**Identity Formation** Denise MacGregor, 2009 The influences that shape beginning teachers professional identity have been described as part of a changing landscape Connelly and Clandinin 1999 When pre service teachers transition into the role of beginning in service teachers the landscape changes dramatically Aspects or features of the landscape that were once familiar may be confirmed or challenged As beginning teachers navigate the changing landscape they cross spatial physical experiences and temporal of the mind conceptual borders Connelly and Clandinin 1999 112 and in doing so shape their professional identity This paper reports on the findings of the initial stage of a doctoral study that examined the influences that final year pre service teachers believed would shape their professional identity once they crossed the border and commenced their role as in service teachers The first stage of the study involved twenty final year Design and Technology pre service teachers in focus group discussions to investigate personal perceptions of professional identity to identify factors that had shaped this perception to date and to predict future influences The findings demonstrated that while final year pre service teachers were prepared to approach their in service role with a high level of enthusiasm and confidence in their subject knowledge they feared perceived challenges such as a lack of mentoring support from teaching colleagues the perceptions of students and under valuing the place of Design and Technology

Education in the curriculum including food and textile technology by school leadership could have a negative impact on shaping their professional identity. These challenges became the spatial and temporal borders that pre-service teachers believed they would need to navigate. Such findings suggest that pre-service teachers are well aware that aspects of the professional landscape will be challenging. The implication for teacher education programs is to provide pre-service teachers with strategies to cross the borders successfully.

Learning Trajectories, Innovation and Identity for Professional Development Anne Mc Kee, Michael Eraut, 2011-09-18

Educators in the professions have always had unique demands placed upon them. These include the need to keep pace with rapidly evolving knowledge bases, developing skills and attitudes appropriate to practice, learning in the workplace and fostering public confidence. For twenty years, these new demands have created additional educational imperatives. Public accountability has become more intensive and extensive. Practitioners practice in climates more subject to scrutiny and less forgiving of error. The contexts in which professionals practice and learn have changed, and these changes involve global issues and problems. Often, professionals are the first responders who are required to take an active stance in defining and solving problems. This book explores the pedagogic implications of these challenges internationally for a wide range of professions which include accountants, military, company commanders, surgeons, nurse practitioners, academic managers, community physicians, and dentists. The established view of professional development is about what the professional knows and can do. The authors broaden this view to include the systemic and contextual factors that affect learning and the conditions necessary for effective practice and identity development across the professional lifespan. Authors examine the unique particularities and requirements of diverse professional groups. The editors emphasize new ideas and learning that emerges across the professions. As readers use this book as a pathway to their own innovations in scholarship and pedagogic research, they join their colleagues in supporting new directions in learning, teaching, and assessment across professions. This book was awarded the Outstanding Research Publication award for 2012 by the American Educational Research Association's Division I Education in the Professions.

**Reflections on Identity** Neil Hopkins, Carol Thompson, 2024-01-01

This book seeks to extend perspectives on professional identity in education. Chapters consider the notion of expertise, the impact of managerial approaches, the importance of communities of practice, and the effects of increasingly marketised approaches. By using narratives, the book opens up a conversation about this important topic. Educators and leaders from a variety of settings will explore their professional experiences and the impact these have had on forming values in the professional role. By drawing on personal experience, individual authors will consider some of the challenges they have encountered as part of identity formation. The significance of organisational cultures is discussed throughout the book and explores the ways in which individual autonomy is both threatened and claimed. Issues discussed include the frequent changes imposed through government initiatives and the social perception of education professionals when compared to other professional roles. Contributions have been drawn from teachers and leaders in schools, colleges,

universities and specialist training Chapter authors have a variety of experiences offering a multi perspective approach This will include strategic leadership operational management and classroom practice all of which offer insights of interest to educators at various points on the professional journey The narrative approach adopted by authors provides the opportunity for readers to engage with others experiences enabling personal reflection on their own professional identity Big Fish, Little Fish Susan Groundwater-Smith,Nicole Mockler,2015-05-27 This text prepares pre service teachers to best meet the needs of students entering the challenging middle years of their education The Digital Self Comfort Alorh,2025-09-15 In an era where our lives are increasingly intertwined with digital platforms The Digital Self Redefining Identity in the Age of Social Media Virtual Worlds and AI explores the profound impact of technology on self perception social interaction and personal identity This book delves into the evolution of the digital self examining how social media online communities and virtual spaces have reshaped the way we present ourselves and engage with the world Blending psychological theories with real world examples this book unpacks the dynamics of online self expression social validation and digital reputation It navigates the tensions between authenticity and curation the pressures of social comparison and the shifting boundaries between our real and virtual identities For anyone curious about how technology influences human behavior or for those looking to understand their own digital presence more deeply The Digital Self Redefining Identity in the Age of Social Media Virtual Worlds and AI is a thought provoking and insightful journey into the future of identity in a hyper connected world
