Communications Media, Globalization, and Empire Oliver Boyd-Barrett, 2007-02-20 An exploration of the political economy of media and to what extent global communications and popular entertainment continue to serve elite interests In Communications Media

Globalization and Empire an international team of experts analyzes and critiques the political economy of media communications worldwide Their analysis takes particular account of the sometimes conflicting pressures of globalization and neo imperialism The first is commonly defined as the dismantling of barriers to trade and cultural exchange and responds significantly to lobbying of the world's largest corporations including media corporations The second concerns US pursuit of national security interests as response to terrorism at one level and at others to intensifying competition among both nations and corporations for global natural resources

The Myth of Media Globalization Kai Hafez, 2013-07-08 The ongoing interconnection of the world through modern mass media is generally considered to be one of the major developments underpinning globalization This important book considers anew the globalization phenomenon in the media sphere Rather than heralding globalization or warning of its dangers as in many other books Kai Hafez analyses the degree to which media globalization is really taking place Do we have enough evidence to show that there is a linear and accelerated move towards transnationalization in the media All too often the empirical data presented seems rather more anecdotal than representative Many transborder media phenomena are overestimated and taken out of the context of locally and nationally oriented mainstream media processes all over the world The inherent danger is that a central paradigm of the social sciences rather than bearing scholarly substance will turn out to be a myth and even a sometimes dangerously ideological tool Based on a theoretical debate of media globalization the work discusses most major fields of media development including foreign reporting satellite TV film internet foreign broadcasting media and migration media policy and media economy As an important new contribution to timely debates The Myth of Media Globalization will be essential and provocative reading for students and scholars alike

When Media Goes to War Anthony DiMaggio, 2010-02-01 In this fresh and provocative book Anthony DiMaggio uses the war in Iraq and the United States confrontations with Iran as his touchstones to probe the sometimes fine line between news and propaganda Using Antonio Gramsci's concept of hegemony and drawing upon the

seminal works of Noam Chomsky Edward Herman and Robert McChesney DiMaggio combines a rigorous empirical analysis and clear lucid prose to enlighten readers about issues essential to the struggle for a critical media and a functioning democracy If as DiMaggio shows our newspapers and television news programs play a decisive role in determining what we think and if as he demonstrates convincingly what the media give us is largely propaganda that supports an oppressive and undemocratic status quo then it is incumbent upon us to make sure that they are responsive to the majority and not just the powerful and privileged few Global Media and National Policies Terry Flew, Petros Iosifidis, Jeanette Steemers, 2016-04-08 Conventional wisdom views globalization as a process that heralds the diminishing role or even death of the state and the rise of transnational media and transnational consumption Global Media and National Policies questions those assumptions and shows not only that the nation state never left but that it is still a force to be reckoned with With contributions that look at global developments and developments in specific parts of the world it demonstrates how nation states have adapted to globalization and how they still retain key policy instruments to achieve many of their policy objectives This book argues that the phenomenon of media globalization has been overstated and that national governments remain key players in shaping the media environment with media corporations responding to the legal and policy frameworks they deal with at a national level

De-Convergence of Global Media Industries Dal Yong Jin,2013-03-12

Convergence has become a buzzword referring on the one hand to the integration between computers television and mobile devices or between print broadcast and online media and on the other hand the ownership of multiple content or distribution channels in media and communications Yet while convergence among communications companies has been the major trend in the neoliberal era the splintering of companies de convergence is now gaining momentum in the communications market As the first comprehensive attempt to analyze the wave of de convergence of the global media system in the context of globalization this book makes sense of those transitions by looking at global trends and how global media firms have changed and developed their business paradigm from convergence to de convergence Jin traces the complex relationship between media industries culture and globalization by exploring it in a transitional yet contextually grounded framework employing a political economic analysis integrating empirical data analysis

Trade Policy In

Asia: Higher Education And Media Services Christopher Findlay,Hildegunn Kyvik Nordas,Gloria O Pasadilla,2014-04-25

Education and media services have much in common Both provide services that embody local cultures in which there is extensive public sector participation and significant domestic regulation At the same time both are dramatically affected by the information and communications technology revolution The production of information content now involves huge costs in terms of research and development or artistic talent whilst the cost of making such products available to other consumers is very low This in turn challenges the effectiveness of domestic regulation and raises fundamental questions about its purpose

calling for an increased scope for international trade and investment and the development of supply chains Yet both areas are lightly committed in international trade agreements like the GATS This lack of commitment and the lack of additional impact from negotiations in bilateral discriminatory trade agreements are cross cutting themes in the book Trade Policy in Asia responds to these issues to provide readers with a comprehensive and consistent treatment of policy in the higher education and media services sector across a range of Asian economies little studied in the existing literature The book opens the discussion with an overview of global trends in each area followed by detailed country specific studies Through comparative work it identifies common elements across these sectors and highlights critical implications for trade policy Education services themes include the growth and impediments involved in various forms of trade and investment the emergence of a new wave of globalization obstacles faced by domestic providers in supplying services a common ambition to become an education services hub for international students and the scope for greater international cooperation in research Media services themes include the impact of new technology on options for content delivery and the associated problems for policy implementation and copyright protection and the new challenges of globalization for social goals relating to local cultures as well as risks involved in implementing policies that pursue these goals *Trade Policy in Asia: Higher Education and Media Services* OECD,Asian Development Bank Institute,2014-06-05 This book provides readers with a comprehensive and consistent treatment of trade policy in the higher education and media services sector across a range of Asian economies
