Road Engineering for Development Richard Robinson, Bent Thagesen, 2018-10-09 Developing countries in the tropics have different natural conditions and different institutional and financial situations to industrialized countries. However, most textbooks on highway engineering are based on experience from industrialized countries with temperate climates and deal only with specific problems. *Road Engineering for Development* published as *Highway and Traffic Engineering in Developing Countries* in its first edition provides a comprehensive description of the planning, design, construction and maintenance of roads in developing countries. It covers a wide range of technical and non-technical problems that may confront road engineers working in this area. The technical content of the book has been fully updated and current development issues are focused on. Designed as a fundamental text for civil engineering students, this book also offers a broad practical view of the subject for practising engineers. It has been written with the assistance of a number of world-renowned specialist professional engineers with many years experience in Africa, the Middle East, Asia and Central America. *Road Engineering for Development* Richard Robinson, Bent Thagesen, 2018-10-09 Developing countries in the tropics have different natural conditions and different institutional and financial situations to industrialized countries. Rural Road Engineering in Developing Countries Jasper Cook, Robert Christopher Petts, 2023-08-02 *Rural Road Engineering in Developing Countries* provides a comprehensive coverage of the planning, design, construction and maintenance of rural roads in developing countries and emerging nations. It covers a wide range of technical and non-technical problems that may confront road engineers working in the developing world, focusing on rural roads which provide important links from villages and farms to markets and offer the public access to health, education and other services essential for sustainable development. Most textbooks on road engineering are based on experience in industrialised countries with temperate climates or deal only with specific issues with many aspects of the design and construction of roads in developing regions stemming from inappropriate research undertaken in Europe and the USA. These approaches are frequently unsuitable and unsustainable for rural road network environments, particularly in low to middle income countries.

This book takes on board a more recent research and application focus on rural roads integrating it for a broad range of readers to access current information on good practice for sustainable road engineering in developing countries The book particularly suits transportation engineers development professionals and graduate students in civil engineering Roads and Road Construction, 1923
