Development Stuart Corbridge, 2017-05-15 The volume brings together twenty five of the most influential articles published in the field of development geography since 1960 The first part looks at the origins of development geography and the debates between modernization theorists and radicals that took shape in the 1970s Thereafter the book is organized thematically Geographers have made key contributions to development studies in four major areas all of which are represented here and include gender and households development alternatives and identities resource conflicts and political ecology and globalization and resistance The book ends with three broad ranging essays by leading figures in the field

Human Impact on the Earth William B. Meyer, 1996-02-23 At a level accessible to the general reader this balanced and non polemical book describes the changes human activities have produced in the global environment from 300 years ago to today

The Separatist Conflict in Sri Lanka Asoka Bandarage, 2008-11-19 The book provides a detailed historically based analysis of the origin evolution and potential resolution of the civil conflict in Sri Lanka over the struggle to establish a separate state in its Northern and Eastern provinces This conflict between the Sri Lankan government and the secessionist LTTE Liberation Tigers of Tamil Eelam is one of the world s most intractable contemporary armed struggles The internationally banned LTTE is considered the prototype of modern terrorism It is known to have introduced suicide bombing to the world and recently became the first terrorist organization ever to acquire an air force The iron law of ethnicity the assumption that cultural difference inevitably leads to conflict has been reinforced by the 9 11 attacks and conflicts like the one in Sri Lanka However the connections among ethnic difference conflict and terrorism are not automatic This book broadens the discourse on the separatist conflict in Sri Lanka by moving beyond the familiar bipolar Sinhala versus Tamil ethnic antagonism to show how the form and content of ethnicity are shaped by historical social forces It develops a multipolar analysis which takes into account diverse ethnic groups intra ethnic social class caste and other variables at the local regional and international levels Overall this book presents a conceptual framework useful for comparative global conflict analysis and resolution shedding light on a host of complex issues such as terrorism civil society diasporas international intervention and secessionism

Legends of People, Myths of State Bruce Kapferer, 2011-12-01 The civil war in Sri Lanka and the part that nationalism seemed to play in it inspired the writing of this book some twenty three years ago The argument was developed through a comparative analysis of nationalism in Sri Lanka with the author s native Australia At the time this constituted an innovative approach to comparison in anthropology as well as to nationalism and its possibilities It was not based on differences but on the way in which perspectives from within the two nationalisms when

seen side by side could present an understanding of their implication in producing the violence of war racism and social exclusion The book has lost none of its importance and urgency as proven by the chapters in the Appendix written by top scholars working in Sri Lanka and in Australia These contributions bring together new material and critically explore the book's themes and their continued relevance to the various trajectories in nationalist processes since the first publication of the book
