Race Colonialism And The City:

Race, Colonialism and the City John Rex, 2013-06-17 John Rex is well known as one of Britain's leading sociologists and for his special interest in the sociology of race relations and the sociology of the city. In the present book these two related areas are brought together. Professor Rex discusses imperialistic social systems and examines the position of black people at the colonial and metropolitan ends of those systems. This book was first published in 1973. *Race, Colonialism and the City* John Rex, 2007

Review of Race, colonialism and the city Sydney Kronus, 1975 Colonial Immigrants in a British City John Rex, Sally Tomlinson, David Hearnden, Peter Ratcliffe, 2022-11-16 Colonial Immigrants in a British City 1979 analyses the relationship between West Indian and Asian immigrants and the class structure of a British city. Based on a four year research project in the Handsworth area of Birmingham the book is a study of race and community relations political social economic and personal in a major centre of immigrant settlement. It considers the relationship between housing class and class formations and consciousness in other sectors of allocation such as employment and education. It includes a consideration of the changing political climate on race relations between 1950 and 1976. Urbanism, Colonialism and the World-economy Anthony King, 2015-03-27 Recent years have witnessed a surge in public awareness concerning the impact of world economic forces on cities. In this challenging book the author argues that though the consciousness is new the phenomena themselves are not. For the past two centuries at least world economic political and cultural forces have been major factors shaping cities patterns of urbanization and the physical and spatial forms of the built environment. Anthony King believes that the historical context of contemporary global restructuring must be recognized if present day urban and regional change is to be properly understood. He explores and documents the cultural and spatial links between metropolitan core and colonial periphery and examines the historical foundations of the world urban system. He also looks at the social production of building and urban form and demonstrates their potential for understanding economic political social and cultural change on a global scale.

Routledge Library Editions: Economic Geography Various, 2021-06-23 The books in this set originally published between 1968 and 1992 introduce the reader to the many lines of thought in the literature on economic geography and tie these various aspects together within the concept of the economy. As well as providing a comprehensive overview of the Western European economy since the Second World War and including specific studies and assessments of the Dutch and Italian economies these volumes examine the economic factors that have shaped cities and patterns of urbanization.

Race, Colonialism, and Social Transformation in Latin America and the Caribbean Jerome Branche, 2019-04-01 This collection of essays offers a comprehensive overview of colonial legacies of racial and social inequality in Latin America and the Caribbean. Rich in theoretical framework and close textual analysis these essays offer new paradigms and approaches to both reading and resolving the opposing forces of race class and the power of states. The contributors are drawn from a variety of fields including literary criticism anthropology politics and sociology. The

contributors to this book abandon the traditional approaches that study racialized oppression in Latin America only from the standpoint of its impact on either Indians or people of African descent. Instead, they examine colonialism's domination and legacy in terms of both the political power it wielded and the symbolic instruments of that oppression. The volume's scope extends from the Southern Cone to the Andean region, Mexico, and the Hispanophone and Francophone Caribbean. It contests many of the traditional givens about Latin America, including governance and the nation-state, the effects of globalization, the legacy of the region's criollo philosophers and men of letters, and postulations of harmonious race relations. As dictatorships give way to democracies in a variety of unprecedented ways, this book offers a necessary and needed examination of the social transformations in the region. *Global Cities* Anthony King, 2015-03-27

Since the late 1970s, the role of key world cities such as Los Angeles, New York, and London as centres of global control and coordination has come under increasing scrutiny. This book provides an overview and critique of work on the global context of metropolitan growth, world city formation, and the theory it has generated. Suggesting post-imperialism as the most appropriate framework for analysis, the author demonstrates the extent to which urban and regional development both in Britain and elsewhere were linked to a colonial mode of production and highlights the effects of its disappearance. Against this background, the author charts the transformation of London from imperial capital in the nineteenth and early twentieth centuries to world city in the capitalist world economy of today. *Infrastructures of Race* Daniel Nemser, 2017-05-23

With case studies that link practices of concentration to the emergence of new racial categories, this groundbreaking book convincingly argues that race was a product of, rather than a starting point for, the spatial politics of colonial rule in Latin America. *From Empire to Empire* Abigail Jacobson, 2011-08-04

The history of Jerusalem as traditionally depicted is the quintessential history of conflict and strife of ethnic tension and of incompatible national narratives and visions. It is also a history of dramatic changes and moments, one of the most radical ones being the replacement of the Ottoman regime with British rule in December 1917. *From Empire to Empire* challenges these two major dichotomies: ethnic and temporal, which shaped the history of Jerusalem and its inhabitants. It links the experiences of two ethnic communities living in Palestine: Jews and Arabs, as well as bridging two historical periods: the Ottoman and British administrations. Drawing upon a variety of sources, Jacobson demonstrates how political and social alliances are dynamic, context-dependent, and purpose-driven. She also highlights the critical role of foreign intervention, governmental and nongovernmental, in forming local political alliances and in shaping the political reality of Palestine during the crisis of World War I and the transition between regimes. *From Empire to Empire* offers a vital new perspective on the way World War I has been traditionally studied in the Palestinian context. It also examines the effects of war on the socioeconomic sphere of a mixed city in crisis and looks into the ways the war, as well as Ottoman policies and administrators, affected the ways people perceived the Ottoman Empire and their location within it. *From Empire to Empire* illuminates the complex and delicate relations between ethnic and national groups and offers a different lens through which

the history of Jerusalem can be seen it proposes not only a story of conflict but also of intercommunal contacts and cooperation

Decolonizing the Colonial City Colin Clarke, 2006-08-31 In this sequel to *Kingston Jamaica Urban Development and Social Change 1692 to 1962* 1975 Colin Clarke investigates the role of class colour race and culture in the changing social stratification and spatial patterning of Kingston Jamaica since independence in 1962 He also assesses the strains created by the doubling of the population on labour and housing markets which are themselves important ingredients in urban social stratification Special attention is also given to colour class and race segregation to the formation of the Kingston ghetto to the role of politics in the creation of zones of violence and drug trading in downtown Kingston and to the contribution of the arts to the evolution of national culture A special feature is the inclusion of multiple maps produced and compiled using GIS geographical information systems The book concludes with a comparison with the post colonial urban problems of South Africa and Brazil and an evaluation of the de colonization of Kingston

Colonial Cities R.J. Ross, Gerard J. Telkamp, 2012-12-06 by ROBERT ROSS and GERARD J TELKAMP I In a sense cities were superfluous to the purposes of colonists The Europeans who founded empires outside their own continent were primarily concerned with extracting those products which they could not acquire within Europe These goods were largely agricultural and grown most often in a climate not found within Europe Even when as in India before 1800 the major exports were manufactures in general they were still made in the countryside rather than in the great cities It was only on rare occasion when great mineral wealth was discovered that giant metropolises grew up around the site of extraction Since their location was deter

mined by geology not economics they might be in the most inaccessible and in convenient areas but they too would draw labour off from the agricultural pursuits of the colony as a whole From the point of view of the colonists the cities were therefore in some respects necessary evils as they were parasites on the rural producers competing with the colonists in the process of surplus extraction Nevertheless the colonists could not do without cities The requirements of colonisation demanded many unequivocally urban functions Pre eminent among these was of course the need for a port to allow the export of colonial wares and the import of goods from Europe or from other parts of the non European world in the country trade as it was known around India City in Print.
