our social identities our families and communities but this book also highlights the tensions between the industrialisation of food the environment and the fair or otherwise worldwide distribution of food It considers how the food industries on which most of us have to rely have also had direct effects on our bodies whether through diet and longevity or the development of illness and diseases This book is for all students and general readers alike or for anyone with a fascination with food It questions the idea that food is merely something inert on the plate and instead shows how influential symbolic powerful and transformative food has come to be This book is part of the Shortcuts series published by Routledge a major new series of concise accessible introductions to some of the major issues of our times

Why We Eat, How We Eat Emma-Jayne Abbotts, Anna Lavis, 2016-02-11 Why We Eat How We Eat maps new terrains in thinking about relations between bodies and foods With the central premise that food is both symbolic and material the volume explores the intersections of current critical debates regarding how individuals eat and why they eat Through a wide ranging series of case studies it examines how foods and bodies both haphazardly encounter and actively engage with one another in ways that are simultaneously material social and political The aim and uniqueness of this volume is therefore the creation of a multidisciplinary dialogue through which to produce new understandings of these encounters that may be invisible to more established paradigms In so doing Why We Eat How We Eat concomitantly employs eating as a tool a novel way of looking while also drawing attention to the term eating itself and to the multiple ways in which it can be constituted The volume asks what eating is what it performs and silences what it produces and destroys and what it makes present and absent It thereby traces the webs of relations and multiple scales in which eating bodies are entangled in diverse and innovative ways contributors demonstrate that eating draws into relationships people places and objects that may never tangibly meet and show how these relations are made and unmade with every mouthful By illuminating these contemporary encounters Why We Eat How We Eat offers an empirically grounded richness that extends previous approaches to foods and bodies
