

Mine Water Pollution Mine Water Pollution

Brad T. Clark, Peter McCormick

Mine Water Pollution Mine Water Pollution:

Mine Water Paul L. Younger, S.A. Banwart, Robert S. Hedin, 2012-12-06 Nowhere is the conflict between economic progress and environmental quality more apparent than in the mineral extraction industries The latter half of the 20th century saw major advances in the reclamation technologies However mine water pollution problems have not been addressed In many cases polluted mine water long outlives the life of the mining operation As the true cost of long term water treatment responsibilities has become apparent interest has grown in the technologies that would decrease the production of contaminated water and make its treatment less costly This is the first book to address the mine water issue head on The authors explain the complexities of mine water pollution by reviewing the hydrogeological context of its formation and provide an up to date presentation of prevention and treatment technologies The book will be a valuable reference for all professionals who encounter polluted mine water on a regular or occasional basis **Water Quality Management Guidance for Mine-related Pollution Sources** Dan Deely, 1977 **Processes, Procedures and Methods to Control Pollution from Mining Activities** Skelly and Loy, Penn Environmental Consultants, United States. Environmental Protection Agency, 1973 Report on processes and methods of controlling pollution pollution control resulting from mining activities includes information in respect of water pollution erosion control regrading revegetation water treatment etc and a glossary Bibliography pp 367 to 390 graphs illustrations and statistical tables **Acid Mine Water** Water Resources Scientific Information Center, 1975 *Water Resources Research Catalog*, 1966 *Mine Water Hydrogeology and Geochemistry* Paul L. Younger, N. S. Robins, 2002 Guidelines for Control of Water Pollution from Acid Mine Drainage Colorado. Department of Health. Water Pollution Control Commission, 1970 Gold Metal Waters Brad T. Clark, Peter McCormick, 2021-09-01 Gold Metal Waters presents a uniquely inter and transdisciplinary examination into the August 2015 Gold King Mine spill in Silverton Colorado when more than three million gallons of subterranean mine water carrying 880 000 pounds of heavy metals spilled into a tributary of the Animas River The book illuminates the ongoing ecological economic political social and cultural significance of a regional event with far reaching implications showing how this natural and technical disaster has affected and continues to affect local and national communities including Native American reservations as well as agriculture and wildlife in the region This singular event is surveyed and interpreted from multiple diverse perspectives college professors students and scientists and activists from a range of academic and epistemological backgrounds with each chapter reflecting unique professional and personal experiences Contributors examine both the context for this event and responses to it embedding this discussion within the broader context of the tens of thousands of mines leaking pollutants into waterways and soils throughout Colorado and the failure to adequately mitigate the larger ongoing crisis The Gold King Mine spill was the catalyst that finally brought Superfund listing to the Silverton area it was a truly sensational event in many respects Gold Metal Waters will be of interest to students and scholars in all

disciplines but especially in environmental history western history mining history politics and communication as well as general readers concerned with human relationships with the environment Contributors Alane Brown Brian L Burke Karletta Chief Steven Chischilly Becky Clausen Michael A Dichio Betty Carter Dorr Cynthia Dott Gary Gianniny David Gonzales Andrew Gulliford Lisa Marie Jacobs Ashley Merchant Teresa Montoya Scott W Roberts Lorraine L Taylor Jack Turner Keith D Winchester Megan C Wrona Janene Yazzie *Water Resources Thesaurus* ,1971 **Minewater Treatment** Melanie Brown,Bob Barley,Harvey Wood,2002-03-31 Part of Groundwater Set Buy all six books and save over 30% on buying separately Biffaward Winner 2002 The Clean Rivers Trust has fought off stiff competition to become the Research and Development Technology Category winner at the Biffaward Awards 2002 with its project Technology Analysis of Acid Mine Drainage Treatment Methods Minewater Treatment Technology Application and Policy was produced based on the findings of the research to aid in the selection design and implementation of the most appropriate treatment techniques for particular minewater discharges Much work has been carried out in recent decades concerning minewater treatment both in the UK and worldwide Many different bodies and organizations are involved in developing minewater treatment processes and schemes Minewater Treatment addresses the need for a single source of state of the art information that draws all the latest research material together Key features of the book include a full literature review of minewater treatment throughout the world an overview of relevant legislation and policy in a global context a review of currently available methods for treating minewater worldwide a site specific inventory of minewater treatment schemes within the UK including compilation of available monitoring data and assessment of performance a review of emerging and innovative minewater treatment technologies and consideration of related academic research within the UK a comprehensive list of active and innovative minewater treatment technologies that are not currently compiled in a book or other review publication a detailed summary and recommendations section assessing the applicability efficiency and cost effectiveness of minewater treatment schemes Relevant scientific subject matter is presented in a concise easily accessible manner to assist with the objective assessment of the progress made to date Heavily illustrated with many colour photographs the book allows best use to be made of the collective experience of minewater treatment practitioners throughout the UK whilst at the same time placing the UK experience within a global context An invaluable reference work for mining companies consultants planning officers environmental research scientists environmental agencies water utilities and regulatory bodies Minewater Treatment is a definitive source of information on minewater treatment technologies and will help facilitate the selection of the most appropriate technique required to tackle particular minewater discharge problems Contents The minewater problem Treatment options Existing sites in the UK Case studies Existing sites in the UK Site summaries Summary conclusions
