Pioneers In Flight Aer Lingus And The Story Of Aviation In Ireland:

Pioneers in Flight Niall G. Weldon, 2002 Tells the story of the men and women who were instrumental in developing the aviation industry in Ireland Niall Weldon who worked at Aer Lingus for forty two years including as the Company Secretary recalls the many challenges the fledgling industry faced **An Economic History of Ireland Since Independence** Andy Bielenberg, Raymond Ryan, 2013-05-20 This book provides a cogent summary of the economic history of the Irish Free State Republic of Ireland It takes the Irish story from the 1920s right through to the present providing an excellent case study of one of many European states which obtained independence during and after the First World War The book covers the transition to protectionism and import substitution between the 1930s and the 1950s and the second major transition to trade liberalisation from the 1960s In a wider European context the Irish experience since EEC entry in 1973 was the most extreme European example of the achievement of industrialisation through foreign direct investment The eager adoption of successive governments in recent decades of a neo liberal economic model more particularly deregulation in banking and construction has recently led the Republic of Ireland to the most extreme economic crash of any western society since the Great Depression **Deregulation and the Airline Business in Europe** Sean Barrett, 2009-05-15 Written by a longstanding expert in the field this book examines the deregulation of the airline industry and the rise of low cost airlines specifically the success of Ryanair as a key case study **Migration in Irish History 1607-2007** Patrick Fitzgerald, Brian Lambkin, 2008-10-27 Migration people moving in as immigrants around as migrants and out as emigrants is a major theme of Irish history This is the first book to offer both a survey of the last four centuries and an integrated analysis of migration reflecting a more inclusive definition of the people of Ireland **Yesterday We Were in America** Brendan Lynch, 2019-02-18 On 14 June 1919 eight years before Charles Lindbergh's flight across the Atlantic two men from Manchester took off in an open cockpit Vickers Vimy and flew into the history books They battled through a sixteen hour journey of snow ice and continuous cloud with a non functioning wireless and a damaged exhaust that made it impossible to hear each other And then just five hours away from Ireland and high above the sea the Vimy stalled Yesterday We Were in America is the incredible story of John Alcock and Arthur Whitten Brown and how they gave hope to a post war world that was in grave need of it **Iona** Michael Traynor, 2004-11 **Infrastructure and the Architectures of Modernity in Ireland 1916-2016** Gary A. Boyd, John McLaughlin, 2016-12-05 At the formation of the new Republic of Ireland the construction of new infrastructures was seen as an essential element in the building of the new nation just as the adoption of international style modernism in architecture was perceived as a way to escape the colonial past Accordingly infrastructure became the physical manifestation the concrete identity of these objectives and architecture formed an integral part of this narrative Moving between scales and from artefact to context Infrastructure and the Architectures of Modernity in Ireland 1916-2016 provides critical insights and narratives on what is a complex and hitherto overlooked landscape one which is

often as much international as it is Irish In doing so it explores the interaction between the universalising and globalising tendencies of modernisation on one hand and the textures of local architectures on the other The book shows how the nature of technology and infrastructure is inherently cosmopolitan Beginning with the building of the heroic Shannon hydro electric facility at Ardnacrusha by the German firm of Siemens Schuckert in the first decade of independence Ireland became a point of varying types of intersection between imported international expertise and local need Meanwhile at the other end of the century by the year 2000 Ireland had become one of the most globalized countries in the world site of the European headquarters of multinationals such as Google and Microsoft Climatically and economically expedient to the storing and harvesting of data Ireland has subsequently become a repository of digital information farmed in large single storey sheds absorbed into anonymous suburbs In 2013 it became the preferred site for Intel to design and develop its new microprocessor chip the Galileo The story of the decades in between of shifts made manifest in architecture and infrastructure from the policies of economic protectionism to the opening up of the country to direct foreign investment and the embracing of the EU is one of the influx of technologies and cultural references into a small country on the edges of Europe as Ireland became both a launch pad and testing ground for a series of aspects of designed modernity

Journal of the Royal Society of Antiquaries of Ireland Royal Society of Antiquaries of Ireland,2003 **International Directory of Company Histories** Jay P Pederson,Jay P. Pederson,2007-10 This multi volume series provides detailed histories of more than 8 500 of the most influential companies worldwide *Books Ireland* ,2003 **Airways** ,2004 **Journal of the Royal Historical and Archaeological Association of Ireland** Royal Society of Antiquaries of Ireland,2004 Index of archaeological papers published in 1891 under the direction of the Congress of Archaeological Societies in union with the Society of Antiquaries *Quarterly Economic Commentary* Terence J.
