Pion-nucleus Double Charge Exchange - 2nd LAMPF Workshop William R Gibbs, Michael J Leitch, 1990-09-24 What do you associate with chemistry Explosions innovative materials plastics pollution The public's confused and contradictory conception of chemistry as basic science industrial producer and polluter contributes to what we present in this book as chemistry's image as an impure science Historically chemistry has always been viewed as impure both in terms of its academic status and its role in transforming modern society While exploring the history of this science we argue for a characteristic philosophical approach that distinguishes chemistry from physics This reflection leads us to a philosophical stance that we characterise as operational realism In this new expanded edition we delve deeper into the questions of properties and potentials that are so important for this philosophy that is based on the manipulation of matter rather than the construction of theories a

Subcommittee on Public Works, 1978 Mesons And Nuclei At Intermediate Energies - Proceedings Of The International Conference Mikhail Kh Khankhasayev, Zh B Kurmanov, 1995-02-17 One of the main goals of intermediate energy nuclear physics which serves an important role as a bridge between nuclear and particle physics is to construct the theory of strong interaction phenomena in terms of conventional degrees of freedom nucleons deltas and mesons as well as of quark degrees of freedom The main topics to be discussed at this conference are the interaction of pions and other mesons with nuclei at intermediate energies and the role of mesonic degrees of freedom in nuclear reactions including photon hadron and heavy ion induced reactions Both theoretical and experimental results will be included Over the past two decades the Meson Factories including LAMPF TRIUMF and PSI have provided us with systematic experimental information on hadron hadron and hadron nucleus dynamics Major accelerators of JINR are also suitable for studying problems in Intermediate Energy Nuclear Physics At the present time first experiments have been performed with the proton beams at the Moscow Meson Factory of INR One of the purposes of this conference is to introduce the intermediate energy physics community to the possibility of utilizing the facilities of JINR and INR during the next decade **Mesons and Light Nuclei '95** J. Adam, J. Dobes, R. Mach, M. Sotona, J. Dolejsi, 2012-12-06 The International Conference Mesons and Light Nuclei organized by the Institute of Nuclear Physics INP Rez was held during July 2-7 1995 in small north Bohemian town Straz pod Ralskem It was the sixth in a series of meetings which took place previously at Liblice 74 and 81 Bechyne 85 and 88 and Prague 91 The conferences gained already their firm position among intermediate energy nuclear physics activities International nuclear physics community strongly supported our intention to continue the series This year's venue for the

conference was the accommodation and social area of the DIAMO company at Straz The goal of the meeting was to summarize the present situation and the future perspectives concerning the experimental investigations and theoretical descriptions of light nuclei and their interactions with electromagnetic and hadronic probes mainly at intermediate energies The scientific program of the conference included the following areas of research nuclear physics with pions and antiprotons T meson physics baryonic systems with strangeness relativistic few body dynamics and electroweak nuclear interaction Representatives from many international groups working within different experimental facilities and with different theoretical methods were invited and asked to present their latest results and future research programs The Straz conference attended by 102 physicist from institutions in 22 countries was sponsored by the Austrian Ministry for Science and Research Czech Ministry for Industry and Trade and by SKODA PRAHA as Thanks to this sponsorship we could also invite several participants and students at essentially reduced cost
