Patrick Geddes Spokesman For Man And The Environment:

Patrick Geddes: Spokesman for Man and the Environment Sir Patrick Geddes, 1972 *Patrick Geddes' Contribution to Sociology and Urban Planning* Indra Munshi, 2022-03-29 This book explores Patrick Geddes' significant contributions to urban planning and sociology. His vision of the city, rooted in the principles of social development and preservation of cultural and ecological resources, has inspired generations of urban planners, architects, and social scientists engaged with contemporary urban issues. The book discusses Geddes' early experiments with urban renewal in Edinburgh, the famous Cities and Town Planning Exhibition, and his work in India for the improvement of cities and towns with minimal financial and human cost. It examines the theoretical underpinnings of his ideas in relation to issues such as better housing and health, the preservation of history and culture, the role of a citizen university, and urban renewal and the contemporary urban ecological crisis, among others. Furthermore, it looks at the question of sustainability in the context of Geddes' vision of a more humane, social, natural, and aesthetic town and city. A comprehensive review of Patrick Geddes' ideas, this book underlines the relevance of his work to contemporary urban concerns and issues, especially in India. It will be of interest to scholars and researchers of sociology, urban studies, city planning, urban sociology, architecture, human geography, urban geography, settlement studies, development studies, and environmental sustainability. [Patrick Geddes's Intellectual Origins](#)

Macdonald Murdo Macdonald, 2020-02-03 Patrick Geddes is one of Scotland's most remarkable thinkers of the late nineteenth century. His environmental and cultural message endures today, yet the distinctively Scottish context to his thinking has not been properly acknowledged. This book situates Geddes within his own intellectual background, described by George Davie as the democratic intellect, and explores the relevance of that background to Geddes' substantial national and international achievements across a truly impressive range of disciplines. **Key Features:** Explores Patrick Geddes' Scottish intellectual background in depth for the first time; Highlights Geddes' insistence on the importance of arts to sciences and vice versa, and the distinctively Scottish context of this approach; Considers the interdisciplinary achievements of Geddes in Edinburgh, Dundee, Paris, London, and India; Pays particular attention to his leadership of the Celtic Revival, both from a Scottish perspective and with respect to international links, in particular with Indian cultural revivalists such as Ananda Coomaraswamy. **Inventing the Built Environment** Juliana Yat Shun Kei, 2024-06-28 Why and how was the term 'built environment' first introduced? *Inventing the Built Environment* retrieves the origin of this ubiquitous term. The articulation of the built environment, Kei demonstrates, coincided with the redefinition of education, research, and professional practices in architecture and town planning in 1960s Britain. Concentrating on the half-decade during which the term permeated the architectural and planning professions, this book recalls a time when the built environment was conceived as a part of the British government's effort in national economic planning. *Inventing the Built Environment* unpacks the proposal for a Research Council for the Built Environment to mobilise architecture and town planning for political economy. How a relatively

small group of architects planners politicians and researchers transposed scientific thoughts from biology economics and computation into the built environment will be considered too Kei highlights the assumptions about and classification of the population that were made when inventing the built environment The architectural and biosocial implications of the making and remaking of this architectural environmental notion in Britain and beyond will be revealed through the works of pre eminent architect planners including Richard Llewelyn Davies and William Holford At a time when environmental concerns again take the front seat of architectural and planning debates this book offers for scholars and students an alternative lens to reflect on the assumptions and bias that can be embedded in our architectural lexicons **Manifestoes and**

Transformations in the Early Modernist City Professor Christian Hermansen Cordua,2012-11-28 The industrialization of the nineteenth century European city facilitated developing conceptions of the model city and allowed for large scale urban transformations The urban discourse in the latter half of the nineteenth century was consequently dominated by a dialectic exchange between the ideal and the practical a debate played out in the formation of the modern metropolis *Manifestoes and Transformations* is the first work to deal with urban utopias and their relationship with actual urban interventions Bringing together a carefully chosen wide ranging team of experts the book provides a broad contextual exploration of the ideas and urban practices which are the foundations of our conception of the contemporary city As such it is a valuable resource for students interested in the formation of the modernist city *Ecology and Modern Scottish Literature* Louisa

Gairn,2008-05-01 This book presents a provocative and timely reconsideration of modern Scottish literature in the light of ecological thought Louisa Gairn demonstrates how successive generations of Scottish writers have both reflected on and contributed to the development of international ecological theory and philosophy Provocative re readings of works by authors including Robert Louis Stevenson John Muir Nan Shepherd John Burnside Kathleen Jamie and George Mackay Brown demonstrate the significance of ecological thought across the spectrum of Scottish literary culture This book traces the influence of ecology as a scientific philosophical and political concept in the work of these and other writers and in doing so presents an original outlook on Scottish literature from the mid nineteenth century to the present **British Sociology's**

Lost Biological Roots Chris Renwick,2012-01-25 A new and innovative account of British sociology s intellectual origins that uses previously unknown archival resources to show how the field s forgotten roots in a late nineteenth and early twentieth century debate about biology can help us understand both its subsequent development and future potential

Folk Engineering Stephen J. Ramos,2025-10-03 During the interwar years the discourse of regional planning profoundly reformulated the spatiality of race and place in the United States In the South Jim Crow brutality and agricultural crisis fueled unprecedented population outmigration Sociologist and author Howard W Odum founded the Institute for Research in Social Science at the University of North Carolina to develop a Southern regionalism that reasserted organic territorial culture amid that flux Regionalism connected the arts humanities and social sciences across the country in a collective effort

to elevate place based narrative and folk sensibility to an all encompassing social theory Stephen J Ramos refocuses the history of US regionalism and regional planning on the South illuminating the modern tensions inherent in regionalism as nostalgic cultural practice paired with future oriented planning ideology By tracing Southern regionalists intellectual history and institutional biography Ramos explores how they developed a regional nationalism through surveying and planning that came to inspire federal New Deal policies for the South In showing how Odum s influence crossed various borders Ramos offers us a nuanced way to reappraise race social science and planning in the US South **Seven Management Moralities**

BOYER,Paul S Boyer,2009-06-30 For over a century dark visions of moral collapse and social disintegration in American cities spurred an anxious middle class to search for ways to restore order In this important book Paul Boyer explores the links between the urban reforms of the Progressive era and the long efforts of prior generations to tame the cities He integrates the ideologies of urban crusades with an examination of the careers and the mentalities of a group of vigorous activists including Lyman Beecher the pioneers of the tract societies and Sunday schools Charles Loring Brace of the Children s Aid Society Josephine Shaw Lowell of the Charity Organization movement the father of American playgrounds Joseph Lee and the eloquent city planner Daniel Hudson Burnham Boyer describes the early attempts of Jacksonian evangelicals to recreate in the city the social equivalent of the morally homogeneous village he also discusses later strategies that tried to exert a moral influence on urban immigrant families by voluntarist effort including for instance the Charity Organizations friendly visitors By the 1890s there had developed two sharply divergent trends in thinking about urban planning and social control the bleak assessment that led to coercive strategies and the hopeful evaluation that emphasized the importance of environmental betterment as a means of urban moral control Property, Planning and
