Rational Choice And Moral Agency:

Rational Choice and Moral Agency David Schmitz, 1995-01 Is it rational to be moral How do rationality and morality fit together with being human These questions are at the heart of David Schmitz's exploration of the connections between rationality and morality This inquiry leads into both metaethics and rational choice theory as Schmitz develops conceptions of what it is to be moral and what it is to be rational He defends a fairly expansive conception of rational choice considering how ends as well as means can be rationally chosen and explaining the role of self imposed constraints in a rational life plan His moral theory is dualistic ranging over social structure as well as personal conduct and building both individual and collective rationality into its rules of recognition for morals To the why be moral question Schmitz responds that being moral is rational but he does not assume we have reasons to be rational Instead Schmitz argues that being moral is rational in a particular way and that beings like us in situations like ours have reasons to be rational in just that way This approach allows him to identify decisive reasons to be moral at the same time it explains why immorality is as prevalent as it is This book thus offers a set of interesting and realistic conclusions about how morality fits into the lives of humanly rational agents operating in an institutional context like our own

Rational Choice and Moral Agency David Schmitz, 2016-05-17 Why be moral Philosophers have wanted to answer this question for well over two thousand years ever since Plato wrote on the subject The question turned out to be as frustrating as it is compelling A proper philosophical answer begins by saying what morality is and what it means to be moral A wise philosophical answer also steps back to ask what sort of being wants an answer Why are we asking Who wants to know What do we want and in what way might being moral serve our purposes What difference does it make whether we have any reason to be moral Do we have reason to care whether other people have any reason to be moral Why In this book David Schmitz presents elements of a theory of humanly rational choice why we have reason to be rational why being rational about the big picture seldom involves maximizing our payoff on a day to day basis how rational agents choose ends and why rational agents choose to respect and care about other people Schmitz also presents elements of a theory of morality how being moral connects to what is good for oneself and to what is good for others how it connects to following rules and understanding what the people around us expect from us and how it connects to the heights of human aspiration and flourishing

Freedom and Criminal Responsibility in American Legal Thought Thomas Andrew Green, 2014-10-27 As the first full length study of twentieth century American legal academics wrestling with the problem of free will versus determinism in the context of criminal responsibility this book deals with one of the most fundamental problems in criminal law Thomas Andrew Green chronicles legal academic ideas from the Progressive Era critiques of free will based and generally retributive theories of criminal responsibility to the midcentury acceptance of the idea of free will as necessary to a criminal law conceived of in practical moral legal terms that need not accord with scientific fact to the late in century insistence on the compatibility of scientific determinism with moral and legal responsibility and

with a modern version of the retributivism that the Progressives had attacked Foregrounding scholars language and ideas Green invites readers to participate in reconstructing an aspect of the past that is central to attempts to work out bases for moral judgment legal blame and criminal punishment *Agency and Autonomy in Kant's Moral Theory* Andrews Reath,2006 Kant s theory of moral sensibility respect for the moral law and the influence of inclination Hedonism heteronomy and Kant s principle of happiness The categorical imperative and Kant s conception of practical rationality Legislating the moral law Autonomy of the will as the foundation of morality Legislating for a realm of ends the social dimension of autonomy Agency and universal law Self legislation and duties to oneself Agency and the imputation of consequences in Kant s ethics

Rational Choice Theory Margaret S. Archer,Jonathan Q. Tritter,2013-04-03 Rational Choice Theory is flourishing in sociology and is increasingly influential in other disciplines Contributors to this volume are convinced that it provides an inadequate conceptualization of all aspects of decision making of the individuals who make the decisions of the process by which decisions get made and of the context within which decisions get made The critique focuses on the four assumptions which are the bedrock of rational choice rationality the theory s definition of rationality is incomplete and cannot satisfactorily incorporate norms and emotions individualism rational choice is based upon atomistic individual decision makers and cannot account for decisions made by couples groups or other forms of collective action process the assumption of fixed well ordered preferences and perfect information makes the theory inadequate for situations of change and uncertainty aggregation as methodological individualists rational choice theorists can only view structure and culture as aggregates and cannot incorporate structural or cultural influences as emergent properties which have an effect upon decision making The critique is grounded in discussion of a wide range of social issues including race marriage health and education **Handbook of the Philosophical Foundations of Business Ethics** Christoph Luetge,2012-10-09 The

Responsible Decision Making Laszlo Zsolnai,2017-07-28 What should I do How should I deal with this How should I behave How should I act we ask ourselves daily But this is only the first part of the sentence while the full sentence is What should I do to achieve such and such for example to complete an assigned task to do well before my boss or a client to be pleased with myself to carry out my plans to make money in the stock market to pass an

exam to complete an application etc These and similar questions that people ask consciously or not openly or not are decisions What skills must we master especially when there is a need to make not only elementary decisions but also decisions that affect the existence health and even lives of people First Laszlo Zsolnai writes that we should acquire the skill of gaining knowledge Only then will we stand a chance of reacting to things that are improbable today but could become a fact tomorrow Also essential is the skill of designing i e preparing actions conceptually in order to make decisions before irreversible changes occur Finally it is essential to master the skill of multidimensional judgment within the space defined by effectiveness efficiency and ethics This is Zsolnai s attempt to build a model of making ethical decisions both effectively and efficiently Therefore the model is much broader than purely an analytical framework would be It must tell us how to act rather than limit us to reflection on actions already performed it must combine decision and praxiological analysis of human conduct The proposed model enlarges the scope of the debate and suggests new avenues of both rational and responsible decision making This is an original statement of the crossover of policy and morality

Murdoch on Truth and Love Gary Browning,2018-06-19 This book reviews Iris Murdoch s thought as a whole It surveys the breadth of her thinking taking account of her philosophical works her novels and her letters It shows how she explored many aspects of experience and brought together apparently contradictory concepts such as truth and love The volume deals with her notions of truth love language morality politics and her life It shows how she offers a challenging provocative way of seeing things which is related to but distinct from standard forms of analytical philosophy and Continental thought Unlike so many philosophers she does offer a philosophy to live by and unlike many novelists she has reflected deeply on the kind of novels she aimed to write The upshot is that her novels and her philosophy can be read together productively as contributions to how we can see others and the world

Humanizing Mental Illness Abigail Gosselin, 2021-08-15 Mental illness stigma is rooted in a perceived lack of agency but stigma itself undermines agency While most philosophical accounts of the matter are concerned with the question of how much agency a person with mental illness has this book asks how we can enhance the agency of people with mental illness *Humanizing Mental Illness* explains and explores these connections arguing that all of us can and should adjust our social practices to enhance the agency of people with mental illness This agency is complicated and nuanced as it is often directly constrained due to a person's symptoms and indirectly constrained due to stigma Abigail Gosselin both a scholar in the field of social philosophy and a person with a psychiatric disability illustrates the importance of social interaction for developing and exercising agency By overcoming mental illness stigma and by adopting certain epistemic and moral virtues we can interact with people who have mental illness in ways that help enhance their agency and enable them to flourish *Humanizing Mental Illness* demonstrates that we need to challenge our explicit and implicit biases and learn to interact with mental illness in more intentional supportive and inclusive ways

Respect, Pluralism, and Justice Thomas E. Hill, 2000-03-30 *Respect Pluralism and Justice* is a series of essays which sketch a broadly Kantian framework for moral deliberation and then use it to address important social and political issues What does it mean to respect humanity in a diverse world Must respect be earned and can it be forfeited How and why should the state punish law breakers When if ever is political violence justified How far are we responsible for the consequences of our misdeeds How can liberals justify coercive state power in a world of diverse moral and religious beliefs How far can we rely on conscience when it conflicts with authority Although critical of Kant's extreme position on particular issues Hill suggests ways to develop a Kantian approach that would emphasize the need for mutually respectful dialogue appreciation of diversity and sensitivity to particular contexts In this lucid exploratory work Hill integrates the theoretical and the practical allowing each to illuminate the other He not only develops and extends Kantian ethical theory but shows the role that it can play in our society

Relational Agency and Environmental Ethics Suvielise Nurmi, 2023-04-11 Why does ethics only weakly contribute to the most crucial problems of the current world *Relational Agency and Environmental Ethics A Journey Beyond Humanism as We Know It* explores how the concept of moral agency embedded in modern humanist ethics in its reliance on environmentally harmful and scientifically implausible

presuppositions prevents ethics from efficiently supporting a sustainability transition The modernist individualist notion of agency includes conceptual dichotomies between moral agency and human nature mind and body reason and emotion and knowledge and will yet it should be revised without dismissing responsibility normativity and a shared ground for critical assessment Suvielise Nurmi proposes an agential shift resting on a relational concept of agency combining ecofeminist and evolutionary criticisms of modernism together with various interdisciplinary discussions involving philosophy of mind cognitive science anthropology social ontology and developmental biology and psychology This book argues that the relational shift can resolve the dilemma and bring environmental relationships to the core of ethical discourse there is no ethics distinct from environmental ethics Environmental responsibilities can be justified as responsibilities for one's relationally considered agency
