Mechanism Of Human Facial Expression:

The Mechanism of Human Facial Expression Guillaume-Benjamin Duchenne, 1990-07-27 In *Mecanisme de la physionomie humaine* the great nineteenth century French neurologist Duchenne de Boulogne combined his intimate knowledge of facial anatomy with his skill in photography to produce a fascinating interpretation of the ways in which the human face portrays emotions Here Andrew Cuthbertson provides an English translation complete with a reproduction of the marvellous Album of photographs

The Mechanism of Human Facial Expression G. -B. Duchenne de Boulogne, 2006-11-02 In *Mecanisme de la Physionomie Humaine* the great nineteenth century French neurologist Duchenne de Boulogne combined his intimate knowledge of facial anatomy with his skill in photography and expertise in using electricity to stimulate individual facial muscles to produce a fascinating interpretation of the ways in which the human face portrays emotions This book was pivotal in the development of psychology and physiology as it marked the first time that photography had been used to illustrate and therefore prove a series of experiments Duchenne's book which contained over 100 original photographic prints pasted into an accompanying Album was rare even when it first appeared in 1862 Duchenne was a superb clinical neurologist and in this study he applied his enormous experience in neurological research to the question of the mechanism of human facial expression Duchenne has been little cited and little known in this century his book has been virtually unobtainable and copies are available in only a few libraries in the United States and Europe

Death by Laughter Maggie Hennefeld, 2024-03-19 Can you really die from laughing too hard Between 1870 and 1920 hundreds of women suffered such a fate or so a slew of sensationalist obituaries would have us believe How could laughter be fatal and what do these reports of women's risible deaths tell us about the politics of female joy Maggie Hennefeld reveals the forgotten histories of hysterical laughter exploring how women's amusement has been theorized and demonized suppressed and exploited In nineteenth century medicine and culture hysteria was an ailment that afflicted unruly women on the cusp of emotional or nervous breakdown Cinema Hennefeld argues made it possible for women to laugh outrageously as never before with irreversible social and political consequences As female enjoyment became a surefire promise of profitability alarmist tales of women laughing themselves to death epitomized the tension between subversive pleasure and its violent repression Hennefeld traces the social politics of women's laughter from the heyday of nineteenth century sentimentalism to the collective euphoria of early film spectatorship traversing contagious dancing outbreaks hysteria photography madwomen's cackling cinematic close ups and screenings of slapstick movies in mental asylums Placing little known silent films and an archive of remarkable often unusual texts in conversation with affect theory comedy studies and feminist film theory this book makes a timely case for the power of hysterical laughter to change the world

About Face Jonathan Cole, 1999-02-18 What is special about the face and what happens when neurological conditions make expression or comprehension of the face unavailable Through a mix of science autobiography case studies

and speculation Jonathan Cole shows the importance not only of facial expressions for communication among individuals but also of facial embodiment for our sense of self He presents in his words a natural history of the face and an unnatural history of those who live without it The heart of the book lies in the experiences of people with facial losses of various kinds The case studies are of blind autistic and neurologically impaired persons the most extreme case involves Mobius syndrome in which individuals are born with a total inability to move their facial muscles and hence to make facial expressions Cole suggests that it is only by studying such personal narratives of loss that we can understand facial function and something of what all our faces reflect Human Facial Expression Alan J. of the Medical Image , 2021-09-27 This volume addresses the interdependencies between visual technologies and epistemology with regard to our perception of the medical body It explores the relationships between the imagination the body and concrete forms of visual representations Ranging from the Renaissance paradigm of anatomy to Foucault's birth of the clinic and the institutionalised construction of a medical gaze from visual archives of madness psychiatric art collections the politicisation and economisation of the body to the post human in mass media representations Contributions to this volume investigate medical bodies as historical technological and political constructs constituted where knowledge formation and visual cultures intersect Contributors are Axel Fliethmann Michael Hau Birgit Lang Carolyn Lau Heikki Lempa Stef Lenk Joanna Madloch Barry Murnane Jill Redner Claudia Stein Elizabeth Stephens Corinna Wagner and Christiane Weller

Orgasmology Annamarie Jagose, 2012-12-24 For all its vaunted attention to sexuality queer theory has had relatively little to say about sex the material and psychic practices through which erotic gratification is sought In *Orgasmology* Annamarie Jagose takes orgasm as her queer scholarly object From simultaneous to fake orgasms from medical imaging to pornographic visualization from impersonal sexual publics to domestic erotic intimacies Jagose traces the career of orgasm across the twentieth century Along the way she examines marriage manuals of the 1920s and 1930s designed to teach heterosexual couples how to achieve simultaneous orgasms provides a queer reading of behavioral modification practices of the 1960s and 1970s aimed at transforming gay men into heterosexuals and demonstrates how representations of orgasm have shaped ideas about sexuality and sexual identity A confident and often counterintuitive engagement with feminist and queer traditions of critical thought *Orgasmology* affords fresh perspectives on not just sex sexual orientation and histories of sexuality but also agency ethics intimacy modernity selfhood and sociality As modern subjects we presume we already know everything there is to know about orgasm This elegantly argued book suggests that orgasm still has plenty to teach us

Putting Psychology in its Place Graham Richards, Paul Stenner, 2022-07-19 This fourth edition of *Putting Psychology in Its Place* builds on the previous three in introducing the history of Psychology and placing the discipline within its historical and social contexts Written by esteemed Psychologists Graham Richards and Paul Stenner this crucial text aims both to answer and raise questions about the role of Psychology in modern society by critically examining issues such as how Psychology

developed and why psychoanalysis had such an impact It discusses enduring underlying conceptual problems and examines how the discipline has changed to deal with contemporary social issues such as religion race and gender The fourth edition features revised and updated chapters though the core structure remains unchanged The final chapter has been restructured and jointly re written This text was written to remain compatible with the British Psychological Society requirements for undergraduate courses and is imaginatively written and accessible to all Putting Psychology in Its Place is an invaluable introductory text for undergraduate students of the history of Psychology and will also appeal to postgraduates academics and anyone interested in Psychology or the history of science **Kinaesthetic Knowing** Zeynep Çelik

Alexander,2017-12-08 Is all knowledge the product of thought Or can the physical interactions of the body with the world produce reliable knowledge In late nineteenth century Europe scientists artists and other intellectuals theorized the latter as a new way of knowing which Zeynep elik Alexander here dubs kinaesthetic knowing In this book Alexander offers the first major intellectual history of kinaesthetic knowing and its influence on the formation of modern art and architecture and especially modern design education Focusing in particular on Germany and tracing the story up to the start of World War II Alexander reveals the tension between intellectual meditation and immediate experience to be at the heart of the modern discourse of aesthetics playing a major part in the artistic and teaching practices of numerous key figures of the period including Heinrich W lfflin Hermann Obrist August Endell L szl Moholy Nagy and many others Ultimately she shows kinaesthetic knowing did not become the foundation of the human sciences as some of its advocates had hoped but it did lay the groundwork at such institutions as the Bauhaus for modern art and architecture in the twentieth century *Fear* Joanna

Bourke,2007-04-09 Fear the word itself conjures the appropriate response With a dark cacophony of associations like fright dread horror panic alarm anxiety and terror fear is universally understood as one of the most basic and powerful of human emotions obtaining a nearly palpable and overwhelming substance in today s world In this groundbreaking book acclaimed historian and prize winning author Joanna Bourke covers the landscape of fear over the past two hundred years From the nineteenth century dread of being buried alive a subject dear to the heart of Edgar Allen Poe to the current worry over being able to die when one chooses from the diagnoses of phobias and anxieties produced by psychotherapists and lovingly catalogued to the role of popular culture and media in inciting panic and dread from the horrors of the nuclear age to the fear of twenty first century terrorism Fear tells the story of anguish in modern times A blend of social and cultural history with psychology philosophy and popular science this astonishing book exhaustively researched and beautifully written offers strikingly original insights into the mind and worldview of the long twentieth century from one of the most brilliant scholars of our time Why Smile? Marianne LaFrance,2013-01-22 A charming thoughtful book one that makes a powerful case for

smiles as social acts with consequences Boston Sunday Globe When someone smiles the effects are often positive a glum mood lifts an apology is accepted a deal is struck a flirtation begins But change the circumstances or the cast of a smile and

the terms shift a rival grins to get under your skin a bully's smirk unsettles his mark Marianne LaFrance called the world's expert on smiles investigates the familiar grin and finds that it is not quite as simple as it first appears LaFrance shows how the smile says much more than we realize or care to admit not just cheerful expressions smiles are social acts with serious consequences Drawing on her research conducted at Yale University and Boston College as well as the latest studies in psychology medicine anthropology biology and computer science LaFrance explores the compelling science behind the smile Who shows more fake smiles popular kids or unpopular kids Is it good or bad when a bereaved person smiles These are some of the questions answered in this groundbreaking and insightful work To read it is to learn just how much the smile influences our lives and our relationships

Attention, Representation, and Human Performance Slim Masmoudi, David Yun Dai, Abdelmajid Naceur, 2012-05-04 This volume presents a rare occasion where scholars from Europe North Africa and North America share their research programs and findings revolving around an important theme integration Despite different research foci and methodologies there is a strong consensus that we need to understand a psychological phenomenon in all its complexity involving its neural psychological and social dimensions involving perception and conception and decision processes involving motivation emotion and cognition all in complex interaction This volume is intended to reach out to basic and applied psychological researchers cognitive and affective scientists learning scientists biologists sociologists neuropsychological researchers and philosophers who have an interest in an integrated understanding of the mind at work particularly pertaining to explanations of real life phenomena that have social and practical significance A distinct feature of this volume is that most research involved is heavily built on neuropsychological evidence while loyal to the experimental tradition with its focus on functional behavior in various situations and conditions that mimic or resemble real life The viability of this approach to doing cutting edge research that is relevant and applicable to many real life phenomena should also make this body of research useful for a wide range of human endeavor from religion education to industrial and organizational psychology
