Poetics Of Cities Designing Neighborhoods That Work:

The Poetics of Cities Mike Greenberg, 1995 In this lively and insightful book Mike Greenberg argues that the purpose of cities and neighborhoods is to foster economic social and intellectual exchange the process that underlies the creation of value He seeks to show how the detailed geography of the city can either inhibit or encourage such exchanges and thus profoundly affect the lives of the people who live there Cities filled an important evolutionary niche historically because they were the places in contrast to rural areas or villages where exchange occurred with greatest efficiency where value was created most spectacularly and thus where the wealth was But it wasn't just the fact of concentration but the how of it that made cities efficient producers of value and circulators of wealth The Poetics of Cities is concerned with the context of contemporary cities and suburban rings where development dynamics guided by the needs of the automobile and by reformist planning concepts that went awry create environments that are increasingly hostile to exchange and thus threaten to inhibit the economic development that made them possible in the first place The city of late nineteenth and early twentieth century America was in some ways a remarkably sophisticated technology for fostering exchange and cementing community Taking examples mostly from his hometown San Antonio Texas Greenberg examines certain features of those cities their sidewalk systems their scale and setbacks the rhythms of their streetscapes the structure of their neighborhoods and shows why they worked so well and why they cannot be arbitrarily tossed aside without doing damage to the urban economy He then offers some practical planning strategies and regulatory ideas to help cities retain what is useful from their traditional forms while at the same time accommodating modernity Engagingly written The Poetics of Cities will make fascinating reading for architects urban planners neighborhood activists city officials real estate developers and anyone interested in the quality of urban life in America BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Research Handbook on Urban Design Marion Roberts, Suzy Nelson, 2024-01-18 With the UN Habitat estimating that by 2035 the majority of the world's population will be living in metropolitan areas this cutting edge Research Handbook explores the emerging field of urban design and its place in contemporary scholarship

The Oxford Handbook of Urban Planning Randall Crane, Rachel Weber, 2015 Why plan How and what do we plan Who plans for whom These three questions are then applied across three major topics in planning States Markets and the Provision of Social Goods The Methods and Substance of Planning and Agency Implementation and Decision Making

The Poetics of Cities Mike Greenberg, 1995 In this lively and insightful book Mike Greenberg argues that the purpose of cities and neighborhoods is to foster economic social and intellectual exchange the process that underlies the creation of value He seeks to show how the detailed geography of the city can either inhibit or encourage such exchanges and thus profoundly affect the lives of the people who live there Cities filled an important evolutionary niche historically because they were the places in contrast to rural areas or villages where exchange occurred with greatest efficiency where value was created most spectacularly and

thus where the wealth was But it wasn't just the fact of concentration but the how of it that made cities efficient producers of value and circulators of wealth The Poetics of Cities is concerned with the context of contemporary cities and suburban rings where development dynamics guided by the needs of the automobile and by reformist planning concepts that went awry create environments that are increasingly hostile to exchange and thus threaten to inhibit the economic development that made them possible in the first place The city of late nineteenth and early twentieth century America was in some ways a remarkably sophisticated technology for fostering exchange and cementing community Taking examples mostly from his hometown San Antonio Texas Greenberg examines certain features of those cities their sidewalk systems their scale and setbacks the rhythms of their streetscapes the structure of their neighborhoods and shows why they worked so well and why they cannot be arbitrarily tossed aside without doing damage to the urban economy He then offers some practical planning strategies and regulatory ideas to help cities retain what is useful from their traditional forms while at the same time accommodating modernity Engagingly written The Poetics of Cities will make fascinating reading for architects urban planners neighborhood activists city officials real estate developers and anyone interested in the quality of urban life in America

BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved Design for Diversity Emily Talen, 2012-07-26 The city is more than just a sum of its buildings it is the sum of its communities The most successful urban communities are very often those that are the most diverse in terms of income age family structure and ethnicity and yet poor urban design and planning can stifle the very diversity that makes communities successful Just as poor urban design can lead to sterile monoculture successful planning can support the conditions needed for diverse communities Emily Talen explores the linkage between urban forms and social diversity and how one impacts the other Learning the lessons from past successes and failures and building from detailed case studies of different neighborhoods Design for Diversity provides urban designers and architects with design strategies and tools to ensure that their work sustains and nurtures social diversity

The Urban Wisdom of Jane Jacobs Jane Jacobs, Sonia Hirt, Diane L. Zahm, 2012 Here for the first time is a thoroughly interdisciplinary and international examination of Jane Jacobs's legacy Divided into four parts I Jacobs Urban Philosopher II Jacobs Urban Economist III Jacobs Urban Sociologist and IV Jacobs Urban Designer the book evaluates the impact of Jacobs's writings and activism on the city the professions dedicated to city building and more generally on human thought Together the editors and contributors highlight the notion that Jacobs's influence goes beyond planning to philosophy economics sociology and design They set out to answer such questions as What explains Jacobs's lasting appeal and is it justified Where was she right and where was she wrong What were the most important themes she addressed And although Jacobs was best known for her work on cities is it correct to say that she was a much broader thinker a philosopher and that the key to her lasting legacy is precisely her exceptional breadth of thought

Healthy Cities Namir Khan, Willem H. Vanderburg, 2001 Modern cities can be designed to constitute a more supportive environment for a great many activities

provide a more livable habitat and reduce the burden imposed on the biosphere They can be made healthier in terms of the definition by World Health Organization and more sustainable by means of new and emerging preventive approaches Healthy Cities focuses on those preventive approaches that can make cities healthier and more sustainable This book as well as the two companion volumes Sustainable Energy and Sustainable Production is the result of a twelve year research project carried out at the Center for Technology and Social Development at the University of Toronto The research findings led to the development of a new conceptual framework and strategy aimed at converting technological and economic growth into development that would gradually become more sustainable The Aesthetics Of Human Environments Arnold

Berleant, Allen Carlson, 2007-05-24 The Aesthetics of Human Environments is a companion volume to Carlson's and Berleant's The Aesthetics of Natural Environments Whereas the earlier collection focused on the aesthetic appreciation of nature The Aesthetics of Human Environments investigates philosophical and aesthetics issues that arise from our engagement with human environments ranging from rural landscapes to urban cityscapes Our experience of public spaces such as shopping centers theme parks and gardens as well as the impact of our personal living spaces on the routine activities of our everyday life are discussed in terms of their aesthetic value and the nature of our aesthetic appreciation This volume will appeal to any reader concerned about the aesthetic quality of the world in which we live **The City Reader** Richard T. LeGates, Frederic Stout, 2015-07-16

The sixth edition of the highly successful The City Reader juxtaposes the very best classic and contemporary writings on the city to provide the comprehensive mapping of the terrain of Urban Studies and Planning old and new The City Reader is the anchor volume in the Routledge Urban Reader Series and is now integrated with all ten other titles in the series This edition has been extensively updated and expanded to reflect the latest thinking in each of the disciplinary areas included and in topical areas such as compact cities urban history place making sustainable urban development globalization cities and climate change the world city network the impact of technology on cities resilient cities cities in Africa and the Middle East and urban theory The new edition places greater emphasis on cities in the developing world globalization and the global city system of the future The plate sections have been revised and updated Sixty generous selections are included forty four from the fifth edition and sixteen new selections including three newly written exclusively for The City Reader The sixth edition keeps classic writings by authors such as Ebenezer Howard Ernest W Burgess LeCorbusier Lewis Mumford Jane Jacobs and Louis Wirth as well as the best contemporary writings of among others Peter Hall Manuel Castells David Harvey Saskia Sassen and Kenneth Jackson In addition to newly commissioned selections by Yasser Elsheshtawy Peter Taylor and Lawrence Vale new selections in the sixth edition include writings by Aristotle Peter Calthorpe Alberto Camarillo Filip DeBoeck Edward Glaeser David Owen Henri Pirenne The Project for Public Spaces Jonas Rabinovich and Joseph Lietman Doug Saunders and Bish Sanyal The anthology features general and section introductions as well as individual introductions to the selected articles introducing the authors providing context relating the selection to

other selection and providing a bibliography for further study The sixth edition includes fifty plates in four plate sections substantially revised from the fifth edition Design for Social Diversity Emily Talen, Sungduck Lee, 2018-03-13 The most successful urban communities are very often those that are the most diverse in terms of income age family structure and ethnicity and yet poor urban design and planning can stifle the very diversity that makes communities successful Just as poor urban design can lead to sterile monoculture successful planning can support the conditions needed for diverse communities This new edition addresses the physical requirements of socially diverse neighborhoods Using the city of Chicago and its surrounding suburban areas as a case study the authors investigate whether social diversity is related to particular patterns and structures found within the urban built environment Design for Social Diversity provides urban designers and architects with design strategies and tools to ensure that their work sustains and nurtures social diversity

City-making, Space and Spirituality Stéphan de Beer, 2023-09-29 This book is about the soul of the city embodied in its spaces and people It traces dynamics in inner city neighbourhoods of South Africa's post apartheid capital Pretoria Viewing the city through its most vulnerable people and places it recognizes that urban space is never neutral and shaped by competing value frameworks The first part of the book invites planners city makers and ordinary urban citizens to consider a new self understanding reclaiming their agency in the city making process Through the metaphor of becoming like children planning practice is deconstructed and re imagined A praxis based methodology is presented cultivating four distinct moments of entering reading imagining and co constructing the city After deconstructing urban spaces and discourses the second part of the book explores a concrete spirituality and ethic of urban space It argues for a shift from planning as technocracy to planning as immersed participatory artistry opening up to the genius of space responsive to urban cries and joining to construct new soul full spaces Local communities and interconnected movements become embodiments of urban alternatives through resistance and reconstruction building on local assets animating local reclamations and weaving nets of hope that will span the entire city Providing a concrete methodology for city making that is rooted in a community based urban praxis this book will be of interest to urban planning researchers professional planners and designers and also grass root community developers or activists

The Scope of Architectural Theory Jon Lang, 2025-06-03 This book comprehensively lays out the knowledge base required for architectural practice and education at a time when artificial intelligence AI algorithms are shaping the way architects think Architects with a desire to retain their creative role in the design of buildings and urban spaces must understand and articulate the theoretical bases of their work and what it can achieve This book provides a clear structure and outline of both the functional and procedural theoretical base for architects to employ in their work It offers an intellectually rigorous basis that allows architects to understand the evolution of architecture through history as well as the advocacies of individual architects It provides them with the scope of architectural theory necessary for designing for the future The book can be a valuable reference for researchers and professionals interested in architectural

theory and allied fields *Neighborhood* Emily Talen, 2019 In an effort to make neighborhoods compatible with 21st century ideals Talen has produced a singular resource for understanding what is meant by neighborhood a multi dimensional comprehensive view of what neighborhoods signify how they are idealized and measured and what their historical progression has been *Merchant of Illusion* Nicholas Dagen Bloom, 2004 *Elemental Sensuous* John Murungi, 2016-09-23 Under the guidance of phenomenological insights this book presents the sensuous in its elemental sense The elemental is not to be confused here with the classical notion of the atom which is viewed as a self contained entity into which all reality is reducible Rather the elemental is a living creative force that resists categorization This force embodies the principle of openness and opening a principle celebrated and given expression by numerous artists and other friends of the sensuous As elemental the sensuous irreducibly expresses itself in multiple ways The editors of this volume avoid posting themselves between the sensuous and those to whom it presents itself Each of the contributors here responds to the call of the elemental and each finds his or her starting point where everyone else starts and ends The multiple voices brought together here constitute a concert with the elemental sensuous as the conductor In reading this book the reader will become more aware of himself or herself and more aware of the world in which he or she lives **Transformations of Urban and Suburban Landscapes** Gary Backhaus, John Murungi, 2002-01-01 The study of landscape and place has become an increasingly fertile realm of inquiry in the humanities and social sciences In this new book of essays selected from presentations at the first annual meeting of the Society for Philosophy and Geography scholars investigate the experiences and meanings that inscribe urban and suburban landscapes Gary Backhaus and John Murungi bring philosophy and geography into a dialogue with a host of other disciplines to explore a fundamental dialectic while our collective and personal activity modifies the landscape in turn the landscape modifies human identities and social and environmental relations Whether proposing a peripatetic politics conducting a sociological analysis of building security systems or critically examining the formation of New York City's municipal parks each essay sheds distinctive light on this fascinating and engaging aspect of contemporary environmental studies *Making Sense of the City* Zane L. Miller, 2001 Through an examination of such topics as city charters city planning texts neighborhood organizations municipal recreation programs urban government reforms urban identity and fair housing campaigns the authors offer insight into the process through which ideas about the nature of the city have affected action in the urban environment BOOK JACKET *Boss Cox's Cincinnati* Zane L. Miller, 2000 Miller carefully explores both the nature and the significance of bossism showing how it and municipal reform were both essential components of the modern urban political system **Getting Around Brown** Gregory S. Jacobs, 1998 Getting Around Brown is both the first history of school desegregation in Columbus Ohio and the first case study to explore the interplay of desegregation business and urban development in America **A Right to Representation** Kathleen L. Barber, 2000 From this practice stems the endemic underrepresentation of minorities in our political life Enforcement of the Voting Rights Act has led to increased

minority electoral success but the strategy most commonly used creation of majority minority districts has come under attack in the Supreme Court
