Understanding Media and Culture, 2016 *Understanding Media and Culture: An Introduction to Mass Communication* is adapted from a work produced by a publisher who has requested that they and the original author not receive attribution. This adapted edition is produced by the University of Minnesota Libraries Publishing through the eLearning Support Initiative. Though the publisher has requested that they and the original author not receive attribution, this adapted edition reproduces all original text and sections of the book except for publisher and author name attribution. According to the author, the world did not need another introductory text in mass communication. But the world did need another kind of introductory text in mass communication, and that is how *Understanding Media and Culture: An Introduction to Mass Communication* was birthed. The only question was: What would be the purpose of another introductory mass communication text? *Understanding Media and Culture: An Introduction to Mass Communication* was written to squarely emphasize media technology. Jack believes that an introduction to mass communication text should be a compelling historical narrative sketching the ongoing evolution of media technology and how that technology shapes and is shaped by culture, and that is what he set out to deliver with his new textbook. Today's students are immersed in media technology. They live in a world of cell phones, smart phones, video games, iPods, laptops, Facebook, Twitter, FourSquare, and more. They fully expect that new technology will be developed tomorrow. Yet students often lack an historical perspective on media technology. They lack knowledge of the social, political, and economic forces that shape media technology. This is not knowledge for knowledge's sake. It is knowledge that can help them understand, comprehend, appreciate, anticipate, shape, and control media technology. With this focus, *Understanding Media and Culture* becomes an appropriate title. Indeed, the title has particular significance. Marshall McLuhan's *Understanding Media* is a key text in media studies. Written in the 1960s, *Understanding Media* was the subject of intense debates that continue to this day. Its central message was that the technology of media, not their content, was their most important feature. In a typically pithy phrase, McLuhan said, "The medium is the message." The title
