Pitzl, 2021-10-28 The *Plaisted Polar Expedition* of 1968 was the first indisputable attainment of the North Pole over the Arctic Ocean ice surface from a point of land. The journey took forty four days of struggle, delays, intense cold, windstorms and the uncommon determination of dedicated expedition members to achieve the goal. Part 1 of the book covers the daily activities of the ice party as they progressed ever so slowly northward and of the support team at the base camp working to ensure the necessary logistical tasks to keep the ice party moving. Part 2 shines a light on the navigational practices of Peary in his 1909 quest to reach the North Pole, a claim that even the National Geographic Society, his solid supporter for 111 years, now concluded he did not achieve. His navigation failed him. This became abundantly clear in the analysis. Arctic Cinemas and the Documentary Ethos Anna Westerstahl Stenport, 2019-02-18 A collection of essays analyzing the representation of the Arctic region in documentary films. Beginning with Robert Flaherty's *Nanook of the North* 1922, the majority of films that have been made in and about the Arctic region have been documentary cinema. Focused on a hostile environment that few people visit, these documentaries have heavily shaped ideas about the contemporary global Far North. In *Arctic Cinemas and the Documentary Ethos*, contributors from a variety of scholarly and artistic backgrounds come together to provide a comprehensive study of Arctic documentary cinema from a transnational perspective. This book offers a thorough analysis of the concept of the Arctic as it is represented in documentary filmmaking while challenging the notion of The Arctic as a homogenous entity that obscures the environmental, historical, geographic, political and cultural differences that characterize the region. By examining how the Arctic is imagined, understood and appropriated in documentary work, the contributors argue that such films are key in contextualizing environmental, indigenous, political, cultural, sociological and ethnographic understandings of the Arctic from early cinema to the present. Understanding the role of these films becomes all the more urgent in the present day as conversations around resource extraction, climate change and sovereignty take center stage in the Arctic's representation. Highly recommended. Choice. A thorough exploration of the inexorable links between the circumpolar regions and historic and contemporary documentary filmmaking. It will be valuable to Arctic humanities specialists particularly as a welcome addition to scholarship on visual depictions of the Arctic by authors such as
