Personhood and Social Robotics Raya A Jones, 2015-12-14 An exponentially growing industry human robot interaction HRI research has drawn predominantly upon psychologists descriptions of mechanisms of face to face dyadic interactions This book considers how social robotics is beginning unwittingly to confront an impasse that has been a perennial dilemma for psychology associated with the historical science vs art debate Raya Jones examines these paradigmatic tensions and in tandem considers ways in which the technology centred discourse both reflects and impacts upon understanding our relational nature Chapters in the book explore not only how the technology centred discourse constructs machines as us but also how humans feature in this discourse Focusing on how the social interaction is conceptualised when the human robot

interaction is discussed this book addresses issues such as the long term impact on persons and society authenticity of relationships and challenges to notions of personhood By leaving aside terminological issues Jones attempts to transcend ritual of pitching theories against each other in order to comprehensively analyse terms such as subjectivity self and personhood and their fluid interplay in the world that we inhabit Personhood and Social Robotics will be a key text for postgraduate students researchers and scholars interested in the connection between technology and human psychology including psychologists science and technology studies scholars media studies scholars and humanists The book will also be of interest to roboticists and HRI researchers as well as those studying or working in areas of artificial intelligence and interactive technologies more generally Bibliographic Service for the Journal of Morphology, the Journal of Comparative Neurology, the American Journal of Anatomy, the Anatomical Record, the Journal of Experimental Zoology, the American Anatomical Memoirs ...
