Plains Of The Great West Their Inhabit:

Mestengo Melinda Roth, 2013-09-18 Exhausted by her job as a political press secretary Melinda Roth found the courage to escape Her goal a simpler life in rural Illinois that would let her pursue her passion for writing But then real life intervened A fire at a neighboring farm and a misinterpreted gesture of kindness transformed her into the reluctant caretaker of a homeless menagerie of animals Roth coauthor of the New York Times bestseller *From Baghdad with Love* writes vividly movingly and often humorously of the chaos that descended into her life One of her new tenants was a wild mustang broken but not bowed his restless spirit propelling him to escape the fences and pens that enclosed him a far different life than before he was violently captured by a government sponsored round up Ultimately these two fiercely independent characters each provide the catalyst for the other s life changing and life affirming decisions Mestengo is a captivating emotional account that taps into readers love of animals Marley and Me meets *The Horse Whisperer* An entertaining and delightful read it is a cinematic sometimes tense but always beautiful story of the power of healing

American Society of Civil Engineers American Society of Civil Engineers, 1878 **Ecology and Ethnogenesis** Adam R. Hodge, 2019-04-01 In *Ecology and Ethnogenesis* Adam R. Hodge argues that the Eastern Shoshone tribe now located on the Wind River Reservation in Wyoming underwent a process of ethnogenesis through cultural attachment to its physical environment that proved integral to its survival and existence. He explores the intersection of environmental indigenous and gender history to illuminate the historic roots of the Eastern Shoshone bands that inhabited the intermountain West during the nineteenth century. Hodge presents an impressive longue d'ur e narrative of Eastern Shoshone history from roughly 1000 CE to 1868, analyzing the major developments that influenced Shoshone culture and identity. Geographically spanning the Great Basin, Rocky Mountain, Columbia Plateau, and Great Plains regions, *Ecology and Ethnogenesis* engages environmental history to explore the synergistic relationship between the subsistence methods of indigenous people and the lands that they inhabited prior to the reservation era. In examining that history, Hodge treats Shoshones, other Native peoples, and Euroamericans as agents who, through their use of the environment, were major components of much broader ecosystems. The story of the Eastern Shoshones over eight hundred years is an epic story of ecological transformation, human agency, and cultural adaptation. *Ecology and Ethnogenesis* is a major contribution to environmental history, ethnohistory, and Native American history. It explores Eastern Shoshone ethnogenesis based on interdisciplinary research in history, archaeology, anthropology, and the natural sciences, in devoting more attention to the dynamic and often traumatic history of precontact Native America and to how the deeper past profoundly influenced the postcontact era. accept the reality of human induced climate change would have to agree that the topic has become inescapable in the United States in recent decades But as Joseph Giacomelli shows in *Uncertain Climes* this is actually nothing new as far back as Gilded Age America climate uncertainty has infused major debates on economic growth and national development In this ambitious examination of late nineteenth century understandings of climate Giacomelli draws on the work of scientists foresters surveyors and settlers to demonstrate how central the subject was to the emergence of American modernity Amid constant concerns about volatile weather patterns and the use of natural resources nineteenth century Americans developed a multilayered discourse on climate and what it might mean for the nation s future Although climate science was still in its nascent stages during the Gilded Age fears and hopes about climate change animated the overarching political struggles of the time including expansion into the American West Giacomelli makes clear that uncertainty was the common theme linking concerns about human induced climate change with cultural worries about the sustainability of capitalist expansionism in an era remarkably similar to the United States unsettled present *American Indian Wars* Justin D.
