The Family in Global Perspective Elaine J. Leeder, 2004. The Family in Global Perspective is an exciting new cross-cultural text that should be adopted for classroom use in universities nationwide. Elaine Leeder has created a readable, interesting textbook for undergraduates that reveals the historical, socio-cultural, and gender realities of family life. Real-life examples from 42 countries support student understandings of sociological theory and build a comprehensive awareness of family as a way of being for people throughout the world. Peter Phillips, Sonoma State University. I think it would be a great book for a class in Family Studies. In the Family Studies field, we have come to realize that the family as we see it is not how peoples of the world necessarily see it. I think exposing all Family Studies students to this text would greatly enhance their educational development. Written in very comprehensible language for undergraduates. Yvonne M. Caldera, Ph.D., Texas Tech University. I find the book overall is well done; it is very readable for undergraduates. The author is good at interweaving interesting research and travel notes with theories and discussions about families in a global perspective in various places. The style is refreshing, particularly enticing for undergraduate readers. Heying Jenny Zahn, Georgia State University. The book is rather unique in the sense that there are few works that place the U.S. family within a larger global framework. The comparisons that are made across societies serve to enhance understanding of family patterns in the United States. I also should mention that the book is well written and in an interesting way too. It successfully combines

important academic material with a thought provoking style of presentation Sharon K Houseknecht Ohio State University
