Stochastic Programming Kurt Marti,Peter Kall,2013-12-14 In order to obtain more reliable optimal solutions of concrete technical economic problems e g optimal design problems the often known stochastic variations of many technical economic parameters have to be taken into account already in the planning phase Hence ordinary mathematical programs have to be replaced by appropriate stochastic programs New theoretical insight into several branches of reliability oriented optimization of stochastic systems new computational approaches and technical economic applications of stochastic programming methods can be found in this volume *Scientific and Technical Aerospace Reports* ,1991 *Statistical Methods for QTL Mapping* Zehua Chen,2013-11-01 While numerous advanced statistical approaches have recently been

developed for quantitative trait loci QTL mapping the methods are scattered throughout the literature Statistical Methods for QTL Mapping brings together many recent statistical techniques that address the data complexity of QTL mapping After introducing basic genetics topics and statistical principles the author discusses the principles of quantitative genetics general statistical issues of QTL mapping commonly used one dimensional QTL mapping approaches and multiple interval mapping methods He then explains how to use a feature selection approach to tackle a QTL mapping problem with dense markers The book also provides comprehensive coverage of Bayesian models and MCMC algorithms and describes methods for multi trait QTL mapping and eQTL mapping including meta trait methods and multivariate sequential procedures This book emphasizes the modern statistical methodology for QTL mapping as well as the statistical issues that arise during this process It gives the necessary biological background for statisticians without training in genetics and likewise covers statistical thinking and principles for geneticists Written primarily for geneticists and statisticians specializing in QTL mapping the book can also be used as a supplement in graduate courses or for self study by PhD students working on QTL mapping projects Library of Congress Subject Headings Library of Congress.
