Race To The Bottom:

Race to the Bottom Azfar Shafi,Ilyas Nagdee,2022-06-20 Antiracist movements are more mainstream than ever before Liberal democracies boast of their policies designed to stamp out racism in all walks of life Why then is racism still ever present in our society This is not an accident but by design Capitalism is structured by racism and has relentlessly attacked powerful movements Race to the Bottom traces our current crisis back decades to the fragmentation of Britain s Black Power movements and their absorption into NGOs and the Labour Party The authors call for recovering radical histories of antiracist struggle championing modern activism and infusing them with the urgency of our times replacing anxieties over unconscious bias and rival claims for representation with the struggle for a new socialist multi racial organising from below

Race to the Bottom LaFleur Stephens-Dougan,2020-07-31 African American voters are a key demographic to the modern Democratic base and conventional wisdom has it that there is political cost to racialized dog whistles especially for Democratic candidates However politicians from both parties and from all racial backgrounds continually appeal to negative racial attitudes for political gain Challenging what we think we know about race and politics LaFleur Stephens Dougan argues that candidates across the racial and political spectrum engage in racial distancing or using negative racial appeals to communicate to racially moderate and conservative whites the overwhelming majority of whites that they will not disrupt the racial status quo Race to the Bottom closely examines empirical data on racialized partisan stereotypes to show that engaging in racial distancing through political platforms that do not address the needs of nonwhite communities and charged rhetoric that targets African Americans immigrants and others can be politically advantageous Racialized communication persists as a well worn campaign strategy because it has real electoral value for both white and black politicians seeking to broaden their coalitions Stephens Dougan reveals that claims of racial progress have been overstated as our politicians are incentivized to employ racial prejudices at the expense of the most marginalized in our society

Racing to the Bottom? Kathryn Harrison,2011-11-01 The spectre of a race to the bottom is increasingly prominent in debates about globalization and also within federal systems where the mobility of both capital and individuals prompts fears of interjurisdictional competition with respect to taxes and environmental and welfare standards While there has been no shortage of either political rhetoric or academic theorizing on this subject empirical studies have been in shorter supply This volume seeks to fill that gap by asking Are Canadian provinces engaged in a race to the bottom and if so what are the consequences The contributors apply insights from economics and political science to several policy fields What emerges is a theoretical and empirical picture of interprovincial competition that shows it to be more complex than the popular image of a race to the bottom and that also contradicts predictions of an inexorable downward spiral This timely practical volume will be

of interest to public policy practitioners as well as to students and scholars of economics and political science Racing to the Bottom? David Wheeler, 2001 Critics of free trade have raised the specter of a race to the bottom in which environmental standards collapse because polluters threaten to relocate to pollution havens in the developing world The flaw in the race to the bottom model is that its basic assumptions misrepresent the political economy of pollution control in developing countries

Green Leviathan Inger Weibust, 2016-04-22 The US Switzerland and Canada are wealthy democracies that should be conducive to effective decentralized or cooperative environmental policy making However a closer examination of their environmental policy over many decades finds no evidence that these approaches have worked So does it matter which level of government makes policy Can cooperation between sub national governments protect the environment Building on comparative case studies on air and water pollution and making use of extensive historical material Inger Weibust questions how governance structure affects environmental policy performance in the US Switzerland Canada

and the European Union The research breaks new ground by studying formal and informal environmental cooperation It analyzes whether federal systems with more centralized policy making produce stricter environmental policies and debates whether devolution and the establishment of subsidiaries will lead to less environmental protection An essential insight into the complexities of policy making and governance structures this book is an important contribution to the growing debates surrounding comparative federalism and multi level governance Comparative Politics: Comparative public policy Howard

After Welfare Sanford Schram, 2000-03 Do contemporary welfare policies reflect the realities of the economy

and the needs of those in need of public assistance or are they based on outdated and idealized notions of work and family life Are we are moving from a war on poverty to a war against the poor In this critique of American social welfare policy Sanford F Schram explores the cultural anxieties over the putatively deteriorating American work ethic and the class race sexual and gender biases at the root of current policy and debates Schram goes beyond analyzing the current state of affairs to offer a progressive alternative he calls radical incrementalism whereby activists would recreate a social safety net tailored to the specific life circumstances of those in need His provocative recommendations include a series of programs aimed at transcending the prevailing pernicious distinction between social insurance and public assistance so as to better address the needs of single mothers with children Such programs could include divorce insurance or even some form of pregnancy insurance for women with no means of economic support By pushing for such programs Schram argues activists could make great strides towards achieving social justice even in today s reactionary climate
