Modern Media Literacy: Generative AI, Social Media, and the News Hallaq, Tom,Groshek, Jacob,2025-09-04 In an era defined by digital transformation modern media literacy evolves to address generative AI social media and the news As AI driven tools shape the creation and dissemination of information traditional boundaries blur challenging individuals to critically assess sources motives and authenticity Social media platforms increase these dynamics accelerating the spread of both credible journalism and misleading content generated by algorithms In this context media literacy navigates a system where human and machine produced content coexist Understanding how generative AI influences media narratives may foster more informed responsible and resilient digital citizens Modern Media Literacy Generative AI Social Media and the News explores the evolving landscape of media consumption and critical analysis in the digital age It examines how digital media literacy can be assessed in higher education emphasizing the need for valid and reliable tools to measure the critical skills students

need to navigate today's complex media environment. This book covers topics such as critical thinking, digital technology, and social media and is a useful resource for media and communications professionals, sociologists, computer engineers, educators, academicians, researchers, and scientists.

An Unprecedented Election Benjamin R. Warner, Dianne G. Bystrom, Mitchell S. McKinney, Mary C. Banwart, 2018-02-21. Written by leading scholars of political communication, this book provides a comprehensive accounting of the campaign communication that characterized the unprecedented 2016 presidential campaign. The political events leading up to election day on November 8, 2016, involved unprecedented events in U.S. history. Hillary Clinton was the first woman to be nominated by a major party and she was favored to win the highest seat in the nation. Donald Trump, arguably one of the most unconventional and most unlikely to succeed candidates in U.S. history, became the leading candidate against Clinton. Then an even more surprising thing happened: Trump won an outcome unexpected by all experts and statistical models.

An Unprecedented Election: Media Communication and the Electorate in the 2016 Campaign presents proprietary research conducted by a national election team and leading scholars in political communication and documents the most significant and in some cases the most shocking features of the 2016 U.S. presidential election. The information presented in this book is derived from national surveys, experiments, and textual analysis and helps readers grasp the truly unique characteristics of this campaign that make it unlike any other in U.S. history. The chapters explain the underlying dynamics of this astonishing election by assessing the important role of both traditional and social media, the evolving and potentially diminishing influence of televised campaign advertisements, the various implications of three historic presidential debates, and the contextual significance of convention addresses. Readers will come away with an appreciation of the content and effects of the campaign communication and media coverage as well as the unique attributes of the electorate that ultimately selected Donald Trump as the 45th president of the United States.

Psychology at the Movies Skip Dine Young, 2012-03-14. Psychology at the Movies explores the insights to be gained by applying various psychological lenses to popular films, including cinematic depictions of human behavior, the psychology of filmmakers, and the impact of viewing movies.
