

Memory

Memory is fundamental for the execution of daily activities, for it allows us to learn and apprehend. Depending on its function and type, it is related to different areas of the brain.

HOW MEMORY IS TRAINED

One can perfect the process of codification, generating multiple associations with memories and using mnemonic techniques. To remember a number:

MINEMONIC TECHNIQUES

Methods that employ visual images and association of ideas.

WORD PUZZLE METHOD

Wants to remember

1 One learns a list of words that rhyme with the given numbers.

2 One imagines the association between these images and those of the words to be remembered.

3 Then one simply thinks of the number. This will help one recall the word puzzle that is associated with the item one wishes to remember.

In order to convert perceptions into memories, they need to be processed.

IMPLICIT MEMORY

Used in tasks that require practice in order to be incorporated. They do not require a conscious effort to be applied.

EMOTIONAL RESPONSES

They are basic and arise from an external stimulus.

PRIMING

The ability to recognize an object by one of its constituent parts.

EXPLICIT MEMORY

The stored information concerns persons, places and objects. It requires a conscious effort in order to be applied.

IMAGES OF THE BRAIN'S FUNCTIONING

Many techniques of image analysis, like PET (positron emission tomography) and the more recent fMRI (functional magnetic resonance imaging), enable one to observe the parts of the brain that display the highest activity depending on the task being performed.

The codification of information activates the left prefrontal cortex.

When attempting to recall memories, the right prefrontal cortex is activated.

AMNESIA

The loss of memory, be it temporary or permanent, caused by organic or functional factors.

ANTEROGRADE

Loss of memory events or experiences lived through recently.

RETROGRADE

The inability to call up in the present memories from the distant past.

PSYCHOGENIC

Produced by emotional traumas of great intensity.
