**Scotch Baronial** Miles Glendinning, Aonghus MacKechnie, 2019-01-10 As the debate about Scottish independence rages on this book takes a timely look at how Scotland's politics have been expressed in its buildings exploring how the architecture of Scotland in particular the constantly changing ideal of the castle has been of great consequence to the ongoing narrative of Scottish national identity Scotch Baronial provides a politically framed examination of Scotland's kaleidoscopic castle architecture tracing how it was used to serve successive political agendas both prior to and during the three unionist centuries from the early 17th century to the 20th century The book encompasses many of the country's most important historic buildings from the palaces left behind by the lost monarchy to revivalist castles and the proud town halls of the Victorian age examining their architectural styles and tracing their wildly fluctuating political and national connotations It ends by bringing the story into the 21st century exploring how contemporary neo modernist architecture in today's Scotland as exemplified in the Holyrood parliament relates to concepts of national identity in architecture over the previous centuries **Art and Identity** Vicky Coltman, 2019-11-14 This lively and erudite cultural history examines how Scottish identity was experienced and represented in novel ways **Late Medieval Castles** Robert Liddiard, 2016 A collection of the most significant articles in castle studies with contributions from scholars in history archaeology historic buildings and landscape archaeology The castles of the late medieval period represent some of the finest medieval monuments in Britain with an almost infinite capacity to fascinate and draw controversy They are also a source of considerable academic debate The contents of this volume represent key works in castle scholarship Topics discussed include castle warfare fortress customs architectural design and symbolism spatial planning and the depiction of castles in medieval

romance The contributions also serve to highlight the diversity of approaches to the medieval castle ranging from the study of documentary and literary sources analysis of fragmentary architectural remains and the recording of field archaeology The result is a survey that offers an in depth analysis of castle building from the thirteenth to the fifteenth centuries and places castles within their broader social architectural and political contexts Robert Liddiard is Professor of History University of East Anglia Contributors Nicola Coldstream Charles Coulson Philip Dixon Graham Fairclough P A Faulkner John Goodall Beryl Lott Charles McKean T E McNeill Richard K Morris Michael Prestwich Christopher Taylor Muriel A Whitaker

**Laurent-Benoît Dewez (1731-1812), Architect in the Age of Enlightenment** Dirk Van de Vijver, 2025-02-11 Laurent Benoît Dewez 1731 1812 court architect to Charles of Lorraine was the most outstanding architect of his time in the Southern Low Countries After studying in Italy and serving in the eminent office of Robert Adam in London Dewez developed a personal classical style that came to embody the Eglise Belgique under the Austrian Habsburgs He designed numerous castles abbeys and churches across Belgium but time has not been kind to his legacy of his 80 architectural projects many have vanished However the Chateau de Seneffe the abbey of Vlierbeek in Leuven and the churches in Andenne Floreffe and Harelbeke still stand as testaments to his remarkable talent This richly illustrated monograph presents for the first time a comprehensive collection and analysis of the complete works of Laurent Benoît Dewez William Robertson and the Expansion of Empire Stewart J. Brown, Stewart Jay Brown, 1997-04-13 This is an exploration of William Robertson a leading figure in the eighteenth century Enlightenment **Robert Adam, Artist and Architect** Percy Hetherington Fitzgerald, 1904 Reading Architectural History Dana Arnold, 2003-09-02 Architectural history is more than just the study of buildings Architecture of the past and present remains an essential emblem of a distinctive social system and set of cultural values and as a result it has been the subject of study of a variety of disciplines But what is architectural history and how should we read it Reading Architectural History examines the historiographic and socio cultural implications of the mapping of British architectural history with particular reference to eighteenth and nineteenth century Britain Discursive essays consider a range of writings from biographical and social histories to visual surveys and guidebooks to examine the narrative structures of histories of architecture and their impact on perception and understanding of the architecture of the past Alongside this each chapter cites canonical histories juxtaposed with a range of social and cultural theorists to reveal that these writings are richer than we have perhaps recognised and that architectural production in this period can be interrogated in the same way as that from more recent past and can be read in a variety of ways The essays and texts combine to form an essential course reader for methods and critical approaches to architectural history and more generally as examples of the kind of evidence used in the formation of architectural histories while also offering a thematic introduction to architecture in Britain and its social and cultural meaning *A Biographical Dictionary of Civil Engineers in Great Britain and Ireland: 1500-1830* A. W. Skempton, 2002 This biographical reference work looks specifically at the lives

works and careers of those individuals involved in civil engineering whose careers began before 1830      Early Scottish Gardens Sheila Mackay, 2019-08-05 A personal account of the growth of the gardens of Scotland from the sixteenth century

*The Enlightenment and the Book* Richard B. Sher, 2008-09-15 The late eighteenth century witnessed an explosion of intellectual activity in Scotland by such luminaries as David Hume Adam Smith Hugh Blair William Robertson Adam Ferguson James Boswell and Robert Burns And the books written by these seminal thinkers made a significant mark during their time in almost every field of polite literature and higher learning throughout Britain Europe and the Americas In this magisterial history Richard B Sher breaks new ground for our understanding of the Enlightenment and the forgotten role of publishing during that period The Enlightenment and the Book seeks to remedy the common misperception that such classics as The Wealth of Nations and The Life of Samuel Johnson were written by authors who eyed their publishers as minor functionaries in their profession To the contrary Sher shows how the process of bookmaking during the late eighteenth century involved a deeply complex partnership between authors and their publishers one in which writers saw the book industry not only as pivotal in the dissemination of their ideas but also as crucial to their dreams of fame and monetary gain Similarly Sher demonstrates that publishers were involved in the project of bookmaking in order to advance human knowledge as well as to accumulate profits The Enlightenment and the Book explores this tension between creativity and commerce that still exists in scholarly publishing today Lavishly illustrated and elegantly conceived it will be must reading for anyone interested in the history of the book or the production and diffusion of Enlightenment thought      **History of**
