Reginald Joseph Stephenson, 1975-10-01 **Thermal Properties of Matter** Joe Khachan, 2018-02-20 The ancient Greeks
believed that all matter was composed of four elements earth water air and fire By a remarkable coincidence or perhaps not
today we know that there are four states of matter solids e g earth liquids e g water gasses e g air and plasma e g ionized gas
produced by fire The plasma state is beyond the scope of this book and we will only look at the first three states Although on
the microscopic level all matter is made from atoms or molecules everyday experience tells us that the three states have very
different properties The aim of this book is to examine some of these properties and the underlying physics *Properties of*
