Shamans Of Prehistory Trance And Magic In The Painted Caves:

Shamans of Prehistory Jean Clottes, David Lewis-Williams, 1998-10 The universality of shamanistic power and practice among today's hunter gatherers along with the similarity of rock art found in varied sites around the world has led Jean Clottes and David Lewis Williams to suggest in this new book that the great art of paleolithic caves can be best understood through the lens of shamanism Indeed this is not a monograph on a particular site but a general discussion of the art of painted caves and their shamanistic meaning Through the authors revealing words and the abundant full color illustrations we follow shamans into their trance states and we watch as they carefully paint and engrave on rock surfaces the shapes of animals whose power they seek As we learn how drawings and rituals were likely modes of shamanistic contact we understand best the actions accomplishments and traces left behind by prehistoric shamans **Shamans/neo-Shamans**

Robert J. Wallis, 2003 Robert J Wallis explores the interface between the new and prehistoric shamans of popular culture and anthropology drawing on interviews with a variety of practitioners particularly contemporary pagans in Britain and north America **Art and Philosophy**, 2025-05-05 Though a field often thought far from the center of contemporary philosophy philosophy of art perhaps more than any other field similarly situated nevertheless enjoys extensive overlap with and points of exchange at that center The last decade has seen a marked resurgence of interest in aesthetics and philosophy of art from those working outside these areas and a reciprocal resurgence of interest in other subfields from philosophers of art Art and Philosophy brings together twenty one original essays at the intersection of art and philosophy These essays are intersectional in two respects Firstly the authors draw meaningful connections between art and philosophy using artworks to motivate support and shape their views Secondly the authors draw connections between the theoretical discipline of aesthetics and philosophy of art on the one hand and the rest of philosophy on the other Some chapters explore philosophical matters by examining art and other aesthetic objects whilst others bring together contemporary thought and research in aesthetics and philosophy of art with important developments in other areas of philosophy The chapters are organized into ten sections These ten sections represent the current issues best exemplifying the productive and informative exchanges that exist at these intersections The topics range from metaphysics and philosophy of language to creativity and love By placing the connection to art at the forefront Art and Philosophy is a testament to the myriad ways art and the philosophy of art intersect and overlap with issues that lie at the core of contemporary philosophy **Evolution and the Emergent Self**

Raymond L. Neubauer, 2012 This book examines how humans evolved from the cosmos and prebiotic earth and what types of biological chemical and physical sciences drove this complex process The author presents his view of nature which attributes the rising complexity of life to the continual increasing of information content first in genes and then in brains **Mystery**

of the White Lions Linda Tucker, 2010-06-01 The inspiring firsthand account of one woman's journey into African shamanism and the mysteries of the most sacred animal on the continent the legendary White Lion In 1991 Linda Tucker was

rescued from a pride of lions in the Timbavati game region by a medicine woman known as the Lion Queen So began Linda's lifelong journey into the wisdom and ceremonies of Old Africa in which humans and lions are able to cross the species barrier Such knowledge is in accordance with the most guarded secrets of Ancient Egypt and humankind's greatest riddle the Sphinx Scientists in our day have established that humankind's most significant evolutionary leap occurred as a result of our ancestors' interaction with great cats The White Lion is a genetic rarity within *Panthera leo* and occurred in just one region on Earth Timbavati Today White Lions form the center of the notorious canned trophy hunting industry hand reared captive lions shot in enclosures for gross sums of money By contrast shamans believe that killing a lion sun god is the ultimate sacrilege How the human species treats such precious symbols of God in nature may determine how nature treats the human species Whether we view them as prophetic Lions of God or simply as rare genetic mutations the story of the White Lions is a true legend unfolding in our own extraordinary times Inspiring captivating and thoroughly researched *Mystery of the White Lions* is an unforgettable portrait of these magnificent beasts and of the overwhelming love that has driven Linda's every action to save them Through understanding the White Lion we will understand ourselves and our great role in the chain of being Deepak Chopra **Anthropology and Religion** Robert L. Winzeler, 2008 Drawing from ethnographic examples found throughout the world this text covers what anthropologists know or think about religion how they have studied it and how they interpret or explain it A key text for students of upper division courses in the anthropological study of religion

The Human Eros Thomas M. Alexander, 2013-07-01 The Human Eros explores themes in classical American philosophy primarily the thought of John Dewey but also that of Ralph Waldo Emerson George Santayana and Native American traditions Alexander's primary claim is that human beings have an inherent need to experience meaning and value a Human Eros Our various cultures are symbolic environments or spiritual ecologies within which the Human Eros seeks to thrive This is how we inhabit the earth Encircling and sustaining our cultural existence is nature yet Western philosophy has not provided adequate conceptual models for thinking ecologically Alexander introduces the idea of eco ontology to explore ways in which this might be done beginning with the primacy of Nature over Being but also including the recognition of possibility and potentiality as inherent aspects of existence He argues for the centrality of Dewey's thought to an effective ecological philosophy Both pragmatism and naturalism he shows need to be contextualized within an emergentist relational nonreductive view of nature and an aesthetic imaginative nonreductive view of intelligence
