LaMay, Everette E. Dennis, 1991 Should environmental reporting offer advocacy or objectivity How can the media explain complex issues of science and technology without oversimplifying Does the prevailing definition of news limit the media's ability to report on the environment Media and the Environment is the first book to explore these and other questions about how the media cover the environment Media and the Environment: Producing environmental communication: sources, communicators, media and media professionals Anders Hansen, 2014 Most of what we understand about the environment we know through the media broadly defined and related communication processes Indeed such processes have played a vital role in defining the environment as a crucial concept and in bringing environmental issues and problems to public and political attention Thus at least since the emergence and rise of the modern environmental movement in the 1960s the mass media have been a central public arena for publicizing environmental issues and for contesting claims arguments and opinions about our use and abuse of the environment Moreover the learned editor of this new Routledge collection avers this applies not only to our beliefs and knowledge about those aspects of the environment which are regarded as problems or issues for public and political concern but extends much deeper to the very ways in which we as individuals cultures and societies view perceive value and relate to our environment and nature generally A rapidly expanding body of research and scholarship from a diverse range of disciplines across the humanities sciences and social sciences has sought to address key questions about all aspects of media mediation and communication roles in social political and cultural definitions of the environment Such questions have focused in particular on how the media and related communication processes are centrally implicated in the social and political definition contestation and resolution of major global environmental issues and problems notably most recently climate change But media and communication roles in relation to local and national environmental issues also continue to be an important focus for scholarly research on what is increasingly recognized as the emerging and

consolidating domain of environmental communication Addressing the need for an authoritative and comprehensive reference work to enable users to navigate this increasingly complex area of research and study and to answer key questions about the central role of media and communication in relation to the environment and environmental issues *Media and the Environment* is a new title from Routledge's acclaimed *Critical Concepts in the Environment* series Edited by Anders Hansen it is a four volume collection of foundational and the very best cutting edge scholarship The collection brings together core texts charting the history and development of environmental communication along with research examining the three major strands of the communication process the sources and production of communication about the environment the study of representations of the environment in news entertainment media advertising film and popular culture and the study of how communication about the environment impacts on and interacts with public and political beliefs about the environment as well as political action regarding the environment The collection's final part provides a series of case studies from the field of environmental communication praxis examining how activists NGOs local government and large corporations have sought to use communication as a key tool in the political processes of environmental change Supplemented with a full index and including an introduction newly written by the editor which places the assembled texts in their historical and intellectual context *Media and the Environment* is destined to be valued by scholars and students as a vital research resource     **Media, Environment and the Network Society** Alison Anderson, 2014     **Media, Environment and the Network Society** A. emphasis upon media techniques and spin doctoring offer such non official news sources a means of securing media success This question is now surfacing as a major issue within politics and cultural debates as well as within the sociology of the mass media and communication studies We are living through a period of remarkable transformation in politics culture and social arrangements Communications experts in the new Labour camp believe that trade unions must respond by becoming more sophisticated in their use of the media and marketing techniques and by employing new vocabularies for communicating their messages to the public However can trade unions succeed in using the tricks of the 1990s spin doctor to restore their position This study uses extensive interviews with leading national newspaper journalists and senior figures within trade unions to explore the question Drawing upon unique archive material the study points to the importance of government in fostering or undermining branches of journalism including coverage of labour relations

industries in the UK and the Nordic countries These Nordic countries both as a set of small nations and as a regional constellation are frequently perceived as some of the greenest in the world yet not only is the footprint of the media industries practically ignored in academic research but the very real stakes of the industries global impact are not comprehensively understood Here the author focuses on four key areas for investigating the material impact of Nordic media

- 1 resources used for production and dissemination
- 2 regulation of the media
- 3 organizational management and
- 4 labour practices

By adopting an interdisciplinary perspective that combines ecocritical analysis with interrogation of the political economy of the creative industries K p argues that taking the industries to task on their environmental footprint is a multilevel resource and organizational management issue that must be addressed more effectively in contemporary media studies This book will be of great interest to students and scholars of media communication and environmental studies
