Place In The Sun Marxism And Fascism In Chinas Long Revolution:

A Place In The Sun A. James Gregor, 2019-04-16 China has endured a century of turmoil beginning with the anti dynastic revolution associated with Sun Yat Sen through the military and tutelary rule of Chiang Kai shek the revolutionary regime of Mao Zedong and the radical reforms of Deng Xiaoping China has had little respite Historians and social scientists have attempted to understand some of this history as being the consequence of the impact of European ideologies including Marxism Marxism Leninism and Fascism Rarely instructive or persuasive the discussions regarding this issue have more often than not led to puzzlement rather than enlightenment In *A Place in the Sun* A James Gregor offers an interpretation of the role of European Marxist and Fascist ideas on China s revolutionaries that is both original and based on a lifetime of scholarship devoted to revolutionary ideologies Gregor renders a detailed analysis of their respective influence on major protagonists In the exposition Gregor reveals an unsuspected and complex set of relationships between the Chinese revolution and essentially European ideologies His discussion concludes with a number of estimations that suggest implications for the future of modern China and its relationship with the advanced industrial democracies How post Dengist China the world s most populous nation is to be understood remains uncertain to most comparativists and historians Gregor provides one well supported alternative and he is carefully attentive to the implications of this alternative [Marxism and the Making of China](#) J. Gregor, 2014-02-19 An assessment of the influence of the Marxism of Karl Marx and Friedrich Engels on revolutionary developments in China The work covers the period from the first appearance of the Chinese Communist Party under Mao Zedong until its full transformation by Deng Xiaoping into a nationalist developmental single party developmental dictatorship **China's Conservative Revolution** Brian Tsui, 2018-04-19 In this ambitious examination of the complex political culture of China under Guomindang rule Brian Tsui interweaves political ideologies intellectual trends social movements and diplomatic maneuvers to demonstrate how the Chinese revolution became conservative after the anti Communist coup of 1927 Dismissing violent struggles for class equality as incompatible with nationalist goals Chiang Kai shek s government should Tsui argues be understood in the context of the global ascendance of radical right wing movements during the inter war period The Guomindang s revolutionary nation building and modernization project struck a chord with China s reformist liberal elite who were wary of mob rule while its obsession with Eastern spirituality appealed to Indian nationalists fighting Western colonialism The Nationalist vision was defined by the party state s hostility to communist challenges as much as by its ability to co opt liberalism and Pan Asianist anti colonialism Tsui s revisionist reading revisits the peculiarities of the Guomindang s revolutionary enterprise resituating Nationalist China in the moment of global radical right ascendancy *Fascism Past and Present, West and East* Roger Griffin, Werner Loh, Andreas Umland, 2006-04-27 In the opinion of some historians the era of fascism ended with the deaths of Mussolini and Hitler Yet the debate about its nature as a historical phenomenon and its value as a term of historical analysis continues to rage with ever greater intensity each

major attempt to resolve it producing different patterns of support dissent and even hostility from academic colleagues Nevertheless a number of developments since 1945 not only complicate the methodological and definitional issues even further but make it ever more desirable that politicians journalists lawyers and the general public can turn to experts for a heuristically useful and broadly consensual definition of the term These developments include the emergence of a highly prolific European New Right the rise of radical right populist parties the flourishing of ultra nationalist movements in the former Soviet empire the radicalization of some currents of Islam and Hinduism into potent political forces and the upsurge of religious terrorism Most monographs and articles attempting to establish what is meant by fascism are written from a unilateral authoritative perspective and the intense academic controversy the term provokes has to be gleaned from reviews and conference discussions The uniqueness of this book is that it provides exceptional insights into the cut and thrust of the controversy as it unfolds on numerous fronts simultaneously clarifying salient points of difference and moving towards some degree of consensus Twenty nine established academics were invited to engage with an article by Roger Griffin one of the most influential theorists in the study of generic fascism in the Anglophone world The resulting debate progressed through two rounds of critique and reply forming a fascinating patchwork of consensus and sometimes heated disagreement In a spin off from the original discussion of Griffin s concept of fascism a second exchange documented here focuses on the issue of fascist ideology in contemporary Russia This collection is essential reading for all those who realize the need to provide the term fascism with theoretical rigor analytical precision and empirical content despite the complex issues it raises and for any specialist who wants to participate in fascist studies within an international forum of expertise The book will change the way in which historians and political scientists think about fascism and make the debate about the threat it poses to infant democracies like Russia more incisive not just for academics but for politicians journalists and the wider public

China and Orientalism Daniel Vukovich, 2013-06-17 This book argues that there is a new Sinological form of orientalism at work in the world It has shifted from a logic of essential difference to one of sameness or general equivalence China is now in a halting but inevitable process of becoming the same as the USA and the West Orientalism is now closer to the cultural logic of capitalism even as it shows the afterlives of colonial discourse This shift reflects our era of increasing globalization the migration of orientalism to area studies and the pax Americana the liberal triumph at the end of history and the demonization of Maoism an ever closer Sino West relationship and the overlapping of anti communist and colonial discourses To make the case for this re constitution of orientalism this work offers an inter disciplinary analysis of the China field broadly defined Vukovich takes on specialist work on the politics governance and history of the Mao and reform eras from the Great Leap Forward to Tiananmen 1989 the Western study of Chinese film recent work in critical theory which turns on the China reference and other global texts about or from China Through extensive analysis the production of Sinological knowledge is shown to be of a piece with Western global intellectual political culture This work will be of great interest to scholars of Asian

Nation Margherita Zanasi, 2010-02-15 Economic modernity is so closely associated with nationhood that it is impossible to imagine a modern state without an equally modern economy Even so most people would have difficulty defining a modern economy and its connection to nationhood In Saving the Nation Margherita Zanasi explores this connection by examining the first nation building attempt in China after the fall of the empire in 1911 Challenging the assumption that nations are products of technological and socioeconomic forces Zanasi argues that it was notions of what constituted a modern nation that led the Nationalist nation builders to shape China's institutions and economy In their reform effort they confronted several questions What characterized a modern economy What role would a modern economy play in the overall nation building effort And how could China pursue economic modernization while maintaining its distinctive identity Zanasi expertly shows how these questions were negotiated and contested within the Nationalist Party Silenced in the Mao years these dilemmas are reemerging today as a new leadership once again redefines the economic foundation of the nation **The**

Search for Neofascism A. James Gregor, 2006-03-27 Publisher description **The Intellectual Foundations of Chinese Modernity** Edmund S. K. Fung, 2010-03-22 In the early twentieth century China was on the brink of change Different ideologies those of radicalism conservatism liberalism and social democracy were much debated in political and intellectual circles Whereas previous works have analyzed these trends in isolation Edmund S. K. Fung shows how they related to one

another and how intellectuals in China engaged according to their cultural and political persuasions The author argues that it is this interrelatedness and interplay between different schools of thought that are central to the understanding of Chinese modernity for many of the debates that began in the Republican era still resonate in China today The book charts the development of these ideologies and explores the work and influence of the intellectuals who were associated with them In its challenge to previous scholarship and the breadth of its approach the book makes a major contribution to the study of Chinese political philosophy and intellectual history

From Benito Mussolini to Hugo Chavez Paul

Hollander,2017-01-05 During the twentieth and twenty first centuries political dictators were not only popular in their own countries but were also admired by numerous highly educated and idealistic Western intellectuals The objects of this political hero worship included Benito Mussolini Adolph Hitler Joseph Stalin Mao Zedong Fidel Castro and more recently Hugo Chavez among others This book seeks to understand the sources of these misjudgements and misperceptions the specific appeals of particular dictators and the part played by their charisma or pseudo charisma It sheds new light not only on the political disposition of numerous Western intellectuals such as Martin Heidegger Eric Hobsbawm Norman Mailer Ezra Pound Susan Sontag and George Bernard Shaw but also on the personality of those political leaders who encouraged and in some instances helped to design the cult surrounding their rise to dictatorship

The Political Economy of Heaven and Earth in Ghana Charles Prempeh, 2023-09-30 In March 2017 the president of Ghana Nana Addo Dankwa Akufo announced his intention to build a national cathedral to the people of Ghana The announcement elicited watertight counter arguments that morphed into two a priori re litigated assumptions First Ghana is a secular country and second religion and state formation are incompatible Informed by a frustrating paradox of an overwhelming religious presence and concurrent pervasive corruption in the country public conversation reached a cul de sac of conviction without compromising In The Political Economy of Heaven and Earth in Ghana Charles Prempeh deploys the national cathedral as an entry point to provide both interdisciplinary and autoethnographic understanding of religion and politics The book shows the capacity of religion when properly cultivated and curated as a worldview to answer the why questions of life will foster personal moral collective and ontological responsibility All this is needed to stem the tide against corruption commodity fetishism environmental degradation illegal mining galamsey heritage destruction and religious exploitation Prempeh recuperates a historical fact about the mutual inclusivity between religion and politics politics helping to manage differences while religion provides a transcendental reason for unity to be forged for human flourishing Separating the two is therefore ahistorical and an obvious threat to the intangible virtues that answers why and how questions for public governance

Marxism, Fascism, and Totalitarianism A. James Gregor, 2008-10-08 This work traces the changes in classical Marxism the Marxism of Karl Marx and Friedrich Engels that took place after the death of its founders It outlines the variants that appeared around the turn of the twentieth century one of which was to be of influence among the followers of Adolf Hitler another of which was to shape the ideology of Benito Mussolini and still another of which provided the doctrinal rationale for V I Lenin's Bolshevism and Joseph Stalin's communism This account differs from many others by rejecting a traditional left right distinction a distinction that makes it difficult to understand how totalitarian political institutions could arise out of presumably diametrically opposed political ideologies Marxism Fascism and Totalitarianism thus helps to explain the common features of left wing and right wing regimes in the twentieth century

On Xi Jinping Kevin Rudd, 2024-09-17 An authoritative account of Xi Jinping's worldview and how it drives Chinese behaviour both domestically and on the world stage In his new book On Xi Jinping former Australian Prime Minister Kevin Rudd provides an authoritative account of the ideological worldview driving Chinese behaviour both domestically and on the world stage that of President Xi Jinping who now hold near total control over the

Chinese Communist Party and is now in effect president for life Rudd argues that Xi's worldview differs significantly from those of the leaders who preceded him and that this ideological shift is reflected in the real world of Chinese policy and behaviour Focusing on China's domestic politics political economy and foreign policy Rudd characterises Xi Jinping's ideological framing of the world as Marxist Leninist nationalism According to Rudd Xi's notion of Leninism has taken the party and Chinese politics further to the left in comparison to his predecessors Also his Marxism has also taken Chinese economic thinking to the left in a more decisively more statist direction and away from the historical dynamism of the private sector However Chinese nationalism under Xi has moved further to the right towards a much harder edged foreign policy vision of China and a new determination to change the international status quo Xi's worldview is an integrated one where his national ideological vision for China's future is ultimately inseparable from his view on China's position in the region and the world These changes in worldview are also reflected in Xi's broader rehabilitation of the concept of struggle as a legitimate concept for the conduct of both Chinese domestic and foreign policy a struggle that need not necessarily always be peaceful Finally Xi's ideological worldview also exhibits a new level of nationalist self confidence about China's future derived from China's historical and civilizational strengths but reinforced by his Marxist Leninist concept of historical determinism and the belief that the tides of history are now on firmly China's side A powerful analysis of the worldview of arguably the most consequential world leader of our era this will be essential reading for anyone interested in how Xi is transforming both China and the international order and most importantly why

The New Chinese Empire Ross Terrill, 2009-03-05 Some observers expect China to become an economic superpower Others expect it to fragment into pieces Is China nationalistic and on the march or is it a stumbling Communist dinosaur Is it already a billion citizen member of the global village Is it as the Clinton administration claimed a strategic partner of the U S Ross Terrill addresses the question upon which all these others depend Is the People's Republic of China whose polity is a hybrid of Chinese tradition and Western Marxism willing to become a modern nation or does it insist on remaining an empire Since the collapse of three thousand years of Confucian monarchy in 1911 China has neither established a successful political system nor adjusted to being a nation state Today it stands as the most contradictory of major powers hovering between an unsustainable tradition and a yet to be born political form that would support its new society and economy Hanging in the balance are the prospect for freedom within China for both Chinese and non Chinese citizens of the People's Republic the future of America's relations with China and the security of China's neighbors Drawing upon Terrill's long experience studying China as well as upon new research this enlightening and rigorous book will be a must read for everyone who has a stake in the future of the global world order

The Oxford Handbook of Economic Imperialism Zak Cope, Immanuel Ness, 2022 Including thirty four chapters written by academics and experts in the field of international political economy The Oxford Handbook of Economic Imperialism examines the history of economic imperialism from the early modern age to the present The Handbook demonstrates the persistence of economic

imperialism in today's postcolonial world and the enduring control wielded by great powers even after the end of formal empire. Moreover, the Handbook reveals how emerging powers are expanding economic control in new geographic and geopolitical contexts and highlights the significance of economic imperialism in the structures, relations, processes, and ideas that sustain poverty and conflict worldwide.

Antiliberal Internationalism in the Twentieth Century Matthijs Lok, Marjet Brolsma, Robin de Bruin, Stefan Couperus, Rachel McElroy White, 2025-05-21. This book shows how antiliberal discourse, thought, and mobilization have, in defiance of nationalist aims, been significantly shaped and determined in the international sphere as new collaborations position themselves against the liberal order established after the fall of the Berlin Wall. Despite often drawing inspiration from nationalist movements and ideologies, antiliberalism is a phenomenon that transcends domestic contexts and settings in important ways. This collection of essays charts the many-sided aspects of twentieth-century internationalism and its contemporary developments across the globe. Without excluding well-known European sources of antiliberal internationalism, it decentres the European experience by exploring specific case studies from South and East Asia, the Middle East, the Americas, Africa, and Oceania. Moreover, the volume abundantly demonstrates that liberalism and anti-liberalism cannot be considered as fixed entities; as anti-liberalism was and is as much defined by its enemies as by its advocates. This book is intended for scholars and students of International Studies, Intellectual History, Political History, Political Science, European Studies, and Global Studies, as well as for journalists and policymakers interested in contemporary Europe, cosmopolitanism, political polarization, and the traditions of the right and far right.

This volume deals with the term as a concept and traces its evolution over almost a century as it has been employed virtually every place on the globe. It has been applied to Xi Jinping's China, Vladimir Putin's Russia, and to Donald Trump's presidency in the United States. Written in a clear style free of unnecessary jargon, the account is fully accessible to both professionals and lay persons. An Addendum to the text provides social science professionals with a bibliography that covers virtually all the major works dealing with Fascism as an ideology.
