The Shark Attack Files Jeff Klinkenberg, University of Florida, 2016-11-14 The University of Florida has an ambitious goal to harness the power of its faculty staff students and alumni to solve some of society's most pressing problems and to become a resource for the state of Florida the nation and the world In 1958 a panel funded by the Office of Naval Research initiated the formation of the International Shark Attack File the first comprehensive documentation of shark attacks on a global and historical level In 1988 the file was transferred to the Florida Museum of Natural History at the University of Florida It is part of the Florida Program for Shark Research directed by George H Burgess the planet's expert on shark attacks and staffed by a world renowned team of research scientists and educators Travel the globe with Burgess the Sherlock Holmes of shark attacks as he studies mauled remains and the scars of the lucky survivors His most famous case took him to an idyllic Red Sea resort where panic had set in after five attacks occurred in a single week The attacks were carried out by Oceanic White Tips and a Mako deep water species that had no business being so close to the beach Following the clues dive boat operators feeding sharks by hand to entertain tourists the disappearance of the yearly tuna catch and the dead sheep New Zealand cargo companies had been tossing overboard Burgess solves the mystery of the shark attacks for Egyptian tourism officials and offers a list of best practices But not all cases end with an easy prescription In St Petersburg Beach Florida he visits a recent shark attack victim bitten just off her dock on Boca Ciega Bay While the victim would prefer to forget the fateful day the sharp toothed jaws of the Bull Shark latched onto her leg just below the knee Burgess gently coaxes the story from her It will go in the file to educate other shark researchers and educators and help us better understand the world's most feared predator The stories chronicled in Gatorbytes span all colleges and units across the UF campus They detail the far reaching impact of UF's research technologies and innovations and the UF faculty members dedicated to them Gatorbytes describe how UF is continuing to build on its strengths and extend the reach of its efforts so that it can help even more people in even more places

Shark Trouble Peter Benchley, 2002-06-04 Drawing on more than three decades of experience writing about sharks and other marine animals the bestselling author of *Jaws* combines high adventure with practical information in a book that is at once a thriller and a valuable guide to being safe in on under and around the sea Shark attacks on human beings generate a tremendous amount of media coverage Benchley writes partly because they occur so rarely but mostly I think because people are and always have been simultaneously intrigued and terrified by sharks Sharks come from a wing of the dark castle where our nightmares live deep water beyond our sight and understanding and so they stimulate our fears and fantasies and imaginations Benchley describes the many types of sharks including the ones that pose a genuine threat to man what is and isn't known about shark behavior the odds against an attack and how to reduce them even further all reinforced with the lessons he has learned the mistakes he has made and the personal perils he has encountered while producing television documentaries bestselling novels and articles about the sea

and its inhabitants He tells how to swim safely in the ocean how to read the tides and currents what behavior to avoid and how to survive when danger suddenly strikes He discusses how to tell children about sharks and the sea and how to develop in young and old alike a healthy respect for the ocean As Benchley says The ocean is the only alien and potentially hostile environment on the planet into which we tend to venture without thinking about the animals that live there how they behave how they support themselves and how they perceive us I know of no one who would set off into the jungles of Malaysia armed only with a bathing suit a tube of suntan cream and a book and yet that s precisely how we approach the oceans No longer Not after you ve read Shark Trouble

Shark Attacks Blake Chapman,2017-11 Humans spend more time in or on the water than ever before We love the beach But for many people getting in the water provokes a moment s hesitation Shark attacks are big news events and although the risk of shark attack on humans is incredibly low the fact remains that human lives are lost to sharks every year Shark Attacks explores the tension between risk to humans and the need to conserve sharks and protect the important ecological roles they play in our marine environments Marine biologist Blake Chapman presents scientific information about shark biology movement patterns and feeding behaviour She discusses the role of fear in the way we think about sharks and the influence of the media on public perceptions Moving first hand accounts describe the deep and polarising psychological impacts of shark attacks from a range of perspectives This book is an education in thinking through these emotive events and will help readers to navigate the controversial issues around mitigating shark attacks while conserving the sharks themselves

Loan Sharks Charles R. Geisst, 2017-04-04. Predatory lending: A problem rooted in the past that continues today. Looking for an investment return that could exceed 500 percent annually, maybe even twice that much. Private, unregulated lending to high-risk borrowers is the answer, or at least it was in the United States for much of the period from the Civil War to the onset of the early decades of the twentieth century. Newspapers called the practice loan sharking because lenders employed the same ruthlessness as the great predators in the ocean. Slowly, state and federal governments adopted laws and regulations curtailing the practice, but organized crime continued to operate much of the business. In the end, lending to high-margin investors contributed directly to the Wall Street crash of 1929. *Loan Sharks* is the first history of predatory lending in the United States. It traces the origins of modern consumer lending to such older

practices as salary buying and hidden interest charges Yet as Geisst shows no holds barred loan sharking is not a thing of the past Many current lending practices employed today by credit card companies payday lenders and providers of consumer loans would have been easily recognizable at the end of the nineteenth century Geisst demonstrates the still prevalent custom of lenders charging high interest rates especially to risky borrowers despite attempts to control the practice by individual states Usury and loan sharking have not disappeared a century and a half after the predatory practices first raised public concern

Shark Frenzy John R. Clark, Clark, 1975 Describes the characteristics and behavior of various kinds of sharks discusses numerous cases of shark attacks on people and offers guidance to swimmers in avoiding attacks and in defensive tactics

"This shark, swallow you whole" Kathy Merlock Jackson, Philip L. Simpson, 2023-03-09 One of the most influential thrillers in media history *Jaws* first surfaced as a best selling novel by first time novelist Peter Benchley in 1974 followed by the 1975 feature film directed by Steven Spielberg at the beginning of his storied career *Jaws* is often considered the first blockbuster and successive generations of filmmakers have cited it as formative in their own creative development For nearly 50 years critics and scholars have studied how and why this seemingly straightforward thriller holds such mass appeal This book of original essays assembles a range of critical thought on the impact and legacy of the film employing new perspectives historical cinematic literary scientific and environmental while building on the insights of previous writers While varying in focus the essays in this volume all explore why *Jaws* was so successful in its time and how it remains a prominent storytelling influence well into the 21st century

Shark Richard Ellis,2012-04-17 The sharks ancient or modern real or imaginary have always been with us and will probably remain with us forever They appear not only in movies and literature but in countless permutations of size shape and materials permeating our daily lives with their silent menace In a sense humans live in a world replete with sharks not vice versa Thus Richard Ellis sets about chronicling and debunking the myths of sharks throughout history From 18th century art to the phenomena of *JAWS* the shark has remained the indomitable aggressor of the deep the last demon of humankind The image of the shark and the fear it inspires infiltrates our daily lives with its mythical power and strength But it is not man who should fear the shark Our need to dominate these predators is destroying them and their habitat Through hundreds of full color images Ellis proves the necessity of preserving these majestic creatures As curator of the Ft Lauderdale Museum of Art s exhibition entitled *Shark* debuting May 2012 Ellis adeptly turns these sleek efficient hunters from monsters of the deep into rare beautiful forces of nature
