Shape Of Things A Play:

The Shape of Things Neil LaBute, 2001-11-15 How far would you go for love For art What would you be willing to change Which price might you pay Such are the painful questions explored by Neil Labute in The Shape of Things A young student drifts into an ever changing relationship with an art major while his best friends engagement crumbles so unleashing a drama that peels back the skin of two modern day relationships exposing the raw meat and gristle that lie beneath The world premi re of The Shape of Things was presented at the Almeida London in May 2001 The Shapes of Things Shawn W. Walker, 2015-06-25 Many things around us have properties that depend on their shape for example the drag characteristics of a rigid body in a flow This self contained overview of differential geometry explains how to differentiate a function in the calculus sense with respect to a shape variable This approach which is useful for understanding mathematical models containing geometric partial differential equations PDEs allows readers to obtain formulas for geometric quantities such as curvature that are clearer than those usually offered in differential geometry texts Readers will learn how to compute sensitivities with respect to geometry by developing basic calculus tools on surfaces and combining them with the calculus of variations Several applications that utilize shape derivatives and many illustrations that help build intuition are included

The Shape of Things Unseen Adam Zeman, 2025-01-16 Fascinating absorbing and educative A C Grayling Highly original and beautifully written Dominic Lawson A compelling insight into how our imagination works based on the latest scientific research People often think of imagination as something used only in creative endeavours In fact we use imagination constantly as we reminisce anticipate plan daydream read create imagined worlds The truth is we live in the here and now much less than we tend to think Imagination isn t the exception in our daily lives it s our default setting Yet only now are we beginning to understand exactly how it works From hallucination to sleepwalking from REM sleep to delusions neurologist Adam Zeman brilliantly guides us through the latest scientific studies in the world of the imagination He draws on research in neuroscience the study of human origins and child development to show how the human brain is above all else a creative imaginative organ and that we have evolved to share what we imagine Our brains behave in strikingly similar ways when we observe remember imagine or act Imagine looking at a cube and your eye will trace the contours of the cube as if you were actually seeing it Yet it turns out that people differ hugely in their imaginative experience Some people lack sensory imagery altogether they would be unable to picture their family if asked to but still lead fulfilling even highly creative lives From how we visualise to how we understand the minds of others from the benefits of play to mental disorders The Shape of Things Unseen dazzles and delights It is an essential guide to the latest discoveries about the workings of the human mind Neil LaBute Gerald C. Wood, 2006-09-11 Neil LaBute A Casebook is the first book to examine one of the most successful and controversial contemporary American playwrights and filmmakers While he is most famous and in some cases infamous for his early films In the Company of Men and Your Friends and Neighbors Labute is equally accomplished as a playwright His

work extends from the critique of false religiosity in *Bash* to examinations of opportunism irresponsible art failed parenting and racism in later plays like *Mercy Seat* *The Shape of Things* *The Distance From Here* *Fat Pig* *Autobahn* and the very recent *This Is How It Goes* and *Some Girls Like* David Mamet an acknowledged influence on him and Conor McPherson with whom he shares some stylistic and thematic concerns LaBute tends to polarize audiences The angry voices violent situations and irresponsible behavior in his works especially those focusing on male characters have alienated some viewers But the writer's religious affiliation and refusal to condone the actions of his characters suggest he is neither exploitive nor pornographic This casebook explores the primary issues of the writer's style themes and dramatic achievements Contributors describe for example the influences both classical and contemporary on his work his distinctive vision in theater and film the role of religious belief in his work and his satire In addition to the critical introduction by Wood and the original essays by leading dramatic and literary scholars the volume also includes a bibliography and a chronology of the playwright's life and works

The Shape of Space Graham Nerlich, 1994-08-04 This is a revised and updated edition of Graham Nerlich's classic book 1976 It develops a metaphysical account of space that treats it as a real and concrete entity showing that shape plays a key explanatory role in space and spacetime theories Arguing that geometrical explanation is very like causal explanation Professor Nerlich prepares the ground for philosophical argument and investigates how different spaces would affect perception differently Along the way Professor Nerlich criticizes and rejects conventionalism as a non realist metaphysics of space concluding that there is in fact no problem of underdetermination for this aspect of spacetime theories while offering an extensive discussion of the relativity of motion

Reflecting 9/11 Heather Pope, Victoria Bryan, 2016-06-22 In over fifteen years the cultural and artistic response to 9/11 has been wide ranging in form and function As the turbulent post 9/11 years have unfolded years that have been shaped and characterized by the War on Terror the Patriot Act the Wars in Afghanistan and Iraq 7/7 Abu Ghraib and Guantánamo Bay these texts have been commemorative and heroic have attempted to work through collective and individual traumas and have struggled with trying to represent the terrorist other Many of these earlier domestic heroic and traumatic

works have so often been read as limitations in narrative This collection however challenges the language of limitation and provides re readings of earlier work but also traces the emergence of a new paradigm for discussing the artistic responses to 9 11 one that frames these narratives as dialogic self conscious and self reflexive interventions in the responses to the attacks the initial representations of the attacks and the ever shifting social and geopolitical continuities of the 9 11 decade These texts widen the conversation about the lasting impacts of 9 11 and incorporate strands of discussion on American exceptionalism and imperialism torture and otherness whilst still remaining invested in the personal and collective traumas of the attacks The authors included here ask crucial questions about the way 9 11 is being historicized will it for example be read as a moment of rupture or epoch Will it inevitably be attached to the War on Terror or the Wars in Iraq and Afghanistan As they trace the emergent patterns of reflexivity politicization and dissent the contributions here are also implicitly invested in asking how far they extend

A United Europe of Things Jakub Sawicki, Michael Lewis, Mária Vargha, 2024-01-01 This volume studies high and late medieval material culture in a Pan European context The idea of unity of culture in Medieval Latin Europe is well known in historical texts especially when it concerns the so called Europe North of the Alps This book investigates the similarities and differences in material culture between areas regions and political entities and opens the dialogue for a more interregional discussion The editors acknowledge that there are numerous challenges in understanding the phenomenon the volume addresses the fundamental one being defining or even redefining a common material culture of Europe Important in determining this is greater appreciation of how objects reflect interactions between peoples both local and foreign which can be driven by a variety of factors including trade conflict and diplomacy etc But just as important is observing the differences between things across Europe reflecting developments and transformations its cultural social and economic history These works are traditionally presented in isolation or at the local level maybe even in very specialized tomes as often it is thought their observation are not relevant to wider discourses Conversely what is clear however is that by

interconnecting these seemingly introvert studies of specific artefact types or sites etc readers can better appreciate the similarities and differences in material culture across Europe This book is of interest to researchers in archaeology and material culture
