Big D Dead Jeanne Ann Macejko,2015-01-27 The secret dread of runners isn t blisters or shin splints It s finding a dead body Joggers seem destined to discover the missing the murdered and abandoned Until Brynn Reeves stumbled across a severed human head In *Big D Dead* a feisty heroine who is afflicted with cerebral palsy joins a cloistered monk and a homicide detective on the trail of a hired killer In the sizzling Texas heat the body count climbs **Spirography** Cara Stoddard,2025-04-08 *Spirography* is a coming of age memoir about the bond between a father and daughter their intertwined illnesses and the enduring love that persists even after death This memoir follows author Cara Stoddard s intersecting experiences of cancer grief and sexuality rooted in the suburban Midwest of the late twentieth century where idyllic lake life water sports NASCAR Christian rock and a willful ignorance around queerness define the landscape Set in the

author's childhood home on a lake in Michigan this lyrical archive of a family navigating crisis is an elegy not only for the memory of her father but also the end of her childhood spent outdoors Stoddard takes the reader intimately through the checkpoints of her coming of age story including working at a summer camp moving to Colorado falling in love coming out each leg of the journey backdropped by her father's declining health and the author's own incremental acceptance of this impending loss Writing from ten years after her father's death she traces her experiences of becoming a stepparent carrying on her dad's legacy and in unimaginable ways bringing him back to life Physical Sciences Amy Bain, Janet Richer, Janet Weckman, 2001-05-15 Everything you need to create exciting thematic science units can be found in these handy guides Developed for educators who want to take an integrated approach these teaching kits contain resource lists reading selections and activities that can be easily pulled together for units on virtually any science topic Arranged by subject each book lists key scientific concepts for primary intermediate and upper level learners and links them to specific chapters where resources for teaching those concepts appear Chapters identify and describe comprehensive teaching resources nonfiction and related fiction reading selections then detail hands on science and extension activities that help students learn the scientific method and build learning across the curriculum A final section helps you locate helpful experiment books and appropriate journals Web sites agencies and related organizations *Keystone Corpse* Jeanne Ann Macejko, 2015-01-26 *Keystone Corpse* weaves a tale of modern crime with ancient roots The grisly murder of a wealthy landowner triggers a police inquiry that stretches from Wales to Cornwall from Ireland to the Cotswolds Join Detective Inspector Cieran Cai and his partner DS Kim Patel on an intriguing journey through crime and time To track down the killer the CID team must unravel clues hidden in Medieval manuscripts historical chronicles and period poetry As the body count climbs rare books and valuable maps go missing Cieran Cai's Welsh sense of humor finally deserts him when the killer gets too close to home

Nana's Baby Cynthia D. Toliver, 2024-01-01 Nana's death forces college coed Chandra Howard to return to her Third Ward shot gun home and the four year old daughter Lyric Chandra left in Nana's care An estranged daughter a tenuous relationship with boyfriend James Dexter and the return of her volatile ex Tommy Joe disrupt Chandra's plans to escape the impoverished life fate handed her A tragic encounter with Tommy Joe puts Chandra at rock bottom Only then does she find the courage to heal from her past and hope for her future I'm Just Say'n Thomas Vanleer, 2013-03-28 Daniel Kleinberger Professor of Law William Mitchell College of Law Very interesting style is steam of consciousness with forays into Scriptures setting the course for the stream Chris Wright President Minnesota Timberwolves Member of the Downtown Council Minneapolis Regional Chamber of Commerce Tom I have read a number of chapters but not all of it and really have no substantive changes or comments as a man of God you are a wonderful ambassador Reverend Lonnie L Branch I m Just Say n by the Reverend Thomas H Vanleer is inspired of God His experiences in life has been tempered by the Spirit of God in guiding him in ministry as well as writing May God continue to bless him George Blackwell Director of Community Affairs

retired Qwest Communications The author of I m just say n has clearly captured the essence of what s good bad and in some cases what s evil in our society By using biblical scriptures Mr Vanleer uses clear references to articulate the differences and in some instances the similarities of each chapter I found the book to be very engaging very informative and very thought provoking I highly recommend this book for future reading **Color and Shape Books for All Ages** Cathie Hilterbran Cooper,2000 Color and Shape Books for All Ages calls attention to more than 450 titles focused on the concepts of color and shape The purposes of the color and shape books range from simply learning the names of colors or identifying simple shapes to recognizing intricate geometric shapes or even understanding how color affects responses moods and attitudes

Molecular Origins of Brain and Body Geometry Antonio Lima-de-Faria,2014-10-07 New concepts arise in science when apparently unrelated fields of knowledge are put together in a coherent way The recent results in molecular biology allow to explain the emergence of body patterns in animals that before could not be understood by zoologists There are no fancy curiosities in nature Every pattern is a product of a molecular cascade originating in genes and a living organism arises from the collaboration of these genes with the outer physical environment Tropical fishes are as startling in their colors and geometric circles as peacocks Tortoises are covered with the most regular triangles squares and concentric circles that can be green brown or yellow Parallel scarlet bands are placed side by side of black ones along the body of snakes Zebras and giraffes have patterns which are lessons in geometry with their transversal and longitudinal stripes their circles and other geometric figures Monkeys like the mandrills have a spectacularly colored face scarlet nose with blue parallel flanges and yellow beard All this geometry turns out to be highly molecular The genes are many and have been DNA sequenced Besides they not only deal with the coloration of the body but with the development of the brain and the embryonic process A precise scenario of molecular events unravels in the vertebrates It may seem far fetched but the search for the origin of this geometry made it mandatory to study the evolution of matter and the origin of the brain It turned out that matter from its onset is pervaded by geometry and that the brain is also a prisoner of this ordered construction Moreover the brain is capable of altering the body geometry and the geometry of the environment changes the brain Nothing spectacular occurred when the brain arrived in evolution Not only it came after the eye which had already established itself long ago but it had a modest origin It started from sensory cells on the skin that later aggregated into clusters of neurons that formed ganglia It also became evident that pigment cells that decide the establishment of the body pattern originate from the same cell population as neurons the neural crest cells This is a most revealing result because it throws light on the power that the brain has to rapidly redirect the coloration of the body and to change its pattern Recent experiments demonstrate how the brain changes the body geometry at will and within seconds an event that could be hardly conceived earlier Moreover this change is not accidental it is related to the surrounding environment and is also used as a mating strategy Chameleons know how to do it as well as flat fishes and octopuses No one would have dared to think that the brain had its own geometry How

could the external geometry of solids or other figures of our environment be apprehended by neurons if these had no architecture of their own Astonishing was that the so called simple cells in the neurons of the primary visual cortex responded to a bar of light with an axis of orientation that corresponded to the axis of the cell s receptive field We tend to consider our brain a reliable organ But how reliable is it From the beginning the brain is obliged to transform reality Brain imagery involves form color motion and sleep Unintentionally these results led to unexpected philosophical implications Plato s pivotal concept that forms exist independently of the material world is reversed Atoms have been considered to be imaginary for 2 000 years but at present they can be photographed one by one with electron microscopes The reason why geometry has led the way in this inquiry is due to the fact that where there is geometry there is utter simplicity coupled to rigorous order that underlies the phenomenon where it is recognized Order allows variation but imposes at the same time a canalization that is patent in what we call evolution
