**River Regimes in Iran** Peter Beaumont, 1973-01-01      **The Legal Regime of International Rivers and Lakes/ Le régime juridique des fleuves et des lacs internationaux** Lucius Cafilisch, Ralph Zacklin, 2024-11-04      **Identity, Conflict and Cooperation in International River Systems** Jack Kalpakian, 2017-11-30 Kalpakian tests the dominant assumption that water disputes cause violent conflict between states and other actors in world politics Using case studies from arid regions to bias the effort towards this assumption he finds that issues related to identity have been the real source of conflict in the river basins studied This essential volume challenges conventional assumptions about water and conflict displaces the state as the sole actor in violent conflict reveals the link between conflict and identity This book invites the reader to address the complexity in the relationships binding peoples and states in an international river basin      **The Middle East (Routledge Revivals)** W. B. Fisher, 2013-09-13 In this comprehensive study first published in 1950 Professor Fisher examines all the principal elements physical and human that influence environment development and ways of life in the Middle East An analysis of the physical basis of the region is followed by detailed treatment of the complex human and social aspects a concluding section brings together on a regional basis the elements discussed in the first two parts With first hand experience within the Middle East Fisher presents a detailed and fascinating study based on surveys and investigations he personally carried out Including wide ranging geographical historical sociological and political perspectives this title provides essential background to anyone with an interest in Middle Eastern affairs      **The Middle East** Peter Beaumont, G.H. Blake, J. Malcolm Wagstaff, 2016-04-14 This book first published in 1976 and in this second edition in 1988 combines an examination of the political cultural and economic geography of the Middle East with a detailed study of the region's landscape features natural resources environmental conditions and ecological evolution The Middle East with its extremes of climate and terrain has long fascinated those interested in the fine balance between man and his environment and now its economic and political importance in world affairs has brought the region to the attention of everybody      **Change and Development in the Middle East (Routledge Revivals)** Clarke John, Bowen-Jones Howard, 2013-10-14 The Middle East is a region of great traditional diversity which has been characterized by immense political social and economic changes still developing over thirty years after the title's original publication A group of oil rich countries have achieved great political significance and some of the highest per capita incomes in the world Much modern development has been spatially polarized accentuating the concentrations of rapidly growing populations and posing severe problems for planners Cultivation and pastoralism the main traditional activities have often suffered from neglect and insufficient investment and both require re evaluation These are the issues addressed by this volume first published in 1981 which contains a series of overviews and case studies written by present or former members of staff and research students of the Department of Geography in the University of Durham in honour of W B Fisher Change and Development in the Middle East

provides an interesting and relevant geographical and demographic analysis of this diverse and volatile region *Selected Water Resources Abstracts* ,1974 **Ottoman Empire and Safavid Iran, 1639-1683** Selim Gungorurur,2024-03-05

Ottoman Safavid relations after 1639 have been dismissed as marginal and assumed not to have produced sufficient documentation to facilitate a study wherefore the subject matter has lacked even an introduction providing basic facts let alone a comprehensive treatment This book establishes for the first time the mission exchanges correspondence negotiations and borderland encounters by drawing on scattered and hitherto untapped archival documents chronicle entries and travelogues by the Ottomans Safavids and Europeans Working up the information unearthed thereby it reconstructs the groundwork of these dealings highlights trends and contextualizes the facts The book refutes the assumption that mid seventeenth century interstate scene of the Middle East was eventless and documents how the parties in question intensively bargained displayed goodwill made demands delivered threats presented displays of might asked for privileges as well as concessions and brought in third parties to their relations all within an unequal relationship in strength hierarchy order of precedence ranks and protocol **A Guide to Information Sources in the Geographical Sciences** Stephen

Goddard,1983-01-01 Geography is a wide ranging discipline and the number of information sources available is truly enormous These include printed books and journal articles maps satellite photographs archives statistical information and much else One particular problem facing geographers is that when one studies a foreign country information may be available only in the foreign country and difficult to obtain This book discusses the information sources available to geographers

*Drylands* Peter Beaumont,2014-04-08 Drylands which cover over half the world s area have witnessed rapid development exploitation and change with the discovery of mineral reserves urbanization and population growth

Environmental management is critical to the conservation and sustainable use of resources This comprehensive text offers a systematic study of the physical nature of drylands and the history of human response to and uses of these harsh landscapes Detailed case studies including urban as well as pastoral drylands from California to Soviet Central Asia the Middle East the Sahara and Australia contrast different management approaches and problems **The Changing Middle Eastern City**

G.H. Blake,R.I. Lawless,2016-03-22 The Middle East defined here as extending from Morocco to Iran and Turkey to Sudan lies at the crossroads of three continents Africa Asia and Europe With the largest reserves of petroleum in the world its importance is well beyond its physical size and population Rapid urban growth has radically transformed Middle Eastern society in recent decades but the associated problems are incompletely understood This volume first published in 1980 highlights some of the major issues of Middle Eastern urbanisation and provides a comprehensive statement about the current position of research Urban origins and the nature of urban growth are discussed to provide a background to considerations of migration employment housing and retailing The contributors suggest that planning strategies have hitherto proved inadequate with small towns being largely overlooked historic quarters rapidly disappearing and water in

short supply Future research into all these problem areas is considered essential but the research must be coordinated and utilised Concentrating on practical problems achievements and challenges for research the contributions in this book specially commissioned from active researchers in the field will prove a valuable guide to recent ideas and developments in the Middle East *River Ecology* Brian A.
