Teaching Each Other, Enhanced Edition Linda M. Goulet, Keith N. Goulet, 2024-11-15 In recent decades educators have been seeking ways to improve outcomes for Indigenous students Yet most Indigenous education still takes place within a theoretical framework based in Eurocentric thought In Teaching Each Other Linda Goulet and Keith Goulet provide an alternative framework for teachers working with Indigenous students one that moves beyond acknowledging Indigenous culture to one that actually strengthens Indigenous identity Drawing on Nehinuw Cree concepts such as kiskinaumatowin or teaching each other Goulet and Goulet provide a new approach to teaching Indigenous students Kiskinaumatowin transforms the normally hierarchical teacher student relationship by making students and teachers equitable partners in education Enriched with the success stories of educators who are applying Nehinuw concepts in Saskatchewan Canada this book demonstrates how this framework works in practice The result is an alternative teaching model that can be used by teachers anywhere who want to engage with students whose culture may be different from the mainstream This enhanced edition also includes audio pronunciations of each Cree word as well as a glossary of Cree words and their meanings

Writing in Dust Jenny Kerber, 2011-03-17 Writing in Dust is the first sustained study of prairie Canadian literature from an ecocritical perspective Drawing on recent scholarship in environmental theory and criticism Jenny Kerber considers the ways in which prairie writers have negotiated processes of ecological and cultural change in the region from the early twentieth century to the present The book begins by proposing that current environmental problems in the prairie region can be understood by examining the longstanding tendency to describe its diverse terrain in dualistic terms either as an idyllic natural space or as an irredeemable wasteland It inquires into the sources of stories that naturalize ecological prosperity and hardship and investigates how such narratives have been deployed from the period of colonial settlement to the present It then considers the ways in which works by both canonical and more recent writers ranging from Robert Stead W O Mitchell and Margaret Laurence to Tim Lilburn Louise Halfe and Thomas King consistently challenge these dualistic landscape myths proposing alternatives for the development of more ecologically just and sustainable relationships among people and between humans and their physical environments Writing in Dust asserts that reading environmentally can help us to better understand a host of issues facing prairie inhabitants today including the environmental impacts of industrial agriculture resource extraction climate change shifting urban rural demographics the significance of Indigenous understandings of human nature relationships and the complex often contradictory meanings of eco cultural metaphors of alien invasiveness hybridity and wildness
