Who Fights for Reputation Keren Yarhi-Milo, 2018 How psychology explains why a leader is willing to use military force to protect or salvage reputation In *Who Fights for Reputation* Keren Yarhi Milo provides an original framework based on insights from psychology to explain why some political leaders are more willing to use military force to defend their reputation than others Rather than focusing on a leader's background beliefs bargaining skills or biases Yarhi Milo draws a systematic link between a trait called self monitoring and foreign policy behavior She examines self monitoring among national leaders and advisers and shows that while high self monitors modify their behavior strategically to cultivate image enhancing status low self monitors are less likely to change their behavior in response to reputation concerns Exploring self monitoring through case studies of foreign policy crises during the terms of U S presidents Carter Reagan and Clinton Yarhi Milo disproves the notion that hawks are always more likely than doves to fight for reputation Instead Yarhi Milo demonstrates that a decision maker's propensity for impression management is directly associated with the use of force to restore a reputation for resolve on the international stage *Who Fights for Reputation* offers a brand new understanding of the pivotal influence that psychological factors have on political leadership military engagement and the protection of public prestige

Passion, Politics, and the Past Vladimir Donskoi, 2008 This book shows that foreign policy decision making is not as cool minded as it is deemed to be It analyses how the lessons of history influence decision making and argues that during crises a decision maker's affect anger and fear can bias him towards straightforward responses of the fight or flight type This insight also prompts a fresh answer to the question what analogies are likely to be picked from the vast pool of historical events a behaviourally straightforward analogies with forceful imagery and clear cut affective connotations b analogies that are already established in the political discourse c exceedingly grave analogies d many different analogies with congruent inferences Thus politicians tend to draw analogies that are affectively salient e g between Saddam Hussein and Hitler rather than factually accurate and this explains why such analogies are often farfetched The case on which the model is then tested is the U S decision making during 1st week of the Korean War This book will be especially interesting for scholars and practitioners in the field of politics as well as for everyone who wants to understand how emotions influence decisions

Revisiting State Personhood and World Politics Bianca Naude, 2021-12-16 Breathing fresh air into debates surrounding foreign policy and interstate relations Bianca Naude presents a holistic theory of states as collectives of people that cannot be reduced to their individual constituents Moving among current research on the ontological status of the state alongside important arguments in support of the state

personhood thesis Naude begins by exploring Freud's personality theory and the ways in which this theory has evolved over time in response to newer insights from the field of experimental psychology Recognizing that Freud's work is in many ways outdated she considers more recent literature on narcissism as an aspect of self esteem rather than a form of psychopathology drawing specifically on Kohut's expansion of the concept of narcissism as a normal feature of personality development Using the South African state as a case study Naude demonstrates the various ways in which the state presents itself to the outside world on the one hand and how it wishes to see itself on the other She further considers how narcissistic defenses help protect the state's ego from criticism and self judgments Revisiting State Personhood and World Politics will help readers understand how the state sees itself why or when the state experiences shame humiliation guilt or pride and how it responds to these self conscious emotions It will be a valuable resource to researchers and students of International Relations
