### **'A SANCTIONED BABEL': MYTH AND LANGUAGE IN ROBERT KROETSCH'S *WHAT THE CROW SAID***

Strange events occur in Robert Kroetsch's sixth published novel, *What the Crow Said* (1978). In the opening chapter, a young woman, Vera Lang, is seduced and impregnated on the edge of a prairie valley by a swarm of bees; subsequently three of her five younger sisters also become pregnant in unusual ways: the next eldest, apparently made so by a one-legged curmudgeon, who afterwards confesses he is sometimes able to feel and use his missing parts; another, it would seem, though like many things in the text this is not explicit, by artificial insemination, after injecting himself with seed from a hired man, who, while watching a toaser crow rouse a bull, has become 'so excited that he accidentally inserted himself into the semen-collecting device'; the third, apparently by all the players in a hockey game that degenerates into a brawl. Vera's seduction ushers in a series of abnormal meteorological events. A preternaturally long winter brings timber wolves south from the northern forests and when Vera finds herself surrounded by a pack as she rides home one night, she throws her young son to the darkness and, it would seem, certain death. However, years later he reappears safe and sound, having been reared by coyotes and jabbering in 'a kind of speech that was half yips and barks, half what his listeners took to be pig Latin' (p.138). Earlier, Vera's mother, Tiddy, has given birth to a beautiful mute child, JG, whose only significant relationship is with the talking crow of the title, who may perhaps be his voice. In the later chapters of the novel, the central focus is on a war between the sky and the earth, with the text's various male characters engaging in a series of magnificently obsessive attempts to project themselves into the heavens. Thus one, Isador Heck, who has earlier toured the continent being fired from a cannon as a circus act, believes he can 'include himself' (p.181) in the afterlife by using the same method of propulsion now. This endeavour is complemented by another version of the same basic narrative pattern,
