Caregivers play a crucial role in children's healthy development

These bonds are especially important for helping children in crisis-affected settings build resilience in the face of adversity. Programs that support caregivers in forming nurturing relationships with their children can also [mitigate](#) some of the negative effects of stress and trauma early in life. And [benefits](#) extend beyond children: [research shows](#) that early childhood development programs aimed at supporting caregivers can [improve](#) caregivers' own mental health as well, and caregivers often [report](#) that playing with their children is an important factor in their own happiness.
