metallurgist and armament maker Vannoccio Biringuccio wrote history s first clear comprehensive work on metallurgy The
Pirotechnia first appeared in 1540 shortly after Biringuccio s death Lavishly illustrated it describes in detail the equipment
and processes of sixteenth century mining smelting and metalworking For centuries this famous work has been a standard
reference in the field of metals and metallurgy It is especially valuable today as a vital source of information on the state of
technology in the fifteenth and sixteenth centuries The book first addresses the principal ores gold silver copper lead tin and
iron and the making of steel and brass It then introduces semiminerals from quicksilver and sulphur to manganese and rock
crystal and describes the assaying and preparing of ores for smelting Other topics include the making of alloys the art of
casting methods of melting metals and the making of fireworks This edition of The Pirotechnia has been reprinted from the
authoritative translation published by The American Institute of Mining and Metallurgical Engineers and is complete with a
historical introduction to Biringuccio and his work It also contains reproductions of the 94 woodcuts from the original 1540
edition which depict centuries old technologies ranging from the recovery of mercury with a distilling bell to a machine for
boring guns **The Pirotechnia of Vannoccio Biringuccio** Vannoccio Biringucci,1990 *The Pirotechnia of Vannoccio*

Openness, Secrecy, Authorship Pamela O. Long,2003-04-30 A history of the book and intellectual property that
includes military technology and military secrets Winner of The Morris D Forkosch Prize from the Journal of the History of
Ideas In today s world of intellectual property disputes industrial espionage and book signings by famous authors one easily
loses sight of the historical nature of the attribution and ownership of texts In *Openness Secrecy Authorship Technical Arts*
and the Culture of Knowledge from Antiquity to the Renaissance Pamela Long combines intellectual history with the history
of science and technology to explore the culture of authorship Using classical Greek as well as medieval and Renaissance
European examples Long traces the definitions limitations and traditions of intellectual and scientific creation and attribution
She examines these attitudes as they pertain to the technical and the practical Although Long s study follows a chronological
development this is not merely a general work Long is able to examine events and sources within their historical context and

locale By looking at Aristotelian ideas of Praxis Techne and Episteme She explains the tension between craft and ideas authors and producers She discusses with solid research and clear prose the rise wane and resurgence of priority in the crediting and lionizing of authors Long illuminates the creation and re creation of ideas like trade secrets plagiarism mechanical arts and scribal culture Her historical study complicates prevailing assumptions while inviting a closer look at issues that define so much of our society and thought to this day She argues that a useful working definition of authorship permits a gradation of meaning between the poles of authority and originality and guides us through the term s nuances with clarity rarely matched in a historical study

Laboratories of Art Sven Dupré,2014-04-25 This book explores the interconnections and differentiations between artisanal workshops and alchemical laboratories and between the arts and alchemy from Antiquity to the eighteenth century In particular it scrutinizes epistemic exchanges between producers of the arts and alchemists In the fifteenth and sixteenth centuries the term laboratorium uniquely referred to workplaces in which chemical operations were performed smelting combustion distillation dissolution and precipitation Artisanal workshops equipped with furnaces and fire in which chemical operations were performed were also known as laboratories Transmutational alchemy the transmutation of all base metals into more noble ones especially gold was only one aspect of alchemy in the early modern period The practice of alchemy was also about the chemical production of things medicines porcelain dyes and other products as well as precious metals and about the knowledge of how to produce them This book uses examples such as the Uffizi to discuss how Renaissance courts established spaces where artisanal workshops and laboratories were brought together thus facilitating the circulation of materials people and knowledge between the worlds of craft today s decorative arts and alchemy Artisans became involved in alchemical pursuits beyond a shared material culture and some crafts relied on chemical expertise offered by scholars trained as alchemists Above all texts and books products and symbols of scholarly culture played an increasingly important role in artisanal workshops In these

workplaces a sort of hybrid figure was at work With one foot in artisanal and the other in scholarly culture this hybrid practitioner is impossible to categorize in the mutually exclusive categories of scholar and craftsman By the seventeenth century the expertise of some glassmakers silver and goldsmiths and producers of porcelain was just as based in the worlds of alchemical and bookish learning as it was grounded in hands on work in the laboratory This book suggests that this shift in workshop culture facilitated the epistemic exchanges between alchemists and producers of the decorative arts *Guidelines for the Technical Examination of Bronze Sculpture* David Bourgarit,Jane Bassett,Francesca Bewer,Arlen Heginbotham,Andrew Lacey,Peta Motture,2025-02-11 The essential reference for anyone engaged in the material study of cast bronze sculpture Since the fourth millennium BCE bronze has been the preferred medium for some of the most prestigious and sacred works of art But only through interdisciplinary research can the fabrication of these extraordinary objects be properly investigated interpreted and documented This innovative publication bridges the expertise of myriad art technological specialists to create a new framework for advancing the understanding of bronze sculpture Essential reading for curators conservators scientists archaeologists sculptors metallurgists founders dealers collectors and anyone interested in the life cycle of a bronze this volume explains how to identify the evidence of process steps metals used casting defects and surface work and alterations before moving on to address analytical techniques ranging from visual exams to imaging material analyses and dating The guidelines are accompanied by detailed illustrations including videos charts and animations a robust vocabulary ensuring precision across English German French Italian and Chinese a diverse selection of case studies and a comprehensive bibliography The free online edition of this open access publication is available at getty.edu/publications/bronze-guidelines and includes videos and zoomable illustrations Also available are free PDF and EPUB downloads of the book **Encyclopedia of Renaissance Philosophy** Marco Sgarbi,2022-10-27 Gives accurate and reliable summaries of the current state of research It includes entries on philosophers problems terms historical periods subjects and the cultural context of Renaissance Philosophy Furthermore it covers Latin Arabic Jewish Byzantine and vernacular philosophy and includes entries on the cross fertilization of these philosophical traditions A unique feature of this encyclopedia is that it does not aim to define what Renaissance philosophy is rather simply to cover the philosophy of the period between 1300 and 1650 **De la pirotechnia : 1550** ,1550 Development of the Metal Castings Industry Bruce Liston Simpson,1948
