Tripathi,Bhoomika R. Kar,Namita Pande,2022-04-18 This edited volume examines the new ways of conceptualizing Psychology as an integrative science to understand human problems at the individual group societal and national levels It focuses on the need for Psychology to move away from its present reductionist perspective to an integrative psychological science perspective The volume is organized into three main sections The first discusses the convergence of qualitative and quantitative methodological approaches in Psychology The second part highlights the importance of social and personal wellness The third focuses on studying human behaviour in the context of cultural variations and the impact of cultural context on psychological processes The book includes contributions from leading scholars in psychology in India whose reference to practical social and political issues of contemporary interest makes the volume stand out This book serves as a resource to initiate the dialogue about the need issues levels and integration methods in Psychology which can be scientifically tested and theoretically explained The comprehensive and authoritative volume is of interest to researchers and scholars in cognitive psychology clinical psychology organizational psychology social psychology and cross cultural psychology *Idealism* Hector Davidson, Idealism as a philosophical doctrine holds that the mind and its ideas are the primary reality shaping the material world rather than being shaped by it This perspective challenges the materialist viewpoint that places physical matter at the foundation of existence From ancient Greek philosophy to modern quantum theories idealism has provided a profound framework for understanding reality perception and consciousness Throughout history idealism has offered a lens through which thinkers could explore the mysteries of existence Plato s theory of forms for instance posited that the tangible world is a shadow of a higher more real world of ideas Similarly German idealists such as Immanuel Kant Johann Gottlieb Fichte and Georg Wilhelm Friedrich Hegel expanded on these concepts arguing that human perception actively constructs reality These ideas have not only shaped philosophy but have also influenced disciplines ranging from art to science At its core idealism raises fundamental questions about the nature of reality Is the external world independent of our consciousness or does it exist only as a construct of the mind Idealism asserts that our understanding of the universe is intrinsically tied to our subjective experiences emphasizing that thought and consciousness are the building blocks of reality This contrasts sharply with materialism which contends that physical matter exists independently and is the source of all mental phenomena Buddhism in England ,1926 **THE YOGA THERAPY HANDBOOK - BOOK FOUR -**
