natural objects and future generations This volume captures the potential for and primary challenges to the development of rights as instruments for safeguarding the planet s life support capacities and features proposals and analyses which argue the need to create an avenue of recourse against ecological degradation whether on behalf of human or nonhuman right holders

The Challenge of Institutionalizing Civilian Control

Boubacar N'Diaye, 2001-01-01 Assessing three of the most enduring civilian regimes in Africa Botswana Kenya and until the December 1999 coup the Ivory Coast Boubacar N Diaye focuses on the role of civilian regimes in the institutionalization of civilian control The author warns that only government legitimacy and a culture of genuine military professionalism are likely to assure civilian control of the military N Diaye calls for a bold conceptual shift in the study of African civil military relations away from expedient short term coup avoidance Refreshingly his study emphasizes the policies regimes enact instead of the structures of African societies or the personal idiosyncrasies of leaders This book has important implications not only for understanding the causes and outcomes of coups in Africa but also for the study of emerging democracies everywhere
