**Media Ethics and Accountability Systems** Claude-Jean Bertrand, 2018-04-17 Over the last few years the O J Simpson case then the Lewinsky Clinton affair and scores of minor scandals have dominated the US press often taking precedence over important domestic and international issues This tabloidization of the news media both here and abroad has proved that the market cannot insure media quality In a democracy for media to function well they must be free of both political and economic muzzling The only solution is to add self regulation or quality control by professionals and public to the other two forces the market and state regulation In this controversial volume Claude Jean Bertrand sets out to define a set of accountability systems democratic efficient and harmless to insure true freedom and quality of media This brief highly literate volume focuses not on philosophical foundations of media ethics or case stories but on what is now missing in the codes Many books deal with

media ethics but few deal with accountability Media Ethics and Accountability Systems zeroes in on the many nongovernmental methods of enforcing quality control and on the difficulty of getting the media microcosm to accept such accountability To remedy this lack Bertrand proposes rethinking existing media accountability systems some 30 to 40 in number and creation of new ones He observes that existing systems are rooted in four basic approaches training the education of citizens in media use and the incorporation of ethics courses in journalistic education evaluation criticism positive and negative not only from politicians consumerists and intellectuals but from media professionals themselves monitoring by independent academic experts over extended periods of time into the long term effects and feedback giving ear to the various segments of media users and their needs and tastes rather than scrutinizing sales and ratings Media Ethics will be of particular interest to academics in the fields of communication and journalism as well as to the general reader with an interest in public issues and a civic concern for society

**Media Accountability** William Babcock, 2014-06-11 A small collection of well honed tools has been employed for some time by media practitioners and the public to help maintain and improve the credibility of journalism and the mass media These media accountability tools have included ethics codes media critics news councils ombudsmen journalism reviews and public civic journalism initiatives Now in the 21st Century the mass media are increasingly being buffeted by a perfect storm of declining subscribers and audience share dwindling advertising revenue changing corporate demands unpredictable audiences and new media competition If journalism and the mass media are to stay afloat and be credible the media accountability toolbox needs to contain suitable tools for the job which begs the question Who will Watch the Watchdog in the Twitter Age This book contains answers to this question from the perspective of 17 media ethics experts from around the globe Their answers will help shape and define for years to come the tools in the media ethics toolbox This book was originally published as a special issue of the Journal of Mass Media Ethics

*How Social Media has Transformed Journalism* Vaia Papanagnou, 2025-04-26 This book explores the influence of social media on the transformation of institutional journalism Grounded on a case study of The Guardian in the UK the work is an in depth look at how a leading news organisation navigated the challenges of the social media era Drawing on interviews with Guardian journalists Papanagnou demonstrates that the major change that social media effected on journalism has been the inculcation of journalists with the logic of branding Journalists now actively brand themselves and their organisations as authoritative voices on public affairs they emphasise their expertise in the stories they share across platforms leveraging their reputations to establish credibility and connect with like minded audiences Ultimately the author argues that the turn to branding represents a pragmatic solution to the problem that social media companies posed for journalism By embracing networking technologies journalists and their organisations have become increasingly tethered to big tech And lacking the immense technological and financial resources of the digital platforms news brands and their journalists have sought to counteract this dependency by wielding the power of their journalistic reputations
