A. Roberson, 2002-04-30 A critical appreciation of the development of the international society idea and its influence on and relation to the development of the international relations theory A critical look is taken at the intellectual development of key members of the English School The concept of the School itself and the place of the School's theory in contemporary international relations approaches are examined China's Rise and Rethinking International Relations Theory Chengxin Pan, Emilian Kavalski, 2022-02-16 Bringing together leading scholars from Asia and the West this book investigates how the dynamics of China's rise in world politics contributes to theory building in International Relations IR The book demonstrates how the complex and transformative nature of China's advancement is also a point of departure for theoretical innovation and reflection in IR more broadly In doing so the volume builds a strong case for a genuinely global and post Western IR It contends that non Western countries should not only be considered potential sources of knowledge production but also original and legitimate focuses of IR theorizing in their own right **Weak States, Vulnerable Governments, and Regional Cooperation** Atena Ștefania Feraru, 2021-10-31 War famine poverty organized crime environmental catastrophes refugees epidemics and pandemics modern slavery all these affect people in the non Western world to an increasingly disproportionate extent It is also where wealthy governments wield economic leverage and military

force to renegotiate existing norms of international relations Under these circumstances it is difficult to overestimate the importance and urgency of comprehending the mechanisms and motivations driving these phenomena This book is the outcome of a decade long effort to advance both theoretical and empirical understanding of what motivates non Western governments decisions to cooperate not cooperate regionally It starts by acknowledging the Western centrism of prevailing international relations theories abandoning deeply entrenched assumptions regarding the nature and roles of states and redefining state weakness The inquiry continues by elaborating this new concept and applying it to Southeast Asian polities while positing that it creates governments vulnerable to internal and external threats in line with Joel S Migdal s well known findings on the topic A set of regional cooperation strategies is then inferred based on the survival needs of insecure governing elites and its empirical validity is tested against the experience of regional organizations in Africa Asia and the Americas The second part of the book provides an in depth examination of how Southeast Asian governments shared security needs and interests shaped the emergence of the identified regional cooperation pattern and its evolution over 50 years of cooperation within the Association of Southeast Asian Nations ASEAN Overall this book is a call to international relations scholars to do our part in understanding non Western experiences and making a substantive contribution to addressing humanity s most intractable security threats

The G20 and International Relations Theory Steven Slaughter, Edward Elgar Publishing, 2019 The future of the G20 is uncertain despite being developed to address the 2008 global financial crisis This book considers the significance of the G20 by engaging various accounts of International Relations theory to examine the political drivers of this form of global governance International Relations theory represents an array of perspectives that analyse the factors that drive the G20 how the G20 influences world politics and in what ways the G20 could or should be reformed in the future

Cosmopolitanism and International Relations Theory Richard Beardsworth, 2011-06-13 Globalization has been contested in recent times Among the critical perspectives is cosmopolitanism Yet with the exception of normative theory international relations as a field has ignored cosmopolitan thinking This book redresses this gap and develops a dialogue between cosmopolitanism and international relations The dialogue is structured around three debates between non universalist theories of international relations and contemporary

cosmopolitan thought The theories chosen are realism post Marxism and postmodernism All three criticize liberalism in the international domain and therefore cosmopolitanism as an offshoot of liberalism In the light of each school s respective critique of universalism the book suggests both the importance and difficulty of the cosmopolitan perspective in the contemporary world Beardsworth emphasizes the need for global leadership at nation state level re embedding of the world economy a cosmopolitan politics of the lesser violence and cosmopolitan political judgement He also suggests research agendas to situate further contemporary cosmopolitanism in international relations theory This book will appeal to all students of political theory and international relations especially those who are seeking more articulation of the main issues between cosmopolitanism and its critics in international relations International Relations Theory and Regional

Transformation T. V. Paul, 2012-02-23 Regional transformation has emerged as a major topic of research during the past few decades much of it seeking to understand how a region changes into a zone of conflict or cooperation and how and why some regions remain in perpetual conflict Although the leading theoretical paradigms of international relations have something to say about regional order a comprehensive treatment of this subject is missing from the literature This book suggests that cross paradigmatic engagement on regional orders can be valuable if it can generate theoretically innovative testable propositions and policy relevant ideas The book brings together scholars from the dominant IR perspectives aiming to explain the regional order issue through multidimensional and multi causal pathways and seeking meeting points between them Using insights from IR theory the contributors offer policy relevant ideas which may benefit conflict ridden regions of the world
