Plan-making for Sustainability Neil J. Ericksen, Philip R. Berke, Jennifer E. Dixon, 2017-07-05 Around the introduction of Agenda 21 at Rio in 1991 some countries like the Netherlands and New Zealand were already leading the way with quite innovative approaches to environmental planning Focusing on the New Zealand government s innovations in sustainable and environmental planning particularly the Resource Management Act of 1991 this book highlights planning and governance under devolved and co operative mandates It uses multiple methods to evaluate the quality of policy statements and district plans prepared by regional and local councils respectively as well as the various inter and intra organizational and institutional factors affecting them It also analyses the quality of the plans implementation through the consensus or permits process and the quality of the environmental outcomes

Brooklyn's Bushwick - Urban Renewal in New York, USA Raymond Charles Rauscher, Salim Momtaz, 2014-05-05 This book offers an extended case study of the urban community of Bushwick located in the Brooklyn borough of New York City The authors begin with a broad review of the history of Bushwick and Brooklyn from before the earliest European settlements of the 1600s through the 18th and 19th centuries and up the 1960s Chapter Two begins by tracing the steep decline of the community which culminated in catastrophic fires and looting in the wake of New York s electrical blackout of 1977 and goes on to describe the beginnings of urban planning and renewal efforts which launched the recovery of Bushwick in the 1980s to early 2000s Chapter Three steps back from the immediacy of the community to discuss urban change from a theoretical perspective The authors outline

advances in sustainable urban planning and describe how these apply to Bushwick and the wider Brooklyn community Chapter Four offers a detailed examination of the intent and function of New York's community board planning system known as the Charter 197 a program In Chapter Five the authors examine the 197 a planning process and its application in the areas of Bushwick Williamsburg and Greenpoint in Northeast Brooklyn Brooklyn Downtown and in Southeast Brooklyn including Coney Island The following chapter examines a number of innovative Bushwick high schools that offer practical experience in urban planning Drawing the urban planning experiences together the book concludes with a look at future directions in city renewal Emphasis here is placed on sustainable urban planning and the lessons to be learned from the experience of Bushwick and Brooklyn The specifics of urban planning and renewal are illustrated with tables and figures The details of planning are informed by an overarching sense of history beginning with the dedication of the book to the memory of six Universalist writers associated with New York Henry Thoreau Helena Blavatsky Henry George Henry Miller Arthur Miller and Walt Whitman A rich trove of historical materials ranging from family sketches to school rosters to rarely seen photographs helps to keep the survey and analysis of urban planning grounded in the lives of Bushwick's residents past present and future

Strategic Environmental Assessment and Land Use Planning Michael Short, Mark Baker, Jeremy Carter, Stephen Jay, Carys Jones, 2013-06-17 A wonderfully international and up to date perspective on strategic environmental assessment of land use plans by leading experts in the field Strategic Environmental Assessment and Land Use Planning covers not only how much such SEAs are carried out and in what context but whether they are effective and why It provides invaluable insights for practitioners and researchers in this rapidly evolving field Riki Therivel author of Strategic Environmental Assessment in Action Strategic Environmental Assessment and Land Use Planning provides an authoritative international evaluation of the SEA of land use plans The editors place the SEA of land use plans in context and uniquely qualified contributors then evaluate systems in Canada Denmark Germany Hong Kong Hungary Ireland The Netherlands New Zealand Portugal South Africa Sweden the United Kingdom the United States and the World Bank These chapters provide a description of the context in each country a case study of the use of SEA in land use planning and an evaluation of each SEA system against a set of generic criteria specially designed to analyse different aspects of SEA The contributors critically review each SEA system SEA process and SEA outcome and conclude by summarizing their findings The editors draw the various national perspectives together in a final chapter and derive widely applicable conclusions about SEA and land use planning This book is a core text for all students in environmental assessment land use planning environmental science environmental management development studies geography landscape design and law and engineering It is also essential reading for all governments and environmental regulators academics researchers and environmental and planning consultants worldwide who are involved in SEA research practice and training

Town and Country Planning in the UK Barry Cullingworth, Vincent Nadin, 2006-10-16 This revised fourteenth edition reinforces this

title's reputation as the bible of British planning. It provides a thorough explanation of planning processes including the institutions involved, tools, systems, policies, and changes to land use.

Handbook of Strategic Environmental Assessment Barry Sadler, Jiri Dusik, Thomas Fischer, Maria Partidario, Rob Verheem, Ralf Aschemann, 2012-09-10. This authoritative handbook surveys the full breadth and depth of SEA, bringing together a range of international perspectives and insights on the theoretical, methodological, and institutional dimensions and practical issues of the field. It then subjects this conventional wisdom to a critical reappraisal, looks at the vast lessons of experience, and offers new ideas and interpretations as to where the field is going. The volume is organized into six major sections, beginning with an introduction and overview of the development of the field and a framework for evaluating SEA good practice. Part I comprises a review of SEA frameworks in leading countries: Australia, Canada, New Zealand, and the USA; the European Union; and developing regions: Africa, Asia, Latin America, and Newly Independent States. Part II reviews SEA practice in several major sectors: energy, minerals, transport, water, development assistance, and coastal zone management. Part III addresses the linkages between SEA and other comparable tools, such as spatial planning and environmental management. Part IV probes key cross-cutting issues in SEA, including how to address cumulative and trans-boundary effects. Part V identifies ways and means of SEA process and capacity development, focusing on how to improve and upgrade the theory and practice of the field. Part VI examines the shift from conventional SEA towards more integrative approaches, drawing on experience and examples from a number of countries. Published with IAIA.

The Routledge Handbook of International Planning Education Nancey Green Leigh, Steven P. French, Subhrajit Guhathakurta, Bruce Stiftel, 2019-07-23. The Routledge Handbook of International Planning Education is the first comprehensive handbook with a unique focus on planning education. Comparing approaches to the delivery of planning education by three major planning education accreditation bodies in the United States, Australia, and the United Kingdom, and reflecting concerns from other national planning systems, this handbook will help to meet the strong interest and need for understanding how planning education is developed and delivered in different international contexts. The handbook is divided into five major sections, including coverage of general planning knowledge, planning skills, traditional and emerging planning specializations, and pedagogy. An international cohort of contributors covers each subject's role in educating planners, its theory and methods, key literature, contributions, and course design. Higher education's response to globalization has included growth in planning educational exchanges across international boundaries. The Routledge Handbook of International Planning Education is an essential resource for planners and planning educators, informing the dialogue on the mobility of planners educated under different national schemas.

Sustainable Neighbourhoods in Australia Raymond Charles Rauscher, Salim Momtaz, 2015-04-21. This book examines the planning and implementation of policies to create sustainable neighborhoods, using as a case study the City of Sydney. The authors ask whether many past planning and development practices were appropriate to the ways that communities then functioned, and what lessons we

have learned The aim is to illustrate the many variations within a city and from neighborhood to neighborhood regarding renewal rehabilitation redevelopment replacement and new development Case study examples of nine City of Sydney neighborhoods note the different histories of planning and development in each Features of the studies include literature searches field work with photography and analysis The authors propose a set of sustainability principles which incorporate elements of the twenty seven principles of the 1992 Rio Declaration on Environment and Development Part One explores sustainable urban planning and the importance of planning tools that enable best planning outcomes for communities and investors Common factors in the nine case study neighborhoods are renewal redevelopment and development pressures affecting Sydney from the 1970s to 2014 Also discussed are the differing circumstances of planning faced by authorities developers and communities in each of the study areas Part Two of the book is focused on the case study areas in City of Sydney East area Woolloomooloo and Kings Cross Part Three covers case study areas in Sydney s Inner South area Chippendale Redfern and Waterloo District Part Four surveys the Inner West suburb of Erskineville Part Five looks at the City West area including the Haymarket District and the Pyrmont and Ultimo District Part Six concentrates on the North West area suburb of Glebe Part Seven of the book looks at the growth area of South Sydney District which includes the suburbs of Beaconsfield Zetland and the new localities of Victoria Park and Green Square The authors recount lessons learned and outline directions of planning for sustainable neighborhoods Finally the authors challenge readers to apply the lessons of these case studies to further advances in sustainable urban planning

Sustainable Communities: A Framework for Planning Raymond Charles Rauscher, Salim Momtaz, 2013-10-13 This book is in part a response to the attempts of governments to address increasing concerns over such environmental issues as the impact of climate change carbon emissions pressures from overpopulation of cities coal seam gas extraction and depleting natural resources The authors have developed a Sustainable Communities Framework SCF which incorporates social cultural environmental and economic sustainability principles in the process of urban planning The authors propose a five step SCF built on an application of sustainability tables The book examines a wide range of urban planning practices utilizing sustainability criteria outlining both qualitative and quantitative tools Separate chapters discuss application of the SCF to both the natural environment and the built environment This framework is applied to a case study of the outer Sydney growth area of Wyong Shire Central Coast NSW Australia Addressing the question of how best to measure the environment the authors present a table for selecting indicators of sustainability and outline sustainability scorecards which use color coded ratings of green red and amber to measure indicators of sustainability The authors show how aggregating these ratings allows the framework to be scaled up for application to larger areas Finally the authors show how scorecards can be incorporated in sustainability reports with actions and monitoring components The authors also examine urban planning education including land use planning natural resource planning and sustainable urban planning focusing on the extent to which schools incorporate

principles of sustainability The authors offer their critique on the movement of planning practices towards a more coordinated and holistic framework in incorporating sustainability principles Sustainable Communities A Framework for Planning concludes by drawing a future scenario on the application of the SCF to incorporate principles of sustainability into urban planning The authors propose future options for SCF applications including adopting a systems program environmental performance monitoring and showing how the framework will accommodate the social cultural and economic components of sustainability in addition to the environmental ones as examined in the case study

Dialogues in Urban and Regional Planning Thomas L. Harper, Anthony G. O. Yeh, Heloisa Soares de Moura Costa, 2008

Decentralization in Environmental Governance Christian Zuidema, 2016-10-04

Decentralization in Environmental Governance is a critical reflection on the dangers and risks of governance renewal warning against one sided criticism on traditional command and control approaches to planning The book formulates the arguments that support when and how governance renewable might be pursued but this attempt is not just meant for practitioners and scholars interested in governance renewal It is also useful for those interested in the challenge of navigating a plural landscape of diverse planning approaches which are each rooted in contrasting theoretical and philosophical positions The book develops a strategy for making argued choices between alternative planning approaches despite their theoretical and philosophical positions It does so by revitalizing the idea that we can contingently relate alternative planning approaches to the circumstances encountered It is an idea traced to contingency studies of the mid and late 20th century reinterpreted here within a planning landscape dominated by notions of uncertainty complexity and socially constructed knowledge This approach called Post contingency is both a theoretical investigation of arguments for navigating the theoretical plurality we face and an empirical study into renewing environmental governance Next to its theoretical ambitions Decentralization in Environmental Governance is practical in offering a constructive critique on current processes of governance renewal in European environmental governance

Building Safer Communities Urbano Fra Paleo, 2009 A collection of essays that discusses the directions and key components of risk governance It also includes the analysis of proactive approaches to the governance of risk from natural hazards and approaches to broaden the scope of public policies related to the management of risks from natural hazards

Globalisation and Agricultural Landscapes Jørgen Primdahl, Simon Swaffield, 2010-02-18

Whilst agricultural landscapes are products of the local ecosystem and community in which they are situated they are becoming increasingly affected by the same global issues and are converging under the dynamics of globalisation Combining landscape ecological research and an examination of relevant public policy this book investigates the dynamic relationship between agricultural landscapes and the global change processes such as urbanisation by which they are being transformed Landscape change is analysed in the context of biophysical patterns market dynamics and specific public policy frameworks through a series of case studies from different OECD countries spanning Europe Asia Pacific and North America Particular emphasis is placed upon the way that

landscapes are changing under differing policies of agricultural subsidy including the EU Common Agricultural Policy This is an ideal resource for graduate students and researchers in landscape ecology and agriculture as well as policy analysts working in the agricultural sector Urban Planning and the British New Right Philip Allmendinger,Huw Thomas,2002-01-22 Did the 1980s and 1990s see the death of planning Exposing the myth that has grown up around Thatcherism leading experts from a wide range of land use policy areas examine the changes that were brought about in planning and the environment during the 1980s and 1990s and argue that much less was achieved than expected Urban Planning and the British New Right questions common assumptions about planning practices under Thatcherism concluding that the complex relationship of power between central local and national government requires a sensitivity to change that is inclusive rather than doctrinal This is a book that says as much about the administration institutions and processes of planning as it does about Mrs Thatcher s attempts to change it Implementing Sustainability Caroline L. Miller,2010-12-10 New Zealand s Resource Management Act was the first and most extensive attempt to institute sustainability at a national level covering all resources from land to water This book provides a comprehensive account of the challenges of implementing sustainability It offers a practitioner s insight into the RMA and spells out the lessons that can be applied to planning systems of other countries *Changing Contexts in Spatial Planning* Janice Morphet,2018-12-07 This book considers the major forces that have emerged to reshape planning following 2010 including national infrastructure project delivery the Localism Act 2011 and neighbourhood planning This period also saw the introduction of the replacement of regional plans by new strategic sub regional approaches in combined local authorities for functional economic areas All of this is set within the UN s New Urban Agenda Brexit the changing programme for the EU post 2021 and the likely effects that these will have on UK planning practice There is also a discussion on the evolving planning policies in Scotland Wales and Northern Ireland and the ways in which the UK nations are beginning to work together more closely and with Ireland Jersey Guernsey and the Isle of Man through the spatial planning group in the British Irish Council Although primarily focused on the UK the text sets some of the policy discussions in a wider international context including agreements on the environment and the emerging alignment of governance and economies in newly recognised sub regional spaces It follows *Effective Practice in Spatial Planning* 2011 which addressed the developments in planning in the UK between 2004 and 2010 and discusses the major changes in all aspects of planning policy in the following period *OECD Environmental Performance Reviews: New Zealand 2017* OECD,2017-03-20 OECD Environmental Performance Reviews provide independent assessments of countries progress towards their environmental policy objectives Reviews promote peer learning enhance government accountability and provide targeted recommendations aimed at improving environmental performance

Nordic Experiences of Sustainable Planning Sigríður Kristjánsdóttir,2017-08-23 For well over a decade there has been a drive towards sustainability in planning throughout the Nordic countries But are these countries experiencing a

paradigm shift in planning research and practice with regards to sustainability Or is the sustainability discourse leading them into an impasse in planning This book includes overviews of the planning systems in the five Nordic countries drawing attention to their increasing focus on sustainability A leading team of scholars from the fields of planning urban design architecture landscape economics real estate and tourism explore how the notion of sustainability has shaped planning research in the Nordic countries Case studies from Iceland Sweden Finland Norway and Denmark shed light on what lessons can be learned and some possible future developments By focusing on the actual settings and practices of local and regional planning activities it enables a discussion on the current state of planning for a more sustainable future This book will be valuable reading for students and academics interested in planning policy environmental policy architecture and urban design work

Collaborative Land Use Management Robert J. Mason, 2008 *Collaborative Land Use Management The Quieter Revolution in Place Based Planning* discusses the less regulatory approaches to land use management that have emerged over the past 35 years analyzing the collective value of such place based planning approaches as land trusts open space ballot measures watershed conservancies ecoregional plans and smart growth initiatives *Collaborative Land Use Management* appraises these trends from physical social economic civic and environmental justice perspectives
