Pitfalls In Human Research Ten Pivotal Points:

Pitfalls in Human Research Theodore Xenophon Barber, 1976-01-01 *Pitfalls in Human Research* Theodore Xenophon Barber, 2013-10-22 *Pitfalls in Human Research* examines 10 ten pivotal points in human research where investigators and experimenters can go astray Two questions are addressed At what pivotal points in the complex research process can the experimental study go astray and give rise to misleading results and conclusions What steps can researchers take to avoid these pitfalls To answer these questions those aspects of experimental studies that are under the control of the investigator as well as those aspects that are under the control of the experimenter are examined This book begins by making a distinction between the investigator and the experimenter arguing that their roles are functionally quite different The discussion then turns to the 10 pitfalls in human research divided into investigator effects and experimenter effects investigator paradigm effect investigator experimental design effect investigator loose procedure effect investigator data analysis effect investigator fudging effect experimenter personal attributes effect experimenter failure to follow the procedure effect experimenter misrecording effect experimenter fudging effect and experimenter unintentional expectancy effect This monograph will be a useful resource for both investigators and experimenters as well as those who utilize research results in their teaching or practice

The Nature of Learning Disabilities Kenneth A. Kavale, Steven R. Forness, 2012-12-06 The category of learning disabilities continues to be among the most contentious in special education Much of the debate and dissent emanates from a lack of understanding about its basic nature The failure to evolve a comprehensive and unified perspective about the nature of learning disabilities has resulted in the concept being lost The loss is best illustrated through the failure to answer this seemingly simple question What is a learning disability Using historical empirical theoretical conceptual and philosophical analyses this volume explores a number of problems and issues facing the field of learning disabilities The chapters cover historical influences definitional problems primary characteristics assessment practices theoretical development major themes research and measurement models and long term outcomes The goal is to explicate the nature of learning disabilities by analyzing what it was supposed to be what it has become and what it might be A predominant theme running through this text is the necessity for the field of learning disabilities to regain integrity by recapturing its essence

The Idea of Psychology Boon Kheng Cheah, 1987 *Red Star Over Malaya* is an account of the inter racial relations between Malays and Chinese during the final stages of the Japanese occupation. In 1947 none of the three major race of Malaya Malays Chinese and Indians regarded themselves as pan ethnic Malayans with common duties and problems. With the occupation forcibly cut them off from China Chinese residents began to look inwards towards Malaya and stake political claims leading inevitably to a political contest with the Malays. As the country advanced towards nationhood and self government there was tension between traditional loyalties to the Malay rulers and the states or to ancestral homelands elsewhere and the need to cultivate an enduring loyalty to Malaya on the part of those who would make their home there in future. As Japanese forces withdrew from the countryside the Chinese guerrillas of the communist led resistance movement the Malayan People's Anti Japanese Army MPAJA emerged from the jungle and took control of some 70 per cent of the country's smaller towns and villages seriously alarming the Malay population. When the British Military Administration sought to regain control of these liberated areas the ensuing conflict set the tone for future political conflicts and marked a crucial stage in the history of Malaya. Based on extensive archival research *Red Star Over Malaya* provides a riveting account of the way the Japanese occupation reshaped colonial Malaya and of the tension filled months that followed Japan's surrender. This book is fundamental to an understanding of social and political developments in Malaysia during the second half of the 20th century.

Understanding Cross-Cultural Psychology Pittu D Laungani, 2007-01-19 This unique textbook eloquently introduces students to international perspectives on cross cultural psychology both Eastern and Western cultures adopting a truly accessible narrative approach throughout. Handbook of Intercultural Training Dan Landis, Richard W. Brislin, 2013-09-17 *Handbook of Intercultural Training Volume I Issues in Theory and Design* is a compilation of nine essays dealing with a problem central to today's complex world. How can people best live and work with others who come from very different cultural backgrounds? The major focus of the nine essays in this book is the experience of living and working for long periods in other cultures. The book also focuses on other types of cross cultural experiences such as majority minority group relations training and preparation and integration. There are analyses of possible experiences people may have such as stress during adjustments. Other authors in this book address the benefits of intercultural action and integration into a country's educational system. International education is seen to benefit through a greater attention to face to face cross cultural experience. The first seven essays are good descriptions of intercultural behavior and training while Chapter 8 is an evaluation of cross cultural training. The last chapter describes the atlas of affective meanings containing 620 concepts from 30 languages culture communities for use in intercultural training and education. Behavioral and social scientists trainers and cross cultural scientists overseas businessmen foreign students

diplomats immigrants and other people who work in different cultures will find this handbook very helpful **Research Issues in Learning Disabilities** Sharon Vaughn, Candace S. Bos, 2012-12-06 In this chapter we described issues in conducting intervention research with students with learning disabilities on the secondary level We maintained that interventions should be well grounded in theories of learning as well as characterizations of learning disabilities Pressley Scruggs that they should first be conducted in a series of highly controlled laboratory like experiments to carefully assess the potential utility of the intervention and that if the intervention is successful in highly controlled settings it should then be evaluated in classroom applications We maintained that research designs should evolve as the research questions become more applied and that the results of laboratory research should be used to support the findings of classroom applications Finally we described several research designs that we have found useful in conducting classroom intervention research There is a great deal more to conducting intervention research of course than experimental or quasi experimental design Intervention strategies likely to be effective must be identified relevant literature must be reviewed experimental materials must be developed and cooperative schools teachers parents and students must be located Nevertheless inadequate research designs can invalidate the best and most successful efforts in all of these areas while effective and practical research designs can do much to document the best practices and advance our knowledge of effective interventions with students with learning disabilities References Brigham F J Scruggs T E Mastropieri M A 1992 **Dictionary of Theories, Laws, and Concepts in Psychology** Jon Roedelein, 1998-10-28 Fully cross referenced and source referenced this dictionary contains over 1200 entries consisting of terms concerning laws theories hypotheses doctrines principles and effects in early and contemporary psychological literature Each entry consists of the definition description of the term with commentary followed by a number of cross referenced related terms and by chronologically ordered source references to indicate the evolution of the term An appendix provides supplementary material on many laws and theories not included in the dictionary itself and will be helpful to students and scholars concerned with specialty areas in psychology *Parapsychology* Caroline Watt, 2017-07-05 Many people believe that they have experienced paranormal phenomena and others claim to possess psychic abilities For the past hundred years or so researchers have undertaken systematic and scientific work into these alleged experiences and abilities This collection of articles provides readers with a general sense of the methods used in this research the findings that have been obtained and the controversies generated by this work They cover a wide range of issues including the psychology of paranormal belief investigations into ghosts and hauntings laboratory research into extra sensory perception and psychokinesis and controlled tests of psychics and mediums An introductory essay sets each of the selected papers in context and provides additional references for those wishing to delve deeper into the issues surrounding each of the areas covered *Biofeedback* Mark S. Schwartz, Frank Andrasik, 2005-06-20 The definitive text in the field this comprehensive volume provides state of the science coverage of biofeedback research applications clinical procedures and

biomedical instrumentation With contributions from leading experts the volume offers a unique combination of practical know how and scholarly expertise A wealth of information is presented in an accessible streamlined style including helpful glossaries throughout Featured are detailed protocols for helping patients cultivate lower physiological arousal and for addressing an array of specific clinical problems headaches temporomandibular disorders Raynaud s disease essential hypertension neuromuscular problems elimination disorders and much more
