Robert Irwin: a Selection of Works 1958 to 1970 PaceWildenstein (Firm),1998 **Atmospheres of Projection** Giuliana Bruno,2022-10-13 Following on the success of *Surface* Bruno's previous book with us in this new one she explores the act and art of projection in its manifold guises and what those can tell us about how we think and feel and create the world we inhabit This is not just an exploration of the psychological operation of projection the idea that we cast onto others the qualities we refuse to acknowledge in ourselves It is a major work of cultural history and media archaeology As a way to transform space and atmosphere projection has a long history in the arts dating back to shadow plays camera obscuras magic lantern shows and phantasmagoria But the atmosphere of projection is not a thing of the past alone It is alive and well today It continues to fascinate us as screens filled with moving figures pervade the spaces of the art gallery and the museum as well as the environments of our daily lives What is the root of our fascination How does it manifest in contemporary art How do we define atmosphere How is projection an atmosphere Are these two modalities conceptually and historically related and how so Why are artists today so interested in environments and in elements of projection To explain this continual fascination with projection and atmosphere Bruno traverses psychoanalysis architecture the history of science visual art and moving image culture to see how projective mechanisms and their environments have developed over time

Curtis,2008 This book examines the relationship between modern sculpture and architecture in the mid twentieth century an
interplay that has laid the ground for the semi sculptural or semi architectural works by architects such as Frank Gehry and
artists such as Dan Graham The first half of the book looks at how the addition of sculpture enhanced several architectural
projects including Mies van der Rohe s Barcelona Pavilion 1929 and Eliel Saarinen s Cranbrook Campus 1934 The second
half of the book uses several additional case studies including Philip Johnson s sculpture court for New York s Museum of
Modern Art 1953 to explore what architectural spaces can add to the sculpture they are designed to contain Curtis argues
that it was in the middle of the twentieth century before sculptural and architectural forms began to converge that the
complementary nature of though essential difference between the two art forms began to clearly emerge how figurative
sculpture highlighted the modernist architectural experience and how the abstract qualities of that architecture imparted to
sculpture a heightened role San Francisco Ballet at Seventy-Five Janice Ross,2007-11-12 Long renowned as one of the

Reluctant Capitalists Laura J. Miller,2008-09-15 Over the past half century bookselling like many retail industries has
evolved from an arena dominated by independent bookstores to one in which chain stores have significant market share And
as in other areas of retail this transformation has often been a less than smooth process This has been especially pronounced
in bookselling argues Laura J Miller because more than most other consumer goods books are the focus of passionate debate
What drives that debate And why do so many people believe that bookselling should be immune to questions of profit In
Reluctant Capitalists Miller looks at a century of book retailing demonstrating that the independent chain dynamic is not

entirely new It began one hundred years ago when department stores began selling books continued through the 1960s with the emergence of national chain stores and exploded with the formation of superstores in the 1990s The advent of the Internet has further spurred tremendous changes in how booksellers approach their business All of these changes have met resistance from book professionals and readers who believe that the book business should somehow be above market forces and instead embrace more noble priorities Miller uses interviews with bookstore customers and members of the book industry to explain why books evoke such distinct and heated reactions She reveals why customers have such fierce loyalty to certain bookstores and why they identify so strongly with different types of books In the process she also teases out the meanings of retailing and consumption in American culture at large underscoring her point that any type of consumer behavior is inevitably political with consequences for communities as well as commercial institutions
