## **Mechanisms Power In Soviet Union:**

**Mechanisms of Power in the Soviet Union** Niels Erik Rosenfeldt, Bent Jensen, Erik Kulavig, 2000-01 Based on archival evidence and other sources these essays examine the power structures communication channels and mechanisms of decision making within the Soviet political system The book deals with both domestic and foreign policy problems Special attention is focused on the era of Stalinism

**Adam Smith's Invisible Hand as Self-control Mechanism of Social Structures** Tadeusz Szuba, 2022-11-07 This book shows how such a computational process functions how great is its power and versatility since it is possible to show how discoveries are made In 1759 A Smith realized that there must exist an additional powerful control mechanism behind Great Britain's authority and government explaining the extraordinary successes of Great Britain He called this the Invisible Hand Despite having used this term only 3 times the idea evokes extreme scientific and political emotions to this day If we apply a molecular model of computation such as in in Adleman's DNA computer a computational model for the Invisible Hand can be built to show how it affects a society It is a spontaneous unconscious distributed noncontinuous computational process on the platform of minds of e g people or ants Knowing this mechanism a future self steering and self optimization system for AI robot teams can be proposed e g for construction sites and rescue operations

**Power in Movement** Sidney G. Tarrow, 2011-02-04 Social movements have an elusive power but one that is altogether real From the French and American revolutions to the post Soviet ethnic and terrorist movements of today contentious politics exercises a fleeting but powerful influence on politics society and international relations This study surveys the modern history of the modern social movements in the West and their diffusion to the global South through war colonialism and diffusion and it puts forward a theory to explain its cyclical surges and declines It offers an interpretation of the power of movements that emphasizes effects on the lives of militants policy reforms political institutions and cultural change The book focuses on the rise and fall of social movements as part of contentious politics in general and as the outcome of changes in political opportunities and constraints state strategy the new media of communication and transnational diffusion

**Handbook of CO2 in Power Systems** Qipeng P. Zheng, Steffen Rebennack, Panos M. Pardalos, Mario V. F. Pereira, Niko A. Iliadis, 2012-06-05 The Handbook of CO2 in Power Systems objective is to include the state of the art developments that occurred in power systems taking CO2 emission into account The book includes power systems operation modeling with CO2 emissions considerations CO2 market mechanism modeling CO2 regulation policy modeling carbon price forecasting and carbon capture modeling For each of the subjects at least one article authored by a world specialist on the specific domain is included

**Constructing the Narratives of Identity and Power** Karina V. Korostelina, 2013-12-16 Twenty years ago Ukraine gained its independence and started on a path towards a free market economy and democratic governance After four successive presidents and the Orange Revolution the question of exactly which national model Ukraine should embrace remains an open question Constructing the Narratives of Identity and Power

provides a comprehensive outlook on Ukraine as it is presented through the views of intellectual and political elites Based on extensive field work in Ukraine Karina V Korostelina describes the complex process of nation building Despite the prevailing belief in a divide between two parts of Ukraine and an overwhelming variety of incompatible visions Korostelina reveals seven prevailing conceptual models of Ukraine and five dominant narratives of national identity *Constructing the Narratives of Identity and Power* analyzes the practice of national self imagination Karina V Korostelina puts forward a structural functional model of national narratives that describes three major components dualistic order mythic narratives and normative order and two main functions of national narratives the development of the meaning of national identity and the legitimization of power Korostelina describes the differences and conflicting elements of the national narratives that constitute the contested arena of nation building in Ukraine

**Power and the State** Martin J. Smith, 2009-08-14 In this important new text Martin Smith reassesses traditional debates about power and how they understand the nature and impact of the state He develops an analysis of the new forms of state power that have developed in response to the perceived challenges of globalization and governance

*Penal Theories and Institutions* Michel Foucault, 2019-11-22 What characterizes the act of justice is not resort to a court and to judges it is not the intervention of magistrates even if they had to be simple mediators or arbitrators What characterizes the juridical act the process or the procedure in the broad sense is the regulated development of a dispute And the intervention of judges their opinion or decision is only ever an episode in this development What defines the juridical order is the way in which one confronts one another the way in which one struggles The rule and the struggle the rule in the struggle this is the juridical Michel Foucault *Penal Theories and Institutions* is the title Michel Foucault gave to the lectures he delivered at the Collège de France from November 1971 to March 1972 In these lectures Michel Foucault presents for the first time his approach to the question of power that will be the focus of his research up to the writing of *Discipline and Punish* 1975 and beyond His analysis starts with a detailed account of Richelieu's repression of the Nu-pieds revolt 1639-1640 and then goes on to show how the apparatus of power developed by the monarchy on this occasion breaks with the system of juridical and judicial institutions of the Middle Ages and opens out onto a judicial State apparatus a repressive system whose function is focused on the confinement of those who challenge its order Michel Foucault systemizes the approach of a history of truth on the basis of the study of juridico-political matrices that he had begun in the previous year's lectures *Lectures on the Will to Know* and which is at the heart of the notion of knowledge power In these lectures Foucault develops his theory of justice and penal law The appearance of this volume marks the end of the publication of the series Foucault's courses at the Collège de France the first volume of which was published in 1997

*The Routledge Handbook of Great Power Competition* Brian C. H. Fong, Chong Ja Ian, 2024-08-20 The Routledge Handbook of Great Power Competition is a comprehensive pioneering and interdisciplinary guide of this re-emerging field Offering a team of cutting edge researchers in the field it advances an analytical framework of great power competition It

surveys the major theories mainstream and critical actors state quasi state and non state mechanisms military economic and ideational influence and domains territorial and non territorial pertaining to contemporary great power competition This Handbook is an essential text for scholars and students of international relations security studies global governance and comparative politics It will also appeal to global policy makers and practitioners who need to observe contemporary great power competition

Torn between East and West Iulian Chifu, Simona Tutuianu, 2016-08-05 This book is a very timely account of the legal economic and political consequences for border states caught in the current tug of war between the West and Russia The Ukraine crisis of 2014 focused policy makers attention on a geographical area full of dangers that had gone relatively unnoticed since the breakup of the Soviet Union namely the security dynamics of the border states of Eastern Europe and the Black Sea Twenty five years after the collapse of the Soviet Union a strong Russia returns alternatively threatening and cajoling but at risk itself of suffering economic injury from western reprisals over its nostalgia for the map drawn at Yalta That conflict which hotted up over the Ukraine was soon being played out over and in the air space over Syria and Turkey while the border states themselves are likely to be drawn into the European refugee crisis and have the potential after the 2015 Paris atrocities to be breeding grounds for international terrorists This groundbreaking book contains prescient warnings that must be heeded by leaders and diplomats on both sides of the East West divide

**Tokens of Power** Ann Hironaka, 2017-03-06 War presents a curious paradox Interstate war is arguably the most carefully planned endeavor by states yet military history is filled with disasters and blunders of monumental proportions These anomalies happen because most military history presumes that states are pursuing optimal strategies in a competitive environment This book offers an alternative narrative in which the pillars of military planning evaluations of power strategy and interests are theorized as social constructions rather than simple material realities States may be fighting wars primarily to gain or maintain power yet in any given historical era such pursuits serve only to propel competition they do not ensure military success in subsequent generations Allowing states to embark on hapless military ventures is fraught with risks while the rewards are few

The End of the Communist Power Monopoly Michael Waller, 1993 This work analyzes the internal weaknesses and the external pressures that led to Communism s terminal crisis in Europe It systematically links the history of Euro Communism and the Prague Spring to the momentous events of 1989 to 1991

**Freedom Power & Democ Plan V** 4 Karl Mannheim, 2013-07-04 First Published in 1951 In common with great sociologists of the past such as Comte and Spencer Marx and Max Weber Mannheim engaged in sociological study as a response to the challenging present This is volume IV of Freedom Power and Democratic Planning is the collected works of Karl Mannheim

Great Power Multilateralism and the Prevention of War Harald Muller, Carsten Rauch, 2017-09-27 Great power conflict and great power war are still the most dangerous risks the international community is facing today This edited volume investigates the feasibility of a modern day concert of powers as a way for managing the risk of great power conflicts in the 21st century The

volume takes its inspiration from history The 19th century European Concert was not only able to ensure a period of exceptional peacefulness among the European great powers it also limited the scope and duration of the few wars that did break out The chapter authors discuss the achievements and limits of the historical concert define the requirements that a new concert would have to meet critically evaluate obstacles and risks of the approach and indicate how a 21st century concert of powers could complement and fit into the present legal and institutional setting of global politics This volume offers a systematic examination of the norms and tools of the historical template and scrutinizes these tools for their utility in our time It will be of great interest to a wide range of scholars and students in areas such as International Relations History and International Law     Soviet Foreign Policy 1917-1991 Jr. Fleron, 2017-07-05 The purpose of this anthology is to deepen Western understanding of the sources and substance of the foreign policy of the Soviet Union Authoritative analysts here explore significant issues in Soviet foreign relations from the era of the Bolshevik Revolution and the Civil War to the period of reform that preceded the final collapse of the Soviet system The volume is designed for courses in Soviet political history diplomatic history comparative foreign policy and the mainstream of international relations     *Handbook of Sociological Theory* Jonathan H. Turner, 2006-05-17 Sociology is experiencing what can only be described as hyperdifferentiation of theories there are now many approaches competing for attention in the intellectual arena From this perspective we should see a weeding out of theories to a small number but this is not likely to occur because each of the many theoretical perspectives has a resource base of adherents As a result theories in sociology do not compete head on with each other as much as they coexist This seminal reference work was brought together with an eye to capturing the diversity of theoretical activity in sociology specifically the forefront of theory Contributors describe what they themselves are doing right now rather than what others have done in the past The goal of this volume is to allow prominent theorists working in a variety of traditions who wouldn't usually come together to review their work The chapters in this volume represent a mix of theoretical orientations and strategies but these theories are diverse and represent the prominent theoretical discussions in sociology today Some areas included are Section I Theoretical Methodologies and Strategies Section II The Cultural Turn in Sociological Theorizing Section III Theorizing Interaction Processes Section IV Theorizing from the Systemic and Macrolevel Section V New Directions in Evolutionary Theorizing Section VI Theorizing on Power Conflict and Change Section VII Theorizing from Assumptions of Rationality This handbook will be of interest to those wanting a broad spectrum and overview of late 20th early 21st century sociological theory     **Foundations of Economic Evolution** Carsten Herrmann-Pillath, 2013-01-01 This book is an ambitious intellectual enterprise to build a naturalistic foundation for economics with amazingly vast knowledge of physical biological social sciences and philosophy Readers will discover that approaches and insights emergent in institutional studies social neuroscience network theory ecological economics bio culture dualistic evolution etc are persuasively placed in a grand unified frame It is written in a good Hayekian tradition I

recommend this book particularly to young readers who aspire to go beyond a narrowly specified discipline in the age of expanding communicability of knowledge and ideas Masahiko Aoki Stanford University US Carsten Herrmann Pillath's new book is an in depth application of natural philosophy to economics that draws up an entirely new framework for economic analysis It offers path breaking insights on the interactions between human economic activity and nature and outlines a convincing solution to the long standing reductionism controversy A must read for everyone interested in the philosophical underpinnings of economics as a science Ulrich Witt Max Planck Institute of Economics Jena Germany Big picture philosophy of economics drifted into a dull cul de sac as it became obsessively focused on falsifiability and rationality In this book Carsten Herrmann Pillath pushes the field back onto the open highway by locating economics in the larger frameworks of metaphysics evolutionary dynamics and information theory This is large scale ambitious synthesis of ideas of the kind we expect from time to time to see devoted to physics and biology Why should economics merit anything less But of course this kind of intellectual tapestry must await the appearance of an unusually devoted scholar with special patience and eccentric independence from the pressure for quick returns that characterizes academic life In the person of Hermann Pillath this scholar has appeared No one who wants to examine economics whole and in its richest context should miss his virtuoso performance in this book Don Ross University of Cape Town South Africa and Georgia State University US Herrmann Pillath's work attempts to bring to bear upon the discipline of economics perspectives from other discourses which have been burgeoning recently namely thermodynamics evolutionary biology and semiotics aiming at a consilience contextualized by economic activity and problems This marks the work as a contemporary example of natural philosophy which is now at the doorstep of a revival The overall perspective is that human economic activity is an aspect of the ecology of the earth's surface viewing it as an evolving physical system mediated through distributed mentality as expressed in technology evolution Knowledge is taken to be physical with a performative function as in Peirce's pragmatism Thus the social meanings of expectations prices and credit are found to be rooted in energy flows The work draws its foundation from Hegel and C S Peirce and its immediate guidance from Hayek Veblen and Georescu Roegen The author generates an energetic theory of economic growth guided by Odum's maximum power principle Economic discourse itself is reworked in the final chapter in light of the examinations of the previous chapters naturalizing economics within an extremely powerful contemporary framework Stanley N Salthe Binghamton University US An Oscar winning performance in the theatre of consilience It's hard to know which to praise first Carsten Herrmann Pillath's humility or his ambition He says his book is not a great intellectual feat because he pursues the humble task of putting together the ideas of others When he finally gets to economics he tries to be as simple as possible and to conceive of economics in terms of the basics at undergraduate level so to say On the other hand the scale of his ambition is to rethink the foundations of economics from first principles while at the same time holding a running dialogue between contemporary sciences and classic philosophy He's much too modest of course because

Foundations is a major achievement but his modesty points to what makes it such a powerful treatise the book is not about his preferences or prejudices it is a scientific approach that aims at establishing truthful propositions about reality That is much harder to achieve than grand theories or complicated mathematics because it amounts to a new modern synthesis of the field an achievement on a par with Julian Huxley's whose own modern synthesis of evolutionary theories in the 1940s allowed for the explosive growth of the biosciences over the next decades The structure of the book is simple enough providing a framework for the naturalistic turn in economics Starting from material existence causation and evolution Herrmann Pillath takes us through four fundamental concepts individuals networks institutions and technology before coming finally to the realm of economics proper i.e. markets However Herrmann Pillath believes that the foundations of economics cannot be found within economics but only in dialogue with other sciences or what he calls the theatre of consilience It's a theatre in which various characters come and go where dialogue ebbs and flows conflicts arise and are resolved and where individual actions can be seen as concepts as leading to higher levels of meaning as the plot unfolds The magic of theatre of course is that the point of intelligibility where the characters' actions and narrative resolve into meaningfulness is projected out of the drama itself into the spectator That's you dear reader So it is with economics as a discipline Economics is a player in a much larger performance about what constitutes knowledge and how we know that It is also a player in the economy it seeks to explain To understand why money firms growth prices markets and other staples of economic thought emerge and function the way they do it is necessary to situate the analysis beyond economics and the economy and to engage with developments across the human evolutionary and complexity sciences This is what Herrmann Pillath does analyzing a breathtaking range of illuminating and sometimes challenging work along the way We are treated to new ideas about the externalized brain the evolution of knowledge in the Earth System i.e. not just among humans the role of signs and performativity in these processes as well as that of energetic transformations But Herrmann Pillath is not satisfied with the modest task of bringing the best of modern scientific thought to bear on economic concepts and performances he really does harbor a deeper purpose The clue is in his apparently quixotic desire to hang on to philosophical insights associated with pre-evolutionary thinkers like Aristotle and Hegel and his apparently eccentric desire to place the semiotic philosophy of C. S. Pierce at center stage But the patient observer will see that he is not seeking to change the facts by imposing idealist notions on them after the event Instead he is arguing for a change in the way we perform ourselves in the face of these facts He is looking for a modern day equivalent of Confucius or Socrates one who can imagine values and beliefs that define the human species in a new way For those who have eyes to see as the drama unfolds it may be that we have found such a figure in Carsten Herrmann Pillath himself modesty ambition and all This is Cultural Science as it should be done John Hartley Curtin University Australia and Cardiff University UK [Feminisms/Museums/Surveys](#) Hilary Robinson, Lara Perry, 2025-04-22 The first anthology of feminist art exhibition essays and museum publications providing an

exciting and valuable overview of recent developments in feminist curation *Feminisms Museums Surveys Exhibition Curating 2005 2022* brings together works from exhibition catalogs and museum publications to provide a comprehensive and timely view of the modern approach to feminist curating Offering insights into how curators from around the world engage with different feminisms and select and exhibit feminist art this one of a kind anthology exemplifies the diversity of feminist thinking and curatorial approaches in the contemporary art museum This important volume comprises articles and essays drawn from publications which accompanied major curatorial projects from different regions around the globe and each essay offers a unique critical interpretation of feminist art Organized chronologically the book presents the essays the majority in print for the first time since their initial publications and some for the first time in English with the dates and venues of the exhibition and a brief introduction by the editors All the artists in the exhibitions and the curators involved are indexed in the supplementary material Making key examples of feminist curating easily accessible to a wider audience of scholars and students this unique anthology Offers a transnational perspective on feminist curating featuring exhibitions from across Europe Asia Australia Africa and the Americas Highlights the diverse ways in which curators have attempted to bring feminist theory into the museum exhibition format Illustrates how feminist ideas have evolved in diverse ways in the international community of museum professionals Includes an index of artists and curators whose work is represented in the volume Offering deep insights into how curators have approached the documentation and representation of art informed by feminist politics and thinking *Feminisms Museums Surveys Exhibition Curating 2005 2022* is an ideal resource for courses in feminism and art curation LGBTQ art art and politics museum studies art history cultural studies feminist and gender studies and related courses across fine arts and visual arts programs

*Postcommunist Transformation and the Social Sciences*  
Frank Bönker, Klaus Müller, Andreas Pickel, 2003-08 The work's major substantive themes revolve around problems of post communist socio economic transformations Specifically it explores post communist systemic change the role of religion and collective identity the significance of trust and economic culture patterns of state economy interactions in enterprise restructuring the context of EU expansion the strengths and weaknesses of economic theory and neo liberal doctrine and the history of ideas in the post communist transformation debate

*Mechanistic Realism and US Foreign Policy* Johannes Gullestad Rø, 2013-06-26 This book aims to reinvigorate realist international relations theory by developing a catalogue of micro mechanisms able to explain security policy decision making Typically realism discounts the role of individuals and uses states as the unit of analysis By examining instead the mental operations of those who act on behalf of the state a better understanding of security policy formation is attainable The book demonstrates how realism can be translated from a systemic grand theory into a catalogue of psychologically plausible mechanisms applicable to individual decision makers This catalogue here called Mechanistic Realism may be employed to investigate the cognitive precursors to security policy The explanatory power of Mechanistic Realism is demonstrated through a meticulous analysis of what transpired inside the

George W Bush administration as its members forged a response to the 2001 terrorist attacks Through the exploration of individual level data Mechanistic Realism provides a more comprehensive analysis of the US response The book concludes that international relations IR scholars would benefit analytically by assembling the most pertinent mechanisms into an explanatory toolbox rather than developing and applying grand theories Mechanistic Realism is a first step in this direction This book should be of great interest to students of IR foreign policy American politics and security studies in general
